

WELL MANAGED MARINE PROTECTED AREAS SUPPORT FISHERIES

MPAs IMPROVE THE HEALTH OF OCEANS BY:

Protecting and restoring marine habitats

Increasing Resilience to Environmental Change

Protecting Species and Rebuilding Fish Stocks

MPA

KEY PRINCIPLES FOR MPAs TO WORK:

Well Designed Boundaries and Rules

Enforced and Compliant Rules

Local Community Engagement

Part of an Integrated Management Plan

Sustainably Managed

MPAs SUPPORT LIVELIHOODS

In Apo Island, Philippines, fishers have doubled their catch rate 30 years after the MPA was created. As a result, they go out to sea less, leaving less fuel and time.

A global review shows that well managed MPAs can substantially increase fish stock density, biomass and species richness.

MPAs CAN PUMP FISH INTO ADJACENT AREAS

As fish populations recover within MPAs, juveniles and adults can spill over across the boundaries and replenish fishing grounds.

EXAMPLE: APO ISLAND PROTECTED AREA, PHILIPPINES

Burgenfish and jacksnapper represent 40-70% of local fishery yields.

Since the MPA was established, their population has tripled.

resulting in an increase in catch per unit effort of

+50%

MPAs CAN EXPORT LARVAE INTO ADJACENT AREAS

Larger fish within MPAs produce disproportionately more eggs and larvae. Some larvae then drift to fished areas.

EXAMPLE: GREAT BARRIER REEF PROTECTED AREA, AUSTRALIA

The coral trout and the stripe snapper are important locally.

Local MPAs produce a 100% of total juvenile recruitment in nearby fished areas.

+50%

Currently, 9000+ people in coastal Marine Protected Areas and adjacent fished areas rely on fishing for food and livelihoods. 40 people whose livelihoods rely on habitat are ignored.

Fisheries Conservation And Management:

Fisheries Conservation and Management Michael R. Ross, 1997 Designed for beginning level readers who have not yet completed more technical coursework in math and science this book introduces the breadth of the fisheries conservation and management process rather than the depths and details of specific fisheries conservation and management settings It provides a broad background including basic information on fish their habitats and people who fish for them provides numerous examples of both successes and failures strengths and weaknesses of particular conservation or management strategies and programs See Chs 8 12 and focuses on the laws that govern the management process and management activities i e regulating harvest the use of hatcheries in fisheries management habitat related management and on the types of management and conservation activities that are used *Handbook of Marine Fisheries Conservation and Management* R. Quentin Grafton, Ray Hilborn, Dale Squires, Maree Tait, Meryl Williams, 2010-01-21 This handbook is the most comprehensive and interdisciplinary work on marine conservation and fisheries management ever compiled It is the first to bridge fisheries and marine conservation issues Its innovative ideas detailed case studies and governance framework provide a global special perspective over time and treat problems in the high seas community fisheries industrial fishing and the many interactions between use and non use of the oceans Its policy tools and ideas for overcoming the perennial problems of over fishing habitat and biodiversity loss address the facts that many marine ecosystems are in decline and plagued by overexploitation due to unsustainable fishing practices An outstanding feature of the book is the detailed case studies on conservation practice and fisheries management from around the world These case studies are combined with foundation chapters that provide an overview of the state of the marine world and innovative and far reaching perspectives about how we can move forward to face present and future challenges The contributors include the world s leading fisheries scientists economists and managers Ecosystem and incentive based approaches are described and complemented by tools for cooperative participatory solutions Unique themes treated fisher behavior and incentives for management beyond rights based approaches a synthesis of proposed solutions a framework for understanding and overcoming the critical determinants of the decline in fisheries degradation of marine ecosystems and poor socio economic performance of many fishing communities models for innovative policy instruments a plan of action and adoption pathways to promote sustainable fishing practices globally Collectively the handbook s many valuable contributions offer a way forward to both understanding and resolving the multifaceted problems facing the world s oceans **Federal Conservation and Management of Marine Fisheries in the United States** John P. Wise, 1991 **Improving the Use of the "Best Scientific Information Available" Standard in Fisheries Management** National Research Council, Division on Earth and Life Studies, Ocean Studies Board, Committee on Defining Best Scientific Information Available for Fisheries Management, 2004-09-03 Under the Magnuson Stevens Fisheries Conservation and Management Act FCMA managers are required to use the best scientific

information available in the preparation of federal fishery management plans National Standard 2 in the FCMA However the Act provides no further guidance as to how conformance to this standard should be determined Because adherence to this standard has often been contentious Congress has considered adding a definition for what constitutes best scientific information available in the reauthorization of the FCMA This report examines both the current application and the controversy over the standard and concludes that a legislative definition would be too inflexible to accommodate regional differences and future advances in science and technology Instead the report recommends that NOAA Fisheries adopt procedural guidelines to ensure that the scientific information used in the development of fishery management plans is relevant and timely and is the product of processes characterized by inclusiveness transparency and openness timeliness and peer review *Hearing on the Management of Fisheries by the National Marine Fisheries Service* United States.
