**Federalism and the Market** Erik Wibbels, 2005-05-02 This book first published in 2005 develops a comparative model of intergovernmental bargaining to account for variation in the capacity of federations in the developing world to undertake economic policy reform suggesting that many market reform policies are a function of a constant process of bargaining between national and regional leaders struggling for political survival As the degree of national regional disagreement mounts collective action on reforms that require implementation at multiple levels of government becomes more difficult The degree to which the two factors conflict depends on four factors the individual electoral interests a shared intergovernmental fiscal system the manner in which regional interests are represented in national policy making and the levers of partisan influence national leaders have over subnational politicians In testing the argument with a combination of cross sectional time series and case study analysis this book contributes to the broad literatures on development and the comparative political economy of federalism and decentralization

The Political Economy of Health and Health Care Joan Costa-Font, Joan Costa-i-Font, Gilberto Turati, Alberto Batinti, 2020-05-28 Provides an international unifying perspective based on the public choice tradition to explain how patient citizens interact with their country's political institutions to determine health policies and outcomes This volume will appeal to undergraduate and graduate students studying health economics health policy and public policy

Governing from Below Jefferey M. Sellers, 2002-03-04 Throughout the world more policy making and the politics that shape it take place in the urban regions where most people live This book draws on eleven case

studies of similar but disparate urban regions in France Germany and the United States from the 1960s to the 1990s It documents the growth of this urban governance and develops a pioneering analysis of its causes and consequences It traces the origins to the expansion and devolution of policy making to local business mobilization and institutional interests in high tech and service activities and the incorporation of local social movements Nation states shape the possibilities for this urban governance but operate increasingly as infrastructures for local initiatives Where urban governance has succeeded in combining environmental quality and social inclusion with local prosperity local officials have built on supportive infrastructures from higher levels the local economy civil society and favourable positions in the global economy

*International Handbook of Network Industries* Matthias Finger, R. W. Kneke, 2011 To learn about how economic and institutional forces have shaped the network industries and policies towards them read the first part of the book To discover their impacts on particular industries read the second part And to find out what has happened in particular countries read the third part I think anyone interested in network industries should read all of it The book's structure allows for many interesting comparisons across countries and sectors Richard Green University of Birmingham UK This is a very useful and comprehensive guide to reforms in network industries in communications energy transport and water It is organized by generic topic sector and region Its authors are acknowledged experts I am confident that this Handbook will be a widely read and valuable resource for many years Martin Cave London School of Economics UK Quite an accomplishment this Handbook provides by far the most comprehensive overview of the role of the private sector and competition in infrastructure industries with thoughtful surveys of each of the major infrastructure sectors and of the key regions and countries Jos Gomez-Ibez Harvard University US In recent decades all infrastructures have undergone significant restructuring This worldwide phenomenon is often labelled liberalization and although expectations were high with respect to lower prices greater efficiency and innovation the expected gains have not always been fully realized This extensive state of the art Handbook provides a comprehensive overview of the various experiences of liberalization across different sectors regions and disciplines The multidisciplinary approach focuses on the economic political and institutional aspects of liberalization as well as to a lesser extent on technological issues As such it constitutes a unique contribution as this broad overview is often lost in the sector specific country focused and purely disciplinary approaches prevalent in the current literature Sectors explored include telecoms the Internet energy and transport whilst the truly global perspective incorporates unique case studies from an array of developed and developing countries including the US China India and the EU The *International Handbook of Network Industries* will become the definitive volume for academics researchers and students of economics political science and law interested in infrastructure regulation It will also prove a valuable guide to practitioners and policy makers involved in liberalization and competition
