First Human The Race To Discover Our Earliest Ancestors:

The First Human Ann Gibbons, 2007-04-10 In this dynamic account award winning science writer Ann Gibbons chronicles an extraordinary quest to answer the most primal of questions When and where was the dawn of humankind Following four intensely competitive international teams of scientists in a heated race to find the missing link the fossil of the earliest human ancestor Gibbons ventures to Africa where she encounters a fascinating array of fossil hunters Tim White the irreverent Californian who discovered the partial skeleton of a primate that lived 4 4 million years ago in Ethiopia French paleontologist Michel Brunet who uncovers a skull in Chad that could date the beginnings of humankind to seven million years ago and two other groups one led by zoologist Meave Leakey the other by British geologist Martin Pickford and his French paleontologist partner Brigitte Senut who enter the race with landmark discoveries of their own Through scrupulous research and vivid first person reporting The First Human reveals the perils and the promises of fossil hunting on a grand competitive scale

The First Ethiopians Malvern van Wyk Smith, 2009-07-01 The First Ethiopians explores the images of Africa and Africans that evolved in ancient Egypt in classical Greece and imperial Rome in the early Mediterranean world and in the early domains of Christianity Inspired by curiosity regarding the origins of racism in southern Africa Malvern van Wyk Smith consulted a wide range of sources from rock art to classical travel writing from the pre Dynastic African beginnings of Egyptian and Nubian civilisations to Greek and Roman perceptions of Africa from Khoisan cultural expressions to early Christian conceptions of Africa and its people as demonic from Aristotelian climatology to medieval cartography and from the geo linguistic history of Africa to the most recent revelations regarding the genome profile of the continent s peoples His research led to a startling proposition Western racism has its roots in Africa itself notably in late New Kingdom Egypt as its ruling elites sought to distance Egyptian civilisation from its African origins Kushite Nubians founders of Napata and Mero who in the eighth century BCE furnished the black rulers of the twenty fifth Dynasty in Egypt adopted and adapted such Dynastic discriminations in order to differentiate their own superior Meroitic civilisation

from the world of other Ethiopians In due course archaic Greeks who began to arrive in the Nile Delta in the seventh century BCE internalised these distinctions in terms of Homer's identification of two Ethiopias an eastern and a western to create a racialised and racist discourse of worthy and savage Ethiopians Such conceptions would inspire virtually all subsequent Roman and early medieval thinking about Africa and Africans and become foundational in European thought The book concludes with a survey of the special place that Aksumite Ethiopia later Abyssinia has held in both European and African conceptual worlds as the site of worthy Ethiopia as well as in the wider context of discourses of ethnicity and race

God and the History of the Universe Jarvis Streeter, 2016-03-22 The popular belief that a scientific understanding of reality is incompatible with a Christian one is simply wrong Some Christian understandings of reality do conflict with some scientific understandings But a thoroughly rational Christian understanding of the origin and history of the universe will be informed by the best scientific theories and the facts founded on them This book weaves a narrative of the origin and history of the universe from the perspective of contemporary science with a Christian understanding of God and of God's role in the origin and history of the universe At the center of this integrated narrative is the view that God who is pure unbounded Love is Creator the zest for life in the universe comes from God and God is the source of Truth Beauty and Goodness in the universe God is amazed and delighted at what God and the world has created God is saddened by ways creatures have fallen short of pure unbounded Love Truth Beauty and Goodness and God's pure unbounded Love keeps on trying to persuade all creatures toward Truth Beauty and Goodness

Archaeology for the People John Cherry, Felipe Rojas, 2016-02-29 In 2014 the Joukowsky Institute for Archaeology and the Ancient World organized an international writing competition calling for accessible and engaging essays about any aspect of archaeology Nearly 150 submissions from over two dozen countries were received Archaeology for the People gathers the best of those entries Their diverse topics from the destruction of historic urban gardens in contemporary Istanbul to the fall of the ancient Maya city offer a taste of the global reach and relevance of archaeology Their main common trait however is that they prove that archaeology can offer much more to a general audience than Indiana Jones or aliens building pyramids All of the articles collected in this book combine sophisticated analysis of an exciting archaeological problem with prose geared at a non specialized audience This book also offers a series of reflections on how and why to engage in dialogues about archaeology with people who are not specialists These include a stunning photo essay that captures the challenges of life at an archaeological site in northern Sudan interviews with a number of leading archaeologists who have successfully written about archaeology for a broad public or who are actively engaged in practicing archaeology beyond academia and a discussion of the experience of teaching a Massive Open Online Course MOOC about archaeology to over 40 000 students This book should be of interest to anyone who has wondered how and why to write about archaeology for people other than archaeologists

