**Faith, the Fount of Exegesis** Ignacio Carbajosa,2013-11-17 This book is a response to a desire expressed by the then Cardinal Joseph Ratzinger the future Pope Benedict XVI who called for a diachronic study of the results of the historical critical method The study of the last 150 200 years of biblical research shows how the claim to scientific rigor made in many works that is the claim to have obtained results comparable in their certainty to those of the natural sciences is clearly unrealistic This is a comprehensive analysis of the results of almost two centuries of the historical critical method in two areas the investigation into the sources of the Pentateuch and the study of the figure of the prophet It reveals the philosophical and cultural presuppositions which influenced the development of exegesis and it s

most notable hypotheses demonstrating the world of prejudices which frequently have conditioned the exegesis called scientific. It also engages the characteristic dimensions of the Catholic interpretation of the Old Testament attempting to unify the two basic dimensions of the exegetical method: history and theology. Overcoming the disconnect between scientific exegesis and believing theology is one of the great contemporary challenges to the *intellectus fidei*. This dualism cannot be overcome simply by a call to greater devotion or the generous intention of adding pious commentary to an exegesis which has not from the beginning been based on faith. This book provides a positive contribution to the hermeneutical problem at the heart of current exegetical debate: the status of exegesis addressing such questions as: Does exegesis have a theological character? Should it have one? If it does have one, would it not then lose its scientific character? Thus one arrives at the main question: how can one conceive of an exegesis that is at the same time critical and theological? How can faith be the foundation of exegesis from the beginning? Could Faith really be the Fount of Exegesis?

**Biblical Hermeneutics** Duncan S. Ferguson, 2016-08-16 This sensible, balanced work provides a clear overview of biblical hermeneutics: its history, method, and implementation. Ferguson combines several topics not usually found in a single volume: crucial theological issues and historical philological questions; the complexities of interpreting the various types of biblical literature; ways to use the Bible in the life of the church; and examples of how the Bible has been and is interpreted. A comprehensive survey, *Biblical Hermeneutics* covers the field with an openness of perspective. Ferguson's well-organized introduction is an impressive resource for understanding and performing the task of biblical interpretation.

*Catholicism and the Great War* Patrick J. Houlihan, 2015-04-16 This transnational comparative history of Catholic everyday religion in Germany and Austria-Hungary during the Great War transforms our understanding of the war's cultural legacy. Challenging master narratives of secularization and modernism, Houlihan reveals that Catholics from the losing powers had personal and collective religious experiences that revise the decline and fall stories of church and state during wartime. Focusing on private theologies and lived religion, Houlihan explores how believers adjusted to industrial warfare. Giving voice to previously marginalized historical actors including soldiers as well as women and children on the home front, he creates a family history of Catholic religion supplementing studies of the clergy and bishops. His findings shed new light on the diversity of faith in this period and how specifically Catholic forms of belief and practice enabled people from the losing powers to cope with the war much more successfully than previous cultural histories have led us to believe.

History and the Christian Ronald Wells, 1998-09-17 This volume arises out of special concerns of historians who are also Christians. What case can be made for connecting historical work and religious convictions? What is the relation of faith to history? What difference could Christian perspectives make in historical study? Thirteen respected scholars, including some who have changed the face of history writing in the twentieth century, here take up a diversity of subjects in giving a provisional answer to these important questions. In exploring foundational issues of perspective and theory, engaging discrete themes such as feminism, puritanism,

and missiology and discussing the application of religious insights in teaching history this excellent collection of essays forthrightly addresses the epistemological crisis brought on by the postmodern critique of truth and demonstrates the positive implications of a Christian perspective for the study of history and historiography      **Encyclopedia of Christianity** John Bowden, 2005 Presents a collection of alphabetically arranged articles related to Christianity covering its history events and important figures and individuals Includes maps charts and illustrations      **Models for Christian Higher Education** Richard Thomas Hughes, William B. Adrian, 1997 This is a print on demand book and is therefore non returnable This timely look at the state of Christian higher education in America contains descriptive historical narratives that explore how fourteen Christian colleges and universities are successfully integrating faith and learning on their campuses despite the challenges posed by the increasingly pluralistic nature of modern culture Written by respected representatives from seven major faith traditions Roman Catholic Lutheran Reformed Mennonite Evangelical Wesleyan Holiness and Baptist Restorationist these narratives are also preceded by introductory essays that define the worldview and theological heritage of each given tradition and ask what that tradition can contribute to the task of higher education      *Already Compromised* Dr. Greg Hall, Steve Ham, Todd Hillard, 2011-05-01 Will a Christian college build a student's faith or tear it down Parents and students sacrifice large sums of money for a Christian college education Why They are purchasing a guarantee their child's faith in God and the Bible will be guarded and developed But is the Bible being taught Will they graduate believing in the inerrancy of Scripture the Flood of Noah's Day and a literal six day creation Apologetics powerhouse Ken Ham and Dr Greg Hall reveal an eye opening assessment of 200 Christian colleges and universities In an unprecedented 2010 study by America Research Group college presidents religion and science department heads were polled on critical areas of Scripture and core faith questions Ken Ham is an accomplished author of some of the most popular and effective apologetics research on the market He is the founder of Answers in Genesis U S and the president of the Creation Museum I have no doubt that the average church member would be shocked and outraged to discover how many supposedly evangelical colleges and universities have more or less given up their commitment to biblical inerrancy and the authority of Scripture especially when dealing with the early chapters of Genesis I'm grateful for this important work by Ken Ham and Greg Hall documenting the many compromises that have ravaged the Christian academy *Already Compromised* is a much needed wake up call and a summons to arms for faithful courageous Bible believers We need to stand up declare our faith and defend the truth of Scripture courageously The stakes are high and the battle may be more fierce than ever but God will bless those who honor His Word May He bless us with clear unwavering voices John MacArthur      **The Christian Work and the Evangelist**, 1904      *For the Glory of God* Richard H. Jones, 2012-06-07 *For the Glory of God* addresses key questions regarding the connection between religion and science Richard H Jones investigates whether ideas from the Bible and Christian theology have played a significant role in the development of modern scientific theories If so has the role always been positive or negative In this

regard does religion have the epistemic right to control science or to offer an alternative Christian science to mainstream science Is creationism or intelligent design a science on the same footing with neo Darwinism Is the integrity of science today in danger of religious control In this volume Jones provides an illuminating history of the role of Christian ideas in the physical and biological sciences from the Middle Ages to today He reveals the failure of the popular war and harmony models for the relation of religion and science and shows that a control model does work to explain the complex history of religion and science
