Fiscal Policy Issues During the Transition in Russia Augusto López-Claros, Sergei V. Alexashenko, International Monetary Fund, 1998 Modernization tax system public expenditure **Fiscal Policy Rules** Mr. George Kopits, Mr. Steven A. Symansky, 1998-07-22 What are fiscal policy rules What are the principal benefits and drawbacks associated with various fiscal rules particularly compared with alternative approaches to fiscal adjustment Can fiscal rules contribute to long run sustainability and welfare without sacrificing short run stabilization If so what characteristics of fiscal rules make this contribution most effective And in what circumstances and contexts if any should the IMF encourage its member countries to adopt fiscal rules This paper seeks to identify sensible fiscal policy rules that can succeed if chosen by a member country as an alternative to discretionary fiscal rules **Governance, Decentralization and Reform in China, India and Russia** Jean-Jacques Dethier, 2000-09-30 The papers in *Governance Decentralization and Reform in China India and Russia* which were presented at a ZEF conference in May 1999 deal with three critical aspects of governance in China India and Russia political reforms at the local level fiscal reforms in intergovernmental relations and legal reforms The volume collects contributions from 24 outstanding economists political scientists and legal specialists including Vito Tanzi Daniel Treisman Pranab Bardham Jean Dr ze Katharina Pistor and Kathryn Hendley Distorted economic and political incentive structures capture of the state by powerful elites and inoperative legal systems are factors that have greatly complicated the political economy of reform in these three large countries with heterogeneous populations Addressing these political and institutional issues is essential to designing good policies One particular goal of this volume is to bring together new analytical insights and empirical evidence on governance a new and growing field of research The volume is divided into three parts fiscal federalism decentralization and provision of local public goods and legal reforms Part I discusses the role of incentives in fiscal federalism The papers analyze the effects of different revenue sharing mechanisms between different levels of government in particular the effects on regional growth and inequality and the incentives that local politicians may have to provide public goods depending on fiscal arrangements with the central government In adapting their governance structures all three countries have been striving for increased decentralization But the theoretical literature suggests that in a decentralized setting second best solutions must prevail it is not possible to ensure incentive compatibility simultaneously with optimal allocation of resources and a balanced budget in providing public goods Part II discusses taxation and public expenditure management both as a political and as a budgetary process Two questions which the papers address are Does participation of stakeholders and accountability of public authorities improve economic and social outcomes Does better governance in the provision of basic goods such as health care and education improve equity While decentralization is often seen as a way to improve the quality of public services rule based governance is viewed as a safeguard against the arbitrariness of public officials and weaknesses in law enforcement The five papers in Part III focus on the rule of law the

role of the judicial system in establishing a rule based economy and the effectiveness of legal institutions during the transition from socialism to a market economy They present overviews of current legal reform issues in the three countries and discuss various conceptual approaches to addressing legal reform issues *The Meltdown of the Russian State* Piroška Mohácsi Nagy, 2000-01-26 An analysis in political economic terms of how certain groups of the managerial banker elite in Russia grab power and wealth to a highly unusual degree in modern history The book draws together various pieces of evidence to offer a convincing overall picture Financial Sector Development in Sub-Saharan African Countries Mr. Peter C. T. Baliño, 1999-03-15 Dollarization the holding by residents of a substantial portion of their assets in foreign currency denominated assets is a common feature of developing and transition economies and therefore typical of many countries with IMF supported adjustment programs This paper analyzes policy issues that arise and various monetary strategies that may be pursued when the monetary sector is dollarized and it considers the implications that dollarization has for the design of IMF programs *Research Activities of the IMF, January 1991-December 1999* International Monetary Fund, 2000-01-01 Research activity in the IMF emphasizes the links between the organization s policy and operational concerns The main objectives of research is IMF staff understanding of policy and operational issues relevant to the institution and to improve the analytical quality of the work prepared for management and the Executive Board and the advice provided to member countries The scope of research in the IMF is defined by the purposes and functions of the institution In order to foster innovation and ensure quality control the IMF makes much of its research available outside the institution and encourages staff to interact with academia and other research organizations through conferences seminars and occasional joint research projects The visiting scholar s program has also enhanced the quality of research done in the IMF This program brings in leading members of the economics profession from around the world to assist in the preparation of papers for the Executive Board and to conduct research on IMF related issues Social Capital and Social Cohesion in Post-Soviet Russia Judyth L.