Great Inventions that Changed the World James Wei, 2012-07-02 GREAT INVENTIONS THAT CHANGED THE WORLD Discover the inventions that have made our world what

it is today A great invention opens the door to a new era in human history The stone axe for example invented some 2 million years ago in East Africa enabled us to enter the human path of endless improvements through inventions The taming of fire enabled us to cook food as well as leave the warmth of Africa and move to the frigid lands of the North From the stone axe to the computer and the Internet this book provides a fascinating tour of the most important inventions and inventors throughout history You ll discover the landmark achievements and the men and women that made the world what it is today

Great Inventions That Changed the World is written by Professor James Wei a renowned educator and engineer who holds several patents for his own inventions Following an introductory chapter examining the role of inventors and inventions in fueling innovation and global advancement the book is organized to show how inventions are spurred by human needs and desires including Work Food clothing and housing Health and reproduction Security Transportation Information The good life As you progress through the book you ll not only learn about inventions and inventors but also the impact they have had on our lives and the society and environment in which we live today Inventions solve problems but as this book so expertly demonstrates they can also directly or indirectly create new problems as well from pollution to global warming to bioterrorism By enabling us to understand the impact of inventions throughout history this book can help guide the next generation of citizens decision makers and inventors

Archaeology Matters Jeremy A Sabloff,2016-06-16 Archaeology is perceived to study the people of long ago and far away How could archaeology matter in the modern world Well known archaeologist Jeremy Sabloff points to ways in which archaeology might be important to the understanding and amelioration of contemporary problems Though archaeologists have commonly been associated with efforts to uncover cultural identity to restore the past of underrepresented peoples and to preserve historical sites their knowledge and skills can be used in many other ways Archaeologists help Peruvian farmers increase crop yields aid city planners in reducing landfills and guide local communities in tourism development and water management This brief volume aimed at students and other prospective archaeologists challenges the field to go beyond merely understanding the past and actively engage in making a difference in the today s world

The ^AWorld from Beginnings to 4000 BCE Ian Tattersall,2008-02-01 In this lively and readable introduction renowned anthropologist Ian Tattersall thoroughly examines both fossil and archaeological records to trace human evolution from the earliest beginnings of our zoological family Hominidae through the appearance of Homo sapiens to the Agricultural Revolution

Coming Climate Crisis? Claire L. Parkinson,2010-04-16 Decisively cutting through the hyperbole on both sides of the debate distinguished NASA climatologist Claire L Parkinson brings much needed balance and perspective to the highly contentious issue of climate change Offering a deeply knowledgeable overview of global conditions past and present the author lays out a compelling argument that our understandings and models are inadequate for confident predictions of the intended and unintended consequences of various projects now under consideration to modify future climate In one compact volume Parkinson presents a coherent synopsis of the 4 6 billion year history of climate change on

planet Earth both before and after humans became a significant factor and explores current concerns regarding continued global warming and its possible consequences She ranges over the massive geoengineering schemes being proposed and why we need to be cautious about them the limitations of current global climate models and projections the key arguments made by those skeptical of the mainstream views and the realistic ways we can lessen destructive human impacts on our planet While discussing all of these polarizing topics the author consistently shows respect for the views of alarmists skeptics and the vast majority of people whose positions lie somewhere between those two extremes The book clarifies some of the most contentious points in the climate debate and in the process treats us to a fascinating discussion interweaving Earth history science the history of science and human nature Readers will be rewarded with a genuine understanding of a complex issue that could be among the most important facing humankind in the coming decades **The Evolution of the Human Head**

Daniel Lieberman,2011-01-03 Exhaustively researched and years in the making this innovative book documents how the many components of the head function how they evolved since we diverged from the apes and how they interact in diverse ways both functionally and developmentally causing them to be highly integrated This integration not only permits the head s many units to accommodate each other as they grow and work but also facilitates evolutionary change Lieberman shows how when and why the major transformations evident in the evolution of the human head occurred The special way the head is integrated Lieberman argues made it possible for a few developmental shifts to have had widespread effects on craniofacial growth yet still permit the head to function exquisitely **Why Evolution is True** Jerry A. Coyne,2010-01-14 For all the

discussion in the media about creationism and Intelligent Design virtually nothing has been said about the evidence in question the evidence for evolution by natural selection Yet as this succinct and important book shows that evidence is vast varied and magnificent and drawn from many disparate fields of science The very latest research is uncovering a stream of evidence revealing evolution in action from the actual observation of a species splitting into two to new fossil discoveries to the deciphering of the evidence stored in our genome Why Evolution is True weaves together the many threads of modern work in genetics palaeontology geology molecular biology anatomy and development to demonstrate the indelible stamp of the processes first proposed by Darwin It is a crisp lucid and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution **The Double X Economy** Linda Scott,2020-07-21 Winner of the 2020 Porchlight

