Eu Tech Policy In Euro Union:

Environmental and Technology Policy in Europe G.J. Schrama, S. Sedlacek, 2013-03-09 This book contains six studies on various national environmental policies and environment oriented technology policy systems in Austria Denmark Germany the Netherlands Spain and the United Kingdom sandwiched between this introductory and a concluding chapter These studies were conducted as part of the ENVINNO research project Towards an Integration of Environmental and Ecology Oriented Technology Policy Stimulus and Response in Environment Related Innovation Networks which formed part of the Targeted Social and Economic Research TSER Programme of Directorate General XII of the European Commission now 1 Directorate General for Research We like to thank Mrs Genevieve Zdrojewski of GD Directorate General Research for her kind support of our research project The project was carried out between 1998 and 2001 by research teams from the six countries The co ordinating institute was the Department of Environmental Economics and Management at the Vienna University of Economics and Business Administration At this place we want to mention all researchers involved in the ENVINNO project and we want to thank them all for their contributions to this book and the project and for the good time we have had performing the project and meeting each other at regular intervals in Vienna A Enschede NL Berlin D and Sevilla E Department of Environmental Economics and Management at the Vienna University of Economics and Business Administration in Austria Univ Prof Dr Uwe Schubert Mag Judith Kock Mag Jiirgen Mellitzer 1 Under contract number SOEI CT98 110S 2 The project website is <http://www.wu.wien.ac.at/iwwu/institute/iuw/ENVINNO> Research, Quality, Competitiveness Attilio Stajano, 2008-09-22 The European Union EU was launched as a response to the economic dominance of the United States and to a lesser degree the Soviet Union The nations of Western Europe were too small to compete against large scale and diversified economies on their own Six countries eventually expanding to 27 and counting took a series of steps toward progressively deeper integration the removal of internal tariffs the construction of a common external tariff the elimination of many but not all non tariff barriers leading to a single market and the adoption of a common currency by 15 of the member states The EU today equals and even exceeds the U S on many key indicators of performance In the process two similar but nonetheless divergent models of social and economic life stand in contrast with each other The U S is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the cruel aspects of the free market Until recently the economic dynamism of the U S called into question whether the so called European social model was sustainable in an era of globalization The EU was slipping in competitiveness and was being challenged by new global powers like China and India Although the U S economy has slowed there is little indication that European countries are capable of leveraging the situation to their advantage **European Union Research Policy** Veera Mitzner, 2020-06-01 This book describes the emergence of research policy as a key competence of the European Union EU It shows how the European Community EC the

predecessor of the EU which initially had very limited legal competence in the field progressively developed a solid policy framework presenting science and research as indispensable tools for European economic competitiveness and growth In the late 20th century Western Europe hungry for growth concerned about the American technological lead and keen to compete in the increasingly open international markets the argument for a joint European effort in science and technology seemed plausible However the EC was building its new functions in an already crowded field of European research collaboration and in a shifting political context marked by austerity national rivalries new societal and environmental challenges and emerging ambivalence about science This book conveys the contested history of one of the EU s most successful policies It is a story of struggle and frustration but also of a great institutional and intellectual continuity The ideational edifice for the EC EU research policy that was put in place during the 1960s and 1970s years proved remarkably robust Its durability enabled the rapid takeoff of the European Commission s initiatives in the more favorable political atmosphere of the early 1980s and the subsequent expansion of the EU research funding instruments and programs that permanently transformed the European research landscape

The Emergence of EU Defense Research Policy Nikolaos Karampekios, Iraklis Oikonomou, Elias G. Carayannis, 2017-11-16 This book explores European security and defense R D policy unveiling the strategic industrial institutional and ideational sources of the European Commission s military research initiative Starting from a well defined empirical epicentre the rise of non civilian R D priorities in the European Union this book covers interrelated themes and topics such as approaches to arms production and R D collaboration relationships between European R D related institutions technology and research foundations of European security policy past and present European armament collaborations transatlantic R D collaboration the militarization of border security Divided into 5 sections the enclosed chapters explore the EU technology and innovation policy in regards to security industrial competitiveness and military capabilities The terrorist attacks in the US on September 11 2001 provided a window of opportunity for the introduction of security as a distinct European R D priority In fact since 2002 the Preparatory Action for Security Research PASR has funded 45 million euros to 39 research consortia to conduct security R D While the idea of pooling defense research efforts and programmes in Europe is not new the establishment of institutions like the European Defense Agency EDA are a major step into institutionalizing European agencies involvement in supporting defense technology research It is against this backdrop of policy developments that this book is positioned in addition to addressing some of the political economic industrial and philosophical questions that arise Featuring contributions from a variety of academic fields and industries this book will be of interest to scholars researchers students and policy makers in the fields of security policy international relations innovation European studies

