Eu The Wto And The Nafta:

The EU, the WTO, and the NAFTA Joseph Weiler, Academy of European Law, 2000 This volume built on a recent series of courses at the Academy of European Law is a reflection of this conviction The various contributions deal with discrete areas in the double sense of the international trading system but each placing considerable emphasis on the interlocking nature of the various components of that system

The EU, the WTO, and the NAFTA Academy of European Law, 2000

The Impact of WTO SPS Law on EU Food Regulations Chris Downes, 2014-03-20 This book brings a fresh perspective on the emerging field of international food law with the first detailed analysis of the process and implications of domestic compliance with the World Trade Organisation WTO Sanitary and Phytosanitary SPS Agreement It investigates the influence of WTO disciplines on the domestic policy making process and examines the extent to which international trade law determines European Union EU food regulations Following controversial WTO rulings on genetically modified foods and growth hormones in beef awareness and criticism of global rules governing food has grown considerably Yet the real impact of this international legal meta framework on domestic regulations has remained obscure to practitioners and largely unexplored by legal commentators This book examines the emergence of transnational governance practices set in motion by the SPS Agreement and their role in facilitating agricultural trade In so doing it complements and challenges conventional accounts of the SPS regime dominated by analysis of WTO disputes It reviews legal commentary of the SPS Agreement to understand why WTO rules are so commonly characterised as a significant threat to domestic food policy preferences It then takes on these assumptions through an in depth review of food policies and decision making practices in the EU revealing both the potential and limits of WTO law to shape EU policies It finally examines two important venues for the generation of global food norms the WTO SPS Committee and Codex Alimentarius to evaluate the practice and significance of transnational governance in this domain Through detailed case studies including novel foods food additives vitamin and mineral supplements and transparency and equivalence procedures this book provides a richer account of compliance and exposes the subtle but important influence of WTO obligations

International Trade and Economic Law and the European Union Sara Dillon, 2002-09-09 This timely book explores the developing nature of international trade law with particular emphasis on World Trade Organization law and its effects within the European Union In the aftermath of the Seattle upheaval vital questions are being raised as to the future course of global economic law its overall legitimacy implications for democracy for national social and environmental policies and for the well being of the world s people This highly technical subject is rigorously analysed yet the main legal developments and the major trade disputes are discussed in an accessible narrative style The first section covers the common historical roots of the GATT and the EC systems of integration that were part of an idealistic post war heritage The book goes on to demonstrate the idiosyncratic development of GATT law leading to the launch of the WTO in 1995 and the controversial Uruguay Round Agreements which represented the beginning of an

enormous proliferation of causes of action and a greatly enhanced legalism for the global trading system

The Interface of International Trade Law and Taxation Jennifer E. Farrell, 2013 This book explores the ill defined and oft underestimated relationship between the World Trade Organization WTO and taxation By adopting a two pronged approach the relationship is examined in terms of the extent to which the WTO legal framework exerts influence upon domestic tax law and international tax policy and whether it is appropriate for the WTO to play a regulatory role in the field of taxation The book begins with an examination of the historical development of international trade law and international tax law and demonstrates that these two separate areas of law are closely linked in terms of their underlying principles and historical evolution The work then goes on to offer a doctrinal analysis of the tax content found in the WTO legal texts and highlights ambiguities therein

Basic Legal Instruments for the Liberalisation of Trade Federico Ortino, 2004 An in depth analysis of the core legal concepts characterising the two most prominent efforts in the regulation of international trade *European Yearbook of International Economic Law 2014* Christoph Herrmann, Markus Krajewski, Jörg Philipp Terhechte, 2014-02-10 In 2014 the global economic system celebrates two anniversaries Seventy years ago on 22 July 1944 at Bretton Woods New Hampshire the Articles of Agreement of the International Monetary Fund IMF and the Articles of Agreement of the International Bank for Reconstruction and Development Worldbank were adopted Since then the global financial and monetary system underwent significant policy changes but the institutional framework remained the same More recently twenty years ago on 15 April 1994 the Final Act of the Uruguay Round of Multilateral Trade Negotiations was signed and its key component the Agreement establishing the World Trade Organization entered into force on 1 January 1995 Even though the beginning of the multilateral trading system dates back to the late 1940s the founding of the WTO constitutes a significant institutional reform which marks the beginning of a new era Anniversaries are usually moments of celebration However even a superficial observer will notice that neither the current international financial and monetary regime nor the international trade regime is in a stage which invites celebration Instead both are facing difficult and fundamental challenges to their very existence from the outside but also from within So while there may be no time to celebrate anniversaries are also often used for reflection about the past and the future Hence EYIEL 5 2014 considers these two anniversaries ample moments to reflect on the legacy and the current status of the main two pillars of International Economic Law in its Part one Part two of EYIEL 5 2014 brings together contributions on the EU s Deep Trade Agenda on Current Approaches to the International Investment Regime in South America on the Multilayered System of Regional Economic Integration in West Africa and on the Tripartite Free Trade Area as well as on India and her Trade Agreements Part three contains treatises of developments in the World Customs Organization the World Intellectual Property Organization and in International Investment Law After the book reviews in Part four EYIEL 5 2014 is complemented with an Annex containing the Case on exchange rate manipulation and crisis caused guarantees to financial institutions and the Best Submissions of the 11th EMC2 ELSA WTO Moot Court Competition of the Harvard team for the complainant and the Leuven team for the respondent The case not only addresses issues of current interest but also links the subjects of our two special focusses nicely together

