Åström,2023-02-07 Although single fathers as primary careers are on the rise most single parent households in the US are headed by women These women are a lucrative market for parenting books and most of these books are aimed at single mothers raising sons This intersectional study analyses the way in which these advice books draw on mother blame language misconceptions of neuropsychological research and traditional conceptualisations of masculinity and femininity to convince the mother readers that they are unable to raise a son to be a man The study further connects the advice books to a cultural

backlash against ideas of involved fatherhood and caring masculinity exploring how the authors argue for a return to traditional family structures
