

A detailed historical map of Europe, likely from a 17th-century atlas, serves as the background. The map is rendered in a sepia tone with red ink used for coastlines and major rivers. It includes numerous Latin labels for geographical features, such as 'OCEANUS', 'DEVCAL', 'HIBERNIA', 'Noort zee', 'MARE', and 'BARBARIA'. The map shows the British Isles, the North Sea, and the surrounding continental landmasses with intricate details of coastlines and internal regional divisions.

direct tax rules have a significant effect on national direct tax systems This book focuses on the relation between free movement rights of EU citizens and the legal autonomy of Member States in the area of direct taxation and will immediately engage tax practitioners and scholars The author asks and answers the question Has the willingness at EU level to make EU citizenship a key driver behind the integration process come at the expense of national direct tax autonomy The book s incomparably thorough analysis of the distinctive evolution mainly via ECJ case law of the relation between the EU principle of free movement of persons and Member States direct tax rules includes in depth discussion of the following elements and more the concept of EU citizenship in the EU s constitutional and institutional development how the ECJ has interpreted the concept of free movement with regard to economically inactive persons how the notion of EU citizenship has widened the ECJ s view on treaty access how the ECJ has addressed the clash between free movement of persons and direct taxation in the EU s constitutional context and numerous tax policy initiatives with regard to EU citizens before and after the Treaty of Lisbon This is the first book to investigate in such detail how the ECJ has tried to reconcile specific national direct tax rules with the general EU principle of free movement of persons from the perspective of EU citizenship This book explains that the ECJ is in the process of reconceptualizing the market freedoms relating to the free movement of persons also in the area of direct taxation as part of a broader EU citizenship right for all economically active EU citizens to pursue an economic activity in a cross border context a right beyond the aim of realization of the internal market As an extremely important analysis of the influence of EU law on the direct tax autonomy of Member States this book is sure to be itself of great influence in the practice and study of taxation in the EU

Cases, Materials and Text on European Law and Private Law Arthur Hartkamp, Carla Sieburgh, Wouter Devroe, 2017-03-09 This Casebook deals with the horizontal effects of EU law which is to say its effects on relationships between individuals To a large extent these effects have been created by the Court of Justice of the European Union CJEU on the basis of the European Treaties The main focus of the Casebook is on the developments relating to primary EU law and their influence on national private law It studies instances where EU primary law has already directly or indirectly influenced the case law in the Member States or where it is expected to do so soon Compared to the well known impact of EU directives on private law these developments concerning primary EU law are hardly noted by private lawyers and perhaps not sufficiently explained by scholars of EU law Therefore the book makes an important contribution to scholarship and education This book highlights developments in the areas of competition law fundamental freedoms non discrimination general principles of EU law ex officio application of provisions of EU law and implementation of directives including harmonious interpretation and Francovich liability In its analysis of the ways in which EU law interacts with private law the book will be an invaluable resource to students practitioners and academics of EU private law

Cases, Materials and Text on Property Law Sief van Erp, Bram Akkermans, 2012-07-23 This casebook presents a deep comparative analysis of property law systems in Europe ie the law of immovables movables and claims offering signposts and stepping

stones for the reader wishing to explore this fascinating area The subject matter is explained with careful attention given to its history foundations thought patterns underlying principles and basic concepts The casebook focuses on uncovering differences and similarities between Europe s major legal systems French German Dutch and English law are examined while Austrian and Belgian law are also touched upon The book combines excerpts from primary source materials case law and legislation and from doctrine and soft law In doing so it presents a faithful picture of the systems concerned Separate chapters deal with the various types of property rights their creation transfer and destruction with security rights such as mortgages pledges retention of title as well as with harmonising and unifying efforts at the EU and global level Through the functional approach taken by the Ius Commune Casebooks this volume clearly demonstrates that traditional comparative insights no longer hold The law of property used to be regarded as a product of historical developments and political ideology which were considered to be almost set in stone and assumed to render any substantial form of harmonisation or approximation very unlikely Even experienced comparative lawyers considered the divide between common law and civil law to be so deep that no common ground so it was thought could be found However economic integration in particular integration of financial markets and freedom of establishment has led to the integration of particular areas of property law such as mortgage law and enforceable security instruments eg retention of title This pressure towards integration has led comparative lawyers to refocus their interest from contract tort and unjustified enrichment to property law and delve beneath its surface This book reveals that today property law systems are closer to one another than previously assumed that common ground can be found and that differences can be analysed in a new light to enable comparison and further the development of property law in Europe