Business Book of the Year Award One of The Guardian s Best Books of 2020 Finalist for the 2020 Royal Science Society Book Prize and the 2020 Porchlight Business Book Awards Longlisted for the 2020 Financial Times husbands burning brides whose dowries have been spent men appropriating women s earnings and widows land banks discriminating against women applying for loans corporations paying women less than men men treating women as their intellectual inferiors due to primitive notions of female brain development governments depriving women of affordable childcare and so much more As Scott takes us from the streets of Accra where sex trafficking is widespread to American business schools where women are

routinely patronized the pervasiveness of the Double X Economy becomes glaringly obvious But Scott believes that this rampant problem can be solved She proposes concrete actions and urges her readers to rise up and join the global movement for women s economic empowerment that is gaining momentum by the day

The Other Side of the Scopes Monkey Trial Jerry Bergman,2023-10-26 The enormous amount of literature on the Scopes Trial focuses on the religious elements of the trial It almost totally ignored the importance of racism as taught in the text that Scopes used to teach biology Bryan was not concerned about evolution in general but specifically human evolution He believed that Darwin s theory as applied to humans encouraged the oppression of certain oppressed groups Taking evolution s philosophy to its logical conclusion meant justifying survival of the fittest in social matters This philosophy he learned from his extensive reading about WWI was a major factor influencing the Germans to fight in the first World War Furthermore Bryan believed the citizens of Tennessee had a right to determine what their children were taught in the public schools Another fact that is rarely mentioned is the main fossil evidence cited in the trial documents and the press in support of human evolution has been discredited by evolutionists including Neanderthal man Piltdown man Java man and Nebraska man Scopes was not a biology teacher but rather taught math His college degree was not in biology but law He was not put on the stand to testify in his trial probably because he never taught evolution and could not honestly answer questions about teaching it This book covers the so called trial of the century telling the real story of a sham brought on by the ACLU to further their political and anti Christian goals

The Challenges of Health Disparities Darren Liu,Betty Burston,Shartriya C. Stewart,Heidi H. Mulligan,2018-09-12 This unique text explores health disparities in the United States and their implications from the perspective of a health care administration The book begins with a broad overview of health disparities including definitions from local state and federal legislation as well as alternative definitions The authors examine current and past frameworks of analysis regarding the causes of disparities and provide a statistical overview of death rates and their implications for health care administrators In the final section of the book each chapter looks at health disparities within each type of health care environment such as physician practices hospitals pharmaceutical products Medicare Medicaid long term care insurance markets and more

The Accidental Homo Sapiens Ian Tattersall,Robert DeSalle,2019-04-02 What happens now that human population has outpaced biological natural selection Two leading scientists reveal how we became who we are and what we might become When we think of evolution the image that likely comes to mind is the iconic straight forward image of a primate morphing into a human being Yet random events have played huge roles in determining the evolutionary histories of everything from lobsters to humans However random genetic novelties are most likely to stick in small populations It is mathematically unlikely to happen in large ones With our enormous and seemingly inexorably expanding population humanity has fallen under the influence of the famous or infamous bell curve This revelatory new book explores what the future of our species could hold while simultaneously revealing what we didn t become and what we won t become A cognitively unique species

our actions fall on a bell curve as well Individuals may be saintly or evil narrow minded or visionary But it is possible not just for the species but for a person to be all of these things even in a single day We all fall somewhere within the giant hyperspace of the human condition that these curves describe The Accidental Homo Sapiens shows readers that though humanity now exists on this bell curve we are far from a stagnant species Tattersall and DeSalle reveal how biological evolution in modern humans has given way to a cultural dynamic that is unlike anything else the Earth has ever witnessed and that will keep life interesting perhaps sometimes too interesting for as long as we exist on this planet **Read**

Robinson,Sarah M.

Robinson,2015-07-15 It has long been held that humans need government to impose social order on a chaotic dangerous world How then did early humans survive on the Serengeti Plain surrounded by faster stronger and bigger predators in a harsh and forbidding environment Pirates Prisoners and Lepers examines an array of natural experiments and accidents of human history to explore the fundamental nature of how human beings act when beyond the scope of the law Pirates of the 1700s the leper colony on Molokai Island prisoners of the Nazis hippie communes of the 1970s shipwreck and plane crash survivors and many more diverse groups they all existed in the absence of formal rules punishments and hierarchies Paul and Sarah Robinson draw on these real life stories to suggest that humans are predisposed to be cooperative within limits What these communities did and how they managed have dramatic implications for shaping our modern institutions Should today s criminal justice system build on people s shared intuitions about justice Or are we better off acknowledging this aspect of human nature but using law to temper it Knowing the true nature of our human character and our innate ideas about justice offers a roadmap to a better society **The Readers' Advisory Guide to Nonfiction** Neal Wyatt,2007-05-14 Navigating what
