Reforming Europe Constantine Arvanitopoulos, 2010-04-06 In the 2009 elections the European centre right emerged victorious thus affirming its political domination in contemporary European politics The aim of this book is not to provide an analysis of the factors that contributed to the EPP's political prevalence Instead it is to help this large political family maintain its vigour of political thought and policy prescriptions The book provides a forum for prominent centre right thinkers to debate the major European problems of our times with particular emphasis on the management of the financial crisis and the next institutional steps regarding the European integration project It assembles the views of politicians academics and think tank fellows from different national backgrounds and dissimilar ideological perspectives who unfold their vision for Europe's future Overall the book attempts to both highlight and stimulate the centre right contribution to the discussion of Europe's main contemporary challenges

Religion and Democratization Michael D. Driessen, 2014-04-15 Religion and Democratization is a comparative study of democratization in Muslim and Catholic societies It explores the nature and impact of religiously friendly democratization processes which institutionally favor a religion of state and allow religious political parties to contest elections The book argues that religiously friendly democratization transforms both the democratic politics and religious life of society The book explains this transformation by modeling the effects of religiously friendly democratization on the political goals of religious leaders and the political salience of religious identities In a religiously charged national setting religiously friendly democratization can generate more support for democracy among religious actors By embedding religious ideas and values into its institutions however religiously friendly democratization also impacts national religious markets creating more favorable conditions for the emergence of public religions and altering trajectories of religious life In making these arguments the book draws on and advances recent scholarship from political science sociology and philosophy on the relationship between religion and state in contemporary democracies It engages empirical debates about global patterns of secularization and religious belief normative debates about the role of public religions in post secular societies and theoretical debates about the democratic future of political Islam and political Catholicism The book anchors its theoretical claims in case studies of Italy and Algeria integrating original qualitative

evidence and statistical data on voters political and religious attitudes It also compares the dynamics of religiously friendly democratization across the Muslim world today in Tunisia Morocco Turkey and Indonesia Finally the book examines the theory s wider relevance through a statistical analysis of cross national data on democracy religiosity and religion state relationships

[Social Catholicism for the Twenty-first Century?--Volume 2](#) William F. Murphy,2024-09-19 This rich collection of essays by distinguished scholars from across the globe can be read as sketching key steps on the path toward working in solidarity to build a future worthy of the human family through a new social Catholicism These steps include a contemporary renewal of Christian humanism and of human rights while learning to live as authentic Christian witnesses in pluralistic societies after the end of Christendom They will also include working for a just and sustainable economic paradigm becoming missionary disciples with a continual orientation toward the marginalized and overcoming the plague of racism by working to build a constitutional democracy for every citizen This societal renewal will require fostering robust movements of social Catholicism apt for our age within which Catholics will pursue the Universal Call to Holiness through living their earthly vocations in a spirit of social friendship They will creatively employ social media to foster apostolates extending beyond borders In an age of dark clouds threatening dystopia a new social Catholicism will require a reinvigorated pastoral leadership that has come to appreciate the dangers of populism and the need to instead foster solidarity and incarnate Christian charity through a better kind of politics

Interrupting Capitalism Matthew A. Shadle,2018-06-08 In the decade since the financial crisis of 2008 governments around the world have struggled to develop strategies to stabilize precarious markets encourage growth and combat mounting wealth inequality In the United States the recovery from that crisis has exacerbated the fears of the working and middle classes and pitted those classes against the wealthy Although we participate every day in economic life as workers consumers employers or activists we often experience the economy as a mysterious force that we cannot control or fully understand Matthew Shadle argues that Catholics ought to be able to draw on their faith to help navigate and make sense of economic life but too often the effort to get ahead or just stay afloat drowns out faith s appeal Interrupting Capitalism proposes a new strategy for Christian economic discipleship Rather than engage the two theological

poles of continuity and rupture Christians should interrupt capitalism neither whole heartedly endorsing global capitalism nor seeking to dismantle it This means breaking into the economy embracing those aspects that enhance human well being while transforming the market in a spirit of solidarity Shadle argues that all three of the dominant theological approaches dealing with economic life the progressive neoconservative and liberationist are theologies of continuity A fourth approach a communitarian one he believes can best embody the strategy of interrupting capitalism The Catholic tradition including its tradition of social teaching provides a cultural structure that along with their own social context conditions how Catholics think about and engage in economic activity Drawing on the resources of the tradition theologians reflect on this activity giving it a theoretical justification and offering correctives Both the experience of ordinary Catholics and the work of theologians feed into new articulations of Catholic social teaching Offering an overview of Catholic thought since the Second World War Shadle begins with the experience of Catholics in Western Europe at mid century moving to Latin America and the United States in the 1970s and 80s and then concluding with the phenomenon of globalization

