Autobiographical Writing and British Literature 1783-1834 James Treadwell, 2005-01-20 The word autobiography is a late eighteenth century coinage yet by 1826 it was used as the title for a multi volume anthology of self writing and in 1834 Thomas Carlyle wrote of these Autobiographical times of ours Over the course of those few decades readers and writers came to recognize and name a new genre This book is the first full study of the phenomenon examining both the conditions and the practice of autobiographical writing in Romantic literature Historians of autobiography have often pointed to the turn of the nineteenth century as a pivotal moment In Rousseau and De Quincey's Confessions Wordsworth's Prelude and other canonical documents it has been argued self writing begins to serve the purpose of expressing the individuality autonomy and interiority of the self A more wide ranging view of the actual state of autobiography at the time exposes this narrative as a misrepresentation Self writing does gain a new kind of prominence around 1800 not however because it articulates Romantic ideologies of selfhood but because it becomes a focus of scrutiny and of contention The decades of the Romantic period identified themselves as Autobiographical times but did so anxiously This book asks what forms did that recognition and that anxiety take within the literary culture of the period What did autobiography mean to Romantic readers and writers How do autobiographical texts of the period reflect express and negotiate these conditions As well as reading a wide variety of those documents with single chapters devoted to works by Coleridge Byron and Lamb Treadwell examines writing on and around autobiography essays reviews and other forms of commentary By preserving a continuous relation between the texts and their contexts this book offers the first proper study of what is actually meant by Romantic autobiography The Mendelssohns John Michael Cooper, Julie D. Schenkerian Analysis David Beach, 2019-03-06 Schenkerian Analysis Perspectives on Phrase Rhythm Motive and Form Second Edition is a textbook directed at all those whether beginners or more advanced students interested in gaining understanding of and facility at applying Schenker's ideas on musical structure. It begins with an overview of Schenker's approach to music and then progresses systematically from the phrase and its various combinations to longer and more complex works. Unlike other texts on this subject, Schenkerian Analysis combines the study of multi-level pitch organization with that of phrase rhythm, the interaction of phrase and hypermeter, motivic repetition at different structural levels, and form. It also contains analytic graphs of several extended movements, separate works, and songs. A separate instructor's manual provides additional advice and solutions graphs of all recommended assignments. This second edition has been revised to make the early chapters more accessible and to improve the pedagogical effectiveness of the book as a whole. Changes in musical examples have been carefully made to ensure that each example fully supports student learning. Informed by decades of teaching experience, this book provides a clear and comprehensive guide to Schenker's theories and their applications.
