Europe as an Idea and an Identity H. Mikkeli, 1998-01-28 Heikki Mikkeli charts the history of the idea of Europe and European identity The first part introduces the various attempts to unify Europe from antiquity to the European Union In the second part the relationship of Europe with America and Russia is considered as well as the ambivalent role of Central Europe

**Europe as an Idea and an Identity** Heikki Mikkeli, 1998 Heikki Mikkeli charts the history of the idea of Europe and European identity The first part introduces the various attempts to unify Europe from antiquity to the European Union In the second part the relationship of Europe with America and Russia is considered as well as the ambivalent role of Central Europe The possibility of a common European identity is also discussed a theme which may have an impact on the ways European history is written in the future

Inventing Europe G. Delanty, 1995-04-19 A critical analysis of the idea of Europe and the limits and possibilities of a European identity in the broader perspective of history This book argues that the crucial issue is the articulation of a new identity that is based on post national citizenship rather than ambivalent notions of unity

Russia and the Idea of Europe Iver B. Neumann, 2013-02-01 The end of the Soviet system and the transition to the market in Russia coupled with the inexorable rise of nationalism has brought to the fore the centuries old debate about Russia's relationship with Europe In Russia and the Idea of Europe Iver Neumann discusses whether the tensions between self referencing romantic nationalist views and Europe orientated liberal views can ever be resolved Drawing on a wide range of Russian sources Neumann outlines the argument as it has unfolded over the last two hundred years showing how Russia is caught between the attraction of an economically politically and socially more developed Europe and the attraction of being able to play a European style imperial role in less developed Asia Neumann argues that the process of delineating a European other from the Russian self is an active form of Russian identity formation The Russian debate about Europe is also a debate about what Russia is and should be

**Mighty Europe 1400-1700** Andrew Hiscock, 2007 In a series of ten historical and literary studies this volume analyses the complex narrative of changing political identities in early modern Europe and maps out some of the dominant ways in which European-ness was articulated in documents of the period As the collection unfolds its contributors explore these themes from a whole range of geographical perspectives including not only accounts of British culture but also those describing cultural relations and political identities with regard to Italy Spain France the Papacy the Netherlands Bohemia and the Americas for example Concentrating upon early modern nations at a time when they were just beginning to formulate recognizable collective identities the studies contained in this volume offer a clear picture of the ways in which current literary and historical scholarship may yield penetrating insights into the broader question of how the very idea of Europe evolved amongst its native inhabitants during the fifteenth sixteenth and seventeenth centuries

Uses of the Other Iver B. Neumann, 1999 The field of international relations has recently witnessed a tremendous growth of interest in the theme of identity and its formation construction and deconstruction In Uses of the Other Iver B. Neumann

demonstrates how thinking about identity in terms of the self and other may prove highly useful in the study of world politics Neumann begins by tracing the four different paths along which this thinking has developed during this century ethnographic psychological Continental philosophical and Eastern excursion and he shows how these blended at the margins of the discipline of international relations at the end of the 1980s There follow several incisive readings of European identity formations on the all European regional and national levels The theme that draws these readings together is how the East is used as a sign of otherness at all three levels Whereas previous studies framed this process as part of colonial and postcolonial developments this book suggests that Easternness is also present as a marker in contemporary discourses about Russia Turkey Central Europe and Bashkortostan among others *European Identity in the Context of National Identity* Bettina Westle, Paolo Segatti, 2016-04-29 In the age of grand recession nationalism seems to have returned to Europe In every EU country many citizens are unhappy with the perceived intrusion of Europe in their way of life Any idea of a genuine pan European identity seems to be in retreat This book provides an unprecedented insight into the multiple ways through which citizens of 16 countries connect their own national identity to European identity The book's theoretical claim is that European identity as well as national identity should be empirically assessed taking into account its multi dimensionality The volume's contributors suggest that European identity was always unlikely to be a source of political integration and political legitimacy in the way national identities have been in the past and are today Europeans primary identity is national rather than supranational Mutual trust between European peoples exists but is somewhat fragile Yet European identity is intertwined with national identities in manifold ways The imagined communities at the national and European level show strong similarities criteria for being a European are strongly associated with the criteria used to define who national belonging These complex links also manifest themselves in citizen's feelings of interdependence between the nations in the European Union which the volume suggests support the EU in the face of severe crises The IntUne series is edited by Maurizio Cotta University of Siena and Pierangelo Isernia University of Siena The INTUNE Project Integrated and United A Quest for Citizenship in an Ever Closer Europe is one of the most recent and ambitious research attempts to empirically study how citizenship is changing in Europe The book series is organized around the two main axes of the project to report how the issues of identity representation and standards of good governance are constructed and reconstructed at the elite and citizen levels and how mass elite interactions affect the ability of elites to shape identity representation and the scope of governance A first set of four books examines how identity scope of governance and representation have been changing over time respectively at elites media and public level The next two books present cross level analysis of European and national identity on the one hand and problems of national and European representation and scope of governance on the other in doing so comparing data at both the mass and elite level A concluding volume summarizes the main results framing them in a wider theoretical context **Christendom and European Identity** Mary Anne Perkins, 2015-02-06 This book critically

