Tirole,2017-11-07 From Nobel Prize winning economist Jean Tirole a bold new agenda for the role of economics in society When Jean Tirole won the 2014 Nobel Prize in Economics he suddenly found himself being stopped in the street by complete

strangers and asked to comment on issues of the day no matter how distant from his own areas of research His transformation from academic economist to public intellectual prompted him to reflect further on the role economists and their discipline play in society The result is *Economics for the Common Good* a passionate manifesto for a world in which economics far from being a dismal science is a positive force for the common good Economists are rewarded for writing technical papers in scholarly journals not joining in public debates But Tirole says we urgently need economists to engage with the many challenges facing society helping to identify our key objectives and the tools needed to meet them To show how economics can help us realize the common good Tirole shares his insights on a broad array of questions affecting our everyday lives and the future of our society including global warming unemployment the post 2008 global financial order the euro crisis the digital revolution innovation and the proper balance between the free market and regulation Providing a rich account of how economics can benefit everyone *Economics for the Common Good* sets a new agenda for the role of economics in society

*Economic Growth in an Open Developing Economy* A. P. Thirlwall,2013-01-01 This concise yet insightful sequel to the highly acclaimed *The Nature of Economic Growth* provides a comprehensive critique of both old and new growth theory highlighting the importance of economic growth for reducing poverty A P Thirlwall illustrates that orthodox growth theory continues to work with one good models and to treat factor supplies as exogenously given independent of demand Orthodox

trade theory still ignores the balance of payments consequences of different patterns of trade specialisation when assessing the welfare effects of trade. The author goes on to present theory underpinned by up to date empirical evidence that factors of production and productivity growth are endogenous to demand and that the structure of production and trade matter for the long run growth performance of countries because of their impact on the balance of payments. He concludes that trade liberalisation has proved disappointing in improving the trade off between growth and the balance of payments. This book will provide a challenging read for students and academics in the fields of economics, heterodox economics and development. Policymakers focussing on the relationship between growth, trade and the balance of payments will also find the book to be of great interest.