Religious Statecraft Mohammad Ayatollahi Tabaar, 2018-05-08 Since the 1979 revolution scholars and policy makers alike have tended to see Iranian political actors as religiously driven dedicated to overturning the international order in line with a theologically prescribed outlook This provocative book argues that such views have the link between religious ideology and political order in Iran backwards Religious Statecraft examines the politics of Islam rather than political Islam to achieve a new understanding of Iranian politics and its ideological contradictions Mohammad Ayatollahi Tabaar traces half a century of shifting Islamist doctrines against the backdrop of Iran s factional and international politics demonstrating that religious narratives in Iran can change rapidly frequently and dramatically in accordance with elites threat perceptions He argues that the Islamists gambit to capture the state depended on attaining a monopoly over the use of religious narratives Tabaar explains how competing political actors strategically develop and deploy Shi a inspired ideologies to gain credibility constrain

political rivals and raise mass support He also challenges readers to rethink conventional wisdom regarding the revolution Ayatollah Khomeini the U S embassy hostage crisis the Iran Iraq War the Green Movement nuclear politics and U S Iran relations Based on a micro level analysis of postrevolutionary Iranian media and recently declassified documents as well as theological journals and political memoirs Religious Statecraft constructs a new picture of Iranian politics in which power drives Islamist ideology

Christian Democratic Parties in Europe Since the End of the Cold War Steven Van Hecke, Emmanuel Gerard, 2004 The period since the end of the Cold War has been characterised by an acceleration in the European integration process a changing pattern of political ideologies and the emergence of new political parties and issues This book assesses the impact of these phenomena on Christian Democratic parties in the current and future member states of the European Union and highlights some of the particularities and universalities of European Christian Democracy from a comparative and transnational perspective Political scientists and historians from various universities examine the way in which Christian Democratic parties have responded to these challenges for instance by a rapprochement with non Christian Democrats and explain how those responses have resulted in failure in some cases and success in others

Western Europe's Democratic Age Martin Conway, 2022-06-14 A major new history of how democracy became the dominant political force in Europe in the second half of the twentieth century What happened in the years following World War II to create a democratic revolution in the western half of Europe In *Western Europe's Democratic Age* Martin Conway provides an innovative new account of how a stable durable and remarkably uniform model of parliamentary democracy emerged in Western Europe and how this democratic ascendancy held fast until the latter decades of the twentieth century Drawing on a wide range of sources Conway describes how Western Europe's postwar democratic order was built by elite intellectual and popular forces Much more than the consequence of the defeat of fascism and the rejection of Communism this democratic order rested on universal male and female suffrage but also on new forms of state authority and new political forces primarily Christian and social democratic that espoused democratic values Above all it gained the support of the people for whom democracy provided a new model of citizenship that reflected the aspirations of a more prosperous society This democratic order did not however endure Its hierarchies of class gender and race which initially gave it its strength as well as the strains of decolonization and social change led to an explosion of demands for greater democratic freedoms in the 1960s and to the much more contested democratic politics of Europe in the late twentieth century *Western Europe's Democratic Age* is a compelling history that sheds new light not only on the past of European democracy but also on the unresolved question of its future

Sacred and Secular Pippa Norris, Ronald Inglehart, 2011-10-17 This book develops a theory of existential security It demonstrates that the publics of virtually all advanced industrial societies have been moving toward more secular orientations during the past half century but also that the world as a whole now has more people with traditional religious views than ever before This second edition expands the theory and provides new and updated evidence

from a broad perspective and in a wide range of countries This confirms that religiosity persists most strongly among vulnerable populations especially in poorer nations and in failed states Conversely a systematic erosion of religious practices values and beliefs has occurred among the more prosperous strata in rich nations

The Project-State and Its Rivals

Charles S. Maier, 2023-05-16 A new and original history of the forces that shaped the twentieth and twenty first centuries We thought we knew the story of the twentieth century For many in the West after the two world conflicts and the long cold war the verdict was clear democratic values had prevailed over dictatorship But if the twentieth century meant the triumph of liberalism as many intellectuals proclaimed why have the era s darker impulses ethnic nationalism racist violence and populist authoritarianism revived The Project State and Its Rivals offers a radical alternative interpretation that takes us from the transforming challenges of the world wars to our own time Instead of the traditional narrative of domestic politics and international relations Charles S Maier looks to the political and economic impulses that propelled societies through a century when territorial states and transnational forces both claimed power engaging sometimes as rivals and sometimes as allies Maier focuses on recurring institutional constellations project states including both democracies and dictatorships that sought not just to retain power but to transform their societies new forms of imperial domination global networks of finance and the international associations foundations and NGOs that tried to shape public life through allegedly apolitical appeals to science and ethics In this account which draws on the author s studies over half a century Maier invites a rethinking of the long twentieth century His history of state entanglements with capital the decline of public projects and the fragility of governance explains the fraying of our own civic culture but also allows hope for its recovery

When Victory Is Not an Option Nathan J. Brown, 2012-03-15 Throughout the Arab world Islamist political movements are joining the electoral process This change alarms some observers and excites others In recent years electoral opportunities have opened and Islamist movements have seized them But those opportunities while real have also been sharply circumscribed Elections may be freer but they are not fair The opposition can run but it generally cannot win

Semiauthoritarian conditions prevail in much of the Arab world even in the wake of the Arab Spring How do Islamist movements change when they plunge into freer but unfair elections How do their organizations such as the Muslim Brotherhood and structures evolve What happens to their core ideological principles And how might their increased involvement affect the political system In *When Victory Is Not an Option* Nathan J Brown addresses these questions by focusing on Islamist movements in Egypt Jordan Kuwait and Palestine He shows that uncertain benefits lead to uncertain changes Islamists do adapt their organizations and their ideologies do bend some But leaders almost always preserve a line of retreat in case the political opening fizzles or fails to deliver what they wish The result is a cat and mouse game between dominant regimes and wily movements There are possibilities for more significant changes but to date they remain only possibilities
