

First Of The Antarctic

Hugh Chrisholm

First Of The Antarctic:

Pilgrims on the Ice T. H. Baughman, 1999-01-01 Robert Falcon Scott's 1901-4 expedition to the Antarctic was a landmark event in the history of Antarctic exploration and created a sensation comparable to the Arctic efforts of the American Robert E Peary Scott's initial expedition was also the first step toward the dramatic race to the South Pole in 1912 that resulted in the tragic deaths of Scott and his companions Since then Scott's reputation has vacillated between two extremes Was he a martyred hero the beau ideal of a brave and selfless explorer or a bumbling fool whose mistakes killed him and his entire party In this work Antarctic historian T H Baughman goes beyond the personality of Scott to remove the first expedition from the shadow of the second to study objectively its purpose its composition and its real accomplishments

Slicing the Silence Tom Griffiths, 2007 The author reflects on his experiences exploring Antarctica the last true wilderness **Encyclopedia of the Antarctic** Beau Riffenburgh, 2007 Publisher description **Anthropocene Antarctica** Elizabeth Leane, Jeffrey McGee, 2019-10-02 Anthropocene Antarctica offers new ways of thinking about the Continent for Science and Peace in a time of planetary environmental change In the Anthropocene Antarctica has become central to the

Earth's future Ice cores taken from its interior reveal the deep environmental history of the planet and warming ocean currents are ominously destabilising the glaciers around its edges presaging sea level rise in decades and centuries to come. At the same time proliferating research stations and tourist numbers challenge stereotypes of the continent as the last wilderness. The Anthropocene brings Antarctica nearer in thought entangled with our everyday actions. If the Anthropocene signals the end of the idea of Nature as separate from humans then the Antarctic long considered the material embodiment of this idea faces a radical reframing. Understanding the southern polar region in the twenty first century requires contributions across the disciplinary spectrum. This collection paves the way for researchers in the Environmental Humanities Law and Social Sciences to engage critically with the Antarctic fostering a community of scholars who can act with natural scientists to address the globally significant environmental issues that face this vitally important part of the planet.

Antarctica David Day, 2013-05-03. Since the first sailing ships spied the Antarctic coastline in 1820 the frozen continent has captured the world's imagination. David Day's brilliant biography of Antarctica describes in fascinating detail every aspect of this vast land's history: two centuries of exploration, scientific investigation and contentious geopolitics. Drawing from archives from around the world Day provides a sweeping large scale history of Antarctica. Focusing on the dynamic personalities drawn to this unconquered land the book offers an engaging collective biography of explorers and scientists battling the elements in the most hostile place on earth. We see intrepid sea captains picking their way past icebergs and pushing to the edge of the shifting pack ice; sanguinary sealers and whalers drawn south to exploit the Penguin El Dorado; famed nineteenth century explorers like Scott and Amundson in their highly publicized race to the South Pole and aviators like Clarence Ellsworth and Richard Byrd flying over great stretches of undiscovered land. Yet Antarctica is also the story of nations seeking to incorporate the Antarctic into their national narratives and to claim its frozen wastes as their own. As Day shows in a place as remote as Antarctica claiming land was not just about seeing a place for the first time or raising a flag over it: it was about mapping and naming and more generally knowing its geographic and natural features. And ultimately

after a little known decision by FDR to colonize Antarctica claiming territory meant establishing full time bases on the White Continent The end of the Second World War would see one last scramble for polar territory but the onset of the International Geophysical Year in 1957 would launch a cooperative effort to establish scientific bases across the continent And with the Antarctic Treaty science was in the ascendant and cooperation rather than competition was the new watchword on the ice Tracing history from the first sighting of land up to the present day Antarctica is a fascinating exploration of this deeply alluring land and man's struggle to claim it [Antarctica: Earth's Own Ice World](#) Michael Carroll, Rosaly Lopes, 2018-05-16 In 2016 scientist Rosaly Lopes and artist Michael Carroll teamed up as fellows of the National Science Foundation to travel to Mount Erebus the world's southernmost active volcano in Antarctica The logistics of getting there and complex operations of Antarctica's McMurdo Station echo the kinds of strategies that future explorers will undertake as they set up settlements on Mars and beyond This exciting popular level book explores the arduous environment of Antarctica and how it is similar to other icy worlds in the Solar System The bulk of this story delves into Antarctica's infrastructure exploration and remote camps culminating on the summit of Erebus There the authors explored the caves and ice towers on the volcano's flanks taking photographs and generating original art depicting scenes in Antarctica and terrestrial analogs on other planets and moons Readers will see an intimate side of Mount Erebus and Antarctica while surveying the region's history exploration geology and volcanology which includes research funded by the National Science Foundation's United States Antarctic Programs Richly illustrated with photographs and stunning paintings showcasing the beauty of the harsh continent the book captures the spirit and splendor of the authors journey to Erebus **Proposed Rule on Environmental Impact Assessment of Nongovernmental Activities in Antarctica** ,2001 [The Saturday Evening Post](#) ,1929 [The Encyclopaedia Britannica](#) Hugh Chisholm,1911 [The Encyclopaedia Britannica: Pay to Ree](#) ,1911 [The Encyclopædia Britannica](#) Hugh Chisholm,1911 [The Encyclopedia Britannica](#) ,1911 [Handbook on the Politics of Antarctica](#) Klaus Dodds, Alan D.