The Congress of Prague Gerald Frost, 1997 Addresses and policy discussions at the Congress of Prague celebrate the achievements of Western civilization and affirm the values on which that civilization is based

Free Trade and Cultural Diversity in International Law Jingxia Shi, 2013-04-30 This book attempts to reconcile the concept of free trade with a key non trade social value cultural diversity in an era of economic globalisation It first shows how we can look at culture in many different ways and explains why we should care about cultural diversity The book then examines the challenges that policymakers are faced with in formulating cultural measures in the new media environment and analyses UNESCO s theories and approaches to cultural diversity This is followed by a comprehensive examination of the treatment of culture in global and regional trade agreements including the framework of the GATT WTO system the WTO s judicial practice involving cultural products and the treatment of culture under the EC EU and NAFTA This identifies the challenges trade norms encounter in dealing with cultural products The author seeks to formulate a balanced view of the challenge of protecting and promoting cultural diversity while also recognising the important goal of trade liberalisation To this end Professor Shi proposes a dual method through which the norms found in WTO agreements and in UNESCO cultural instruments may be brought into alignment the first highlighting the compatibility of cultural policy measures with trade obligations on a domestic level the second suggesting potential linkages between the WTO rules and the UNESCO Convention from the perspectives of treaty interpretation

Regional and Global Regulation of International Trade Francis Snyder, 2002-07-05 The processes of legal and economic integration at a regional and global scale have created powerful legal and economic dilemmas They challenge the paradigms of constitutionalism including the State s monopoly of constitutionalism the autonomy of national political communities and the traditional forms of participation and representation The phenomena of globalisation and regional forms of governance have promoted the inter dependence of national political communities and destroyed the artificial boundaries upon which national constitutional democracies are found and from which they derive their legitimacy Furthermore it is inevitable that the development of international trade and economic integration will raise claims for some form of global distributive justice to complement the wealth maximisation arising from free trade This will come from the gradual development of global forms of political

discourse and law making challenging State constitutionalism and requiring some of the instruments and theories of constitutionalism The essays in this collection written by leading scholars in international trade law argue the pros and cons of greater regional and global regulation They conclude that whatever the final framework for international trade the critical decisions about institutional form and content will be decided in an emerging global political arena They help to identify this political arena who governs it and according to which rules and identify the different institutional alternatives in that global political arena

The Forces of Economic Globalization Katherine Lynch, Katherine L. Lynch, 2003-01-01 Increased economic interdependencies and trade flows between states innovations in information technology and computer networks a global shift toward market economies and regional and multilateral trade arrangements have all led to an increasingly globalized world economy The Forces of Economic Globalization Challenges to the Regime of International Commercial Arbitration examines some of the challenges facing the regime of international commercial arbitration in the contemporary global economy It considers the debates concerning the transformation of the global order and the role of nation states within the context of international commercial arbitration Issues discussed include the transformative effect of economic globalization the role of the epistemic community and the increased institutionalization within the international arbitral regime the nationalization of international commercial arbitration and the denationalization and harmonization trends the competitive nature of legislative reform convergence and divergence in the international arbitral process multilateralism and regionalism market modernization and transnationalism globalization and lex mercatoria and the development of online arbitration schemes in cyberspace This book seeks to analyze the inner penetration of a form of world polity or transnational order comprised of part epistemic community institutional networks national laws and multilateral conventions norms rules principles and transnational ideology on the traditional notion of state sovereignty within the international arbitral regime The book will interest practitioners and academics with an interest in international commercial arbitration

Voluntary Export Restraints in WTO and EU Law Sabina Nüesch, 2010 The initial leaps forward in international trade liberalisation were achieved under the auspices of the General Agreement on Tariffs and Trade GATT when trade barriers in the form of tariffs were significantly reduced or removed up until the mid 1970s However this advancement was counteracted by a new protectionism which surfaced in the oil crises and the subsequent world economic recession The term new was not to indicate the novelty of protectionist tendencies regaining momentum but instead referred to the ever more subtle instruments deploying non tariff barriers to trade Among these grey area measures to use GATT parlance are the voluntary export restraints VERs which unfolded insidiously over the years Whereas the proliferation of VERs has attracted abundant economic studies and political debate it found only limited legal discussion Despite their outright ban in the Uruguay Round when VERs were outlawed by the Agreement on Safeguards the rare instances where VERs have actually been challenged is clearly unrepresentative of their propagation The aim of this thesis is to elaborate on the popularity of VERs to examine the

lack of judicial consideration afforded to them expanding therefore on the intersection of international trade regulation with competition law economics and international political economy The Regulation of the Global Water Services Market
Julien Chaisse, 2017-01-26 Drinking water and wastewater services must be provided to many sectors of a nation's economy including its industrial commercial and residential sectors This forms the scope of the water industry's activities and it explains why the privatization of water sanitation and water services has become a huge market and a much debated issue in a number of jurisdictions Historically the water industry has been run as a public service which is owned by the local or national government however recent trends suggest that the role of the private sector is increasing The growing economic interests concerning water and wastewater services are generating a tension with the recent recognition of the human right to water and sanitation This tension between human right and economic rules is the focus of this book which reviews all the international rules that form the regulation of global water services