and military studies **Research, Quality, Competitiveness** Attilio Stajano, 2006-06-26 Scholars have long been fascinated by the flexibility and attention to design and quality that are hallmarks of Italy's small firms. Yet as the nature of the global economy shifts and the role of technological innovation becomes ever more important for the advanced industrial economies, the ability of Italian industry to compete will depend far more than in the past on its ability to make use of the resources and networks provided by the European Union. An enlarged Union now provides more opportunities for Italian firms but also increased competition for access to those EU programs that can help firms and governments provide the foundations for future economic growth and international competitiveness. The European Union has become and will remain a critical actor for all those in any member state concerned with the competitiveness of firms and the creation of wealth within the framework of sustainable development in an increasingly competitive global economy. The European Union is of special importance however for Italy. As this volume explains so well, Italy's challenge is a particularly difficult one. Policymakers, academics, and businesspeople all will need to participate in EU programs in new ways in order to maximize the opportunities that the EU provides. Italy's future is inextricably tied to that of the European Union and its leaders in all sectors of life must grasp the opportunities provided by the EU in order to meet their own home-grown challenges.

Leaderless Europe Jack Hayward, 2008-05-29 From its antecedents in the 1950s, successive forms of European integration were intended to be leaderless. They have succeeded only too well in demonstrating that much can be achieved without sustained leadership. The attachment to national sovereignty of most of the European elites and mass populations has meant that confederalism has been implicitly accepted for the foreseeable future. This book attempts to clarify three clusters of issues. First, as European integration has advanced, who has provided the impetus? Particular insiders have episodically exerted decisive innovative influence despite the need to conciliate the jealous champions of national sovereignty. Three case studies are offered: economic and monetary policy, environmental policy, and technology policy. The second part examines why the European Union is currently leaderless. The weakened Commission and the increasingly assertive European Council and Council of Ministers have contended for control of agenda setting, but it is in the sphere of foreign and security policy that the EU's logic of leaderlessness has been most conspicuous. Finally, reduced capacity of the Franco-German tandem to offer acceptable leadership and British incapacity to join or replace them in providing overall leadership is also discussed. **The**

Franco-German Relationship in the EU Douglas Webber, 2005-08-30 This text examines the Franco-German relationship in the EU in relation to different policy sectors. It assesses the nature and importance of the relationship for the policy process. *Toward a Common European Union Energy Policy* V. Birchfield, J. Duffield, 2011-07-18 Since the mid 2000s the

European Union has made unprecedented strides toward the creation of a common energy policy. This book takes stock of these developments, evaluating how much progress has actually been made and what remains to be done, what factors explain these recent advances and their limitations. **ICT Policy, Research, and Innovation** Svetlana Klessova, Sebastian

Engell, Maarten Botterman, Jonathan Cave, 2020-10-30 A comprehensive discussion of the findings of the PICASSO initiative on ICT policy ICT Policy Research and Innovation Perspectives and Prospects for EU US Collaboration provides a clearly readable overview of selected information and communication technology ICT and policy topics Rather than deluge the reader with technical details the distinguished authors provide just enough technical background to make sense of the underlying policy discussions The book covers policy research and innovation topics on technologies as wide ranging as Internet of Things Cyber physical systems 5G Big data ICT Policy Research and Innovation compares and contrasts the policy approaches taken by the EU and the US in a variety of areas The potential for future cooperation is outlined as well Later chapters provide policy perspectives about some major issues affecting EU US development cooperation while the book closes with a discussion of how the development of these new technologies is changing our conceptions of fundamental aspects of society

The European Union's Evolving External Engagement Chad Damro, Sieglinde Gstöhl, Simon Schunz, 2017-11-07 In recent decades the external action of the European Union EU has been undergoing considerable change An expansion of the EU's external policy portfolio can be observed in many areas as previous policies for internal purposes such as competition energy the environment justice and home affairs or monetary governance but also gender science culture or higher education have developed external dimensions This book addresses the EU's potential to become a more joined up global actor in its external engagement It uses a single and innovative analytical framework to examine three clusters of policies EU internal sectoral and cross cutting policies with long standing external engagement those which have been undergoing considerable change and originally internal policies whose external dimensions are comparatively more recent It identifies key explanatory factors for the emergence of certain forms of EU external engagement and identifies patterns of the evolving relations between EU internal and external sectoral policies As such the book examines and assesses exciting new empirical and theoretical research avenues into European integration studies and offers insights into the extent to which the EU may be considered a more joined up global actor developing sectoral diplomacies This text will be of key interest to scholars and students as well as practitioners in the fields of European Union politics European Union foreign policy European Politics diplomacy studies and more broadly law and international relations
