Failure Colin Feltham,2014-09-03 Failure success's ugly sister is inevitable cognitively biologically and morally We all make mistakes we all die and we all get it wrong A chain of flaws can be traced through all phenomena natural and human We see impending and actual failures in individual lives in marriages careers in religion education psychotherapy business nations and in entire civilizations And there are chronic and imperceptible failures in everyday domains that most of the time we barely notice often until it is too late Colin Feltham exposes what constitutes failure across a number of domains He takes guidance from the work of such diverse philosophers and thinkers as Diogenes Epictetus Augustine Schopenhauer Kierkegaard Heidegger Sartre Camus Cioran and Ricoeur while also drawing on the insights of artists and writers such as van Gogh Arthur Miller Philip Larkin Samuel Beckett Charles Bukowski and Philip Roth Precursors and partial synonyms for failure can be seen in the concepts of hamartia sin fallenness non being false consciousness and anthropathology Philosophy can help us but is itself in its reliance on language and logic subject to inherent flaws and failures It is the very pervasiveness yet common denial of failure which makes it a compelling topic that cries out for honest analysis We live in a time when the cliché of failed Marxism may be segueing frighteningly for some into the failure of selfish capitalism in a time of geopolitical uncertainty and failure to address the dire need for agreement and action on climate change But many of us are also painfully aware of our own shortcomings our own weakness of will and lack of authenticity Trying to identify where the lines may be drawn between individual responsibility social policy and historical and biological dark forces is a key challenge in this fascinating book
