First Day Of Winter:

The First Day in Norway James Daniel, 2023-12-28 The First Day in Norway is an evocative narrative that transports readers into the intimate and transformative moments of the writer and his family's arrival in Norway in December 2019. Set against the enchanting backdrop of winter with the landscape draped in snow and the air filled with the festive spirit of Christmas, the book unfolds as a personal chronicle of new beginnings. Through rich and vivid descriptions, the writer captures the sensory tapestry of our first day, from the crisp winter air to the magical ambiance of Christmas in a new land. Readers are invited to witness the family's initial experiences, from stepping onto Norwegian soil to navigating the cultural nuances of our surroundings. The narrative goes beyond mere observation, delving into the emotional nuances of adaptation and the awe-inspiring moments that characterize the first day in a foreign country. The writer skilfully weaves together the sights, sounds, and emotions, creating a literary canvas that paints a picture of discovery and connection. As the family navigates the unique challenges and joys of this momentous day, The First Day in Norway becomes more than a recounting of events; it becomes a heartfelt exploration of the human experience in the face of change and the beauty of embracing a new life, especially during the enchanting winter and Christmas season in Norway. *Resurrection Machines* Kyle

Weyburne, 2023-07-13 Pyramids had a specific function, and this book endeavours to detail exactly how and when they operated. Pharaoh Khufu built what probably stands as the greatest ever construction that humans have produced, given the tech constraints of the time: the Great Pyramid. Its accuracy and size are just awe-inspiring; it was the tallest building in the World until the Cathedrals of Europe arrived on the scene. According to ancient historians, though Khufu was never buried there, and when the Arabs first broke in to the upper chambers in 820 AD, they found the sarcophagus empty. It had been ceremonially sealed without the king inside. Are we expected to believe that they built the World's greatest ever construction as a tomb, then sealed it forever, but without the body of the king? Isn't that a little odd? The reality is it was meant for something much greater than his tomb. What purpose does such a grand resting place for your body really fulfil? It appeases the ego of the living king, but thereafter it achieves nothing. A hole in the ground can preserve the body just as well, and in fact, it probably has for that, since where most believe Khufu was buried is an as yet undiscovered shaft tomb. Very unceremonious for someone who had such a magnificent structure built. Khufu's father was King Snefru; he built the World's two tallest buildings at the time. We could reason that one was to be his tomb, but then what was the other one for? The forgotten story of the pyramids is that they were principally built for the king's Heb Sed festival, the most important event in his lifetime, should he live long enough to perform it. He had to wait 30 years before he could participate in this magical ceremony, so he spent 20 odd years building a structure that was vital for its success. After 30 years at the helm, the king was supposed to be ritually killed. Heb Sed enabled him to avoid this dire fate. His reign would be extended if he passed the rigorous tests involved in the ceremonies, but not only that, he would also become a living incarnation of the Sun god. This ensured that he would live on for

all eternity Pyramids weren't built for vanity instead they were vital mechanisms for achieving these ends and so every king in the Old Kingdom constructed a pyramid to facilitate his immortality This is the third and final book in the series to be read after *Architecture of Ra and Tombs of the Gods* **Heavenly Numbers** Christopher Cullen, 2017-11-17 This book is a history of the development of mathematical astronomy in China from the late third century BCE to the early 3rd century CE a period often referred to as early imperial China It narrates the changes in ways of understanding the movements of the heavens and the heavenly bodies that took place during those four and a half centuries and tells the stories of the institutions and individuals involved in those changes It gives clear explanations of technical practice in observation instrumentation and calculation and the steady accumulation of data over many years but it centres on the activity of the individual human beings who observed the heavens recorded what they saw and made calculations to analyse and eventually make predictions about the motions of the celestial bodies It is these individuals their observations their calculations and the words they left to us that provide the narrative thread that runs through this work Throughout the book the author gives clear translations of original material that allow the reader direct access to what the people in this book said about themselves and what they tried to do
