Ecopsychology, Phenomenology, and the Environment Douglas A. patterns of living This volume is different from other books in the rapidly growing field of ecopsychology in its emphasis on phenomenological approaches building on the work of phenomenological psychologists such as Maurice Merleau Ponty This focus on phenomenological methodologies for articulating our direct experience of nature serves as a critical complement to the usual methodologies of environmental and conservation psychologists who have emphasized quantitative research Moreover Ecopsychology Phenomenology and the Environment is distinctive insofar as chapters by phenomenologically sophisticated ecopsychologists are complemented by chapters written by phenomenological researchers of environmental issues with backgrounds in philosophy and geology providing a breadth and depth of perspective not found in other works written exclusively by psychologists
