European Dimensions Education Training And The European Union:

European Dimensions John Field, 1998 Field addresses the European Union's desire for a unified approach to education and its content exploring the origin of this interest the tensions that underlie the policies and its impact at national level

Implementing European Union Education and Training Policy D. Phillips, H. Ertl, 2007-05-08 The papers which make up this volume have for the most part emerged from the work of a team of young researchers based for varying periods at the Department of Educational Studies of the University of Oxford as part of an international network funded by the European Union The network known as PRESTiGE Problems of Educational Standardisation and Transition in a Global Environment involves teams at six European universities each of which can only employ young researchers from Member States other than that in which it is situated The Oxford part of PRESTiGE has been concerned with the interpretation transmission and implementation of European Union education and training policy in four Member States France Germany Sweden and the United Kingdom As the leader of the Oxford team I had the good fortune to work with young researchers from Denmark Germany Greece Sweden and Portugal Their work is included here So too are contributions from Jake Murdoch a member of the Dijon team based at the Universit de Bourgogne and Professor Antonio Novoa the leader of the Lisbon team Together the papers which we have allowed to overlap to some extent so that each one can be read independently represent a genuinely international collaborative effort to understand the intentions and the effects of EU education and training policy and we hope that they will contribute to further discussion of the important issues that those with an interest in European co operation and development will wish to pursue

Education and Solidarity in the European Union Sarah K. St. John, 2020-12-19 This book tells the story of the European Movement's mission to create through education a European spirit in order to secure the success of European integration This book draws links between the crisis of solidarity experienced by the European Union today and the difficulties faced throughout European integration to develop a fully fledged EU education policy It makes the case that education has not been a stable mechanism for fostering spirit due to its national attachment to identity and nation building Without education it has been difficult to foster the spirit needed to establish a strong citizen wide sense of European solidarity to overcome the crises the EU faces today Exploring the connection between education and solidarity through the notion of spirit the book presents an interdisciplinary study that avoids the compartmentalisation of education studies philosophy and political science to bring ideas together that shed fresh light on contemporary debates currently under the spotlight

Education and Public Policy in the European Union Sarah K. St. John, Mark Murphy, 2019-02-12 This book fleshes out activities and initiatives in the field of education from across areas of European Union competence in order to highlight the extent to which education and training have penetrated the European Community's policymaking since its creation Policies are all too often placed in their individual silos which can sometimes work against deeper understanding of policymaking and its reach across policy domains This project avoids such compartmentalisation

and instead crosses boundaries to explore education's relationship with other policy areas as well as its far reaching role in the construction of a united Europe It demonstrates education's significance across the broad landscape of European integration by presenting a collection of case studies which represent policy areas that have experienced the infiltration of education These include Migration Health Agriculture Multilingualism Media and Communications and the environment

Ideas and European Education Policy, 1973-2020 Marina Cino Pagliarello, 2022-04-26 This book analyses the transformation of European Education Policy from 1973 to 2020 In doing so it offers a unique insight into the changes of European education from a predominantly national concern to a supranational policy framework driven by an economic discourse concerning productivity and employability The book shows that the idea of the Europe of Knowledge did not originate in the Lisbon Strategy of 2000 but rather was the result of a gradual development that started in the mid 1980s This begun with the establishment of a specific problem definition of education as a solution for Europe's lack of competitiveness a definition that was incrementally constructed by the European Commission and the European business community Highlighting significant and unexplored questions such as the role of European transnational business in education and the role of the problem entrepreneur in defining policy issues this book will provide a comprehensive perspective on European Education Policy that will be of interest to all students of European Politics Education Policy and Public Policy

European Social Fund and the EU Jacky Brine, 2002-04-23 The European Social Fund has often been overshadowed by more visible European Union social and economic policies It is however integral to the construction and development of the EU and has played a central role in the impact of the EU on individual member states Based upon a study of the ESF and a range of social policy documents from the Treaty of Rome to the Treaty of Amsterdam this analysis examines the connections between the ESF and other areas of EU policy The European Social Fund and the EU will be of particular use to anyone interested in social and economic regeneration across the European Union

The Making of the European Union Max Haller, 2012-12-06 Outstanding social scientists economists sociologists political scientists and policy researchers discuss in this book the issue of the social aspects of European integration For each field they sketch out the main problems provide a survey on the relevant literature and point to areas wherein more research is needed The science and research policy of the European Union is examined critically both in terms of relevant social issues and in terms of its organizational efficacy

Kazamias, 2009-08-22 A big project like this Handbook means that you incur debts and not only to your authors and your publisher As editors we along with our colleague Elaine Unterhalter who edited the section on postcolonialism would like to thank most warmly those authors who delivered on time and who did not fuss but just got on and did a r rate job We would also like to thank all authors who did deliver which was almost everyone we asked We know that some of our authors worked in very dif cult private circumstances as they were nishing their chapters and we hope the publication of the Volumes will later be for them a happy reminder of dif culties and disasters overcome The only sad theme is that some very close colleagues with whom we were wo ing and for whom we had the greatest respect and liking became very ill and died while the volumes were being prepared We decided to ask for copyright permissions to publish something of theirs These permissions were graciously given by two major journals and with the agreement also of our publishers Springer Rolland Paulston and Terry McLaughlin have examples of their writing in this Handbook *Progress Toward Agenda 2030* Danielle Lane, Nicholas Catania, Sarah Semon, 2023-09-20 At the midway point towards the United Nations UN Agenda 2030 this critical volume focuses on how a range of contextually diverse countries are progressing towards inclusive education Contributors critically consider the current state of inclusive education in their own countries in relation to meeting the UN s Agenda 2030 initiative and Sustainable Development Goal 4 The foundation is set in chapter one by the editors with a historical overview of inclusion and inclusive policies globally Key international scholars critique the history and status of inclusion in their respective contexts In reference to local research they explore the history of inclusion the current policies and state of inclusion barriers and levers for inclusion and look towards the future of inclusive education Chapters demonstrate how the continued call for a shift towards inclusive education in different countries is extremely complex and varies greatly within each international context Attention is given to levers promoting inclusion through contextually appropriate international initiatives and the importance of the realignment of policies and practices if all countries are to achieve the 2030 UN s education goal Progress Toward Agenda 2030 serves to challenge all educational stakeholders to critically consider analyze and innovate policies and practices for inclusive education for all by 2030 **Homo Sapiens Europæus** Michael Kuhn, Ronald G. Sultana, 2006 In many ways education mirrors society by reflecting changing and emergent goals and values as well as by contributing to both the reproduction and production of particular life forms In the context of the formative project Europe education is called upon to play an increasingly central role one that is responsive to particular images of the European Union and to its aspirations and goals The widespread conviction is that education and training will re invigorate ailing economies and that in the context of globalization national and regional competitiveness will only prevail if there is a qualitative continued improvement in human capital This volume critically examines such claims