explores the idea of Europe since the French Revolution from the perspective of intellectual history. It traces the dominant and recurring theme of Europe as Christendom in discourse concerning the relationship of religion, politics and society in historiography and hermeneutics and in theories and constructions of identity and otherness. It examines the evolution of a grand narrative by which European elites have sought to define European and national identity. This narrative, the author argues, maintains the existence of common historical and intellectual roots, common values, culture and religion. The book explores its powerful legacy in the positive creation of a sense of European unity, the ways in which it has been exploited for ideological purposes and its impact on non-Christian communities within Europe. **The Idea of a United Europe** J.

Shahin, M. Wintle, 2000-07-14. The Idea of a United Europe examines the issues thrown up by the reintegration of Europe since 1989/90 through the primary perspective of European identity. Political economy here joins contemporary history. European studies specialists from Britain, Germany and the Netherlands review Europe's progress now that a decade has passed since the end of the Cold War. Differences within Europe and unifying factors are both assessed in the course of this quest to examine what Europe has become and is becoming at the turn of the millennium. **The Europeanization of**

**Europe: Europe's Cultural Identity in the Context of the Integration Processes** Piotr Mazurkiewicz, 2025-09-11. A Bolivian working in Warsaw for many years decided to apply for Polish citizenship. He was asked only one question at the migration office: whether he ate sauerkraut, hunters' stew and fermented dill cucumbers in brine. You know, he said later, for many years I was not able to swallow it, but recently I forced myself and was able to honestly answer yes. Cuisine, no doubt, is one of the elements of national culture. The question, however, was not just about cuisine but about belonging to a national community that this man found worthy of such a sacrifice. Europe is called the continent of culture. In the book Piotr Mazurkiewicz engages in a reflection on what constitutes the hard core of this culture which allows us to call ourselves Europeans. **Inventing Europe** Gerard Delanty, 1995. Thinking Europe MATS ANDRÉN, 2022-10-14. Presenting a new historical narrative on European integration and identity, this title examines how the concept of Europe has been entangled in a dynamic and dramatic tension between calls for unity and arguments for borders and division. Through an in-depth intellectual history of the idea of Europe, Mats Andrén interrogates the concept of integration and more recent debates surrounding European identity across the nineteenth and early twentieth centuries and the post-war period. Applying a broad range of original sources, this unique work will be key reading for students and researchers studying European History, European Studies, Political History and related fields. *Inventing Europe* NA NA, Gerard Delanty, 1995-07-13.

*Constructing Europe's Identity* Lars-Erik Cederman, 2001. The authors assess not only the benefits but also the costs of attempts to assert a European identity. Referring to debates about the respective merits of deepening and widening, they address the equally important associated tradeoffs between exclusion and dilution; they point to the risks on the one hand of a Europe that excludes foreign goods, immigrants and entire countries and on the other of an unfocused definition of Europe.

that may dilute the very values that a European identity is intended to protect

**Citizenship and Collective Identity in Europe** Ireneusz Pawel Karolewski, 2009-12-04 This book is the first monograph to systematically explore the relationship between citizenship and collective identity in the European Union integrating two fields of research citizenship and collective identity Karolewski argues that various types of citizenship correlate with differing collective identities and demonstrates the link between citizenship and collective identity He constructs three generic models of citizenship including the republican the liberal and the caesarean citizenship to which he ascribes types of collective identity Using a multidisciplinary approach the book integrates concepts theories and empirical findings from sociology in the field of citizenship research social psychology in the field of collective identity legal studies in the chapter on the European Charter of Fundamental Rights security studies in the chapter on the politics of insecurity and philosophy in the chapter on pathologies of deliberation to examine the current trends of European citizenship and European identity politics This book will be of interest to students and scholars of European politics political theory political philosophy sociology and social psychology
