Moving into Adolescence Roberta G. Simmons, 2017-07-05 From the sociological point of view adolescence traditionally has been described as a period of physical maturity and social immaturity Adolescents reach physical adulthood before they are capable of functioning well in adult social roles The disjunction between physical capabilities and socially allowed independence and power and the concurrent status ambiguities are viewed as stressful for the adolescent in modern Western society It has been assumed that the need to disengage from parents during these years will result in high levels of rebellion and parent child conflict Moving into Adolescence follows students as they make a major life course transition from childhood into early adolescence Substantial controversy has been generated within the behavioral sciences concerning the difficulty of adolescence as a transitional period On the one hand there are those who characterize the period as an exceptionally and necessarily stressful time in the life course On the other hand many investigators treat this view of adolescence as their straw man To them the supposed tumult of adolescence is just that supposed and mythical The purpose of this book is to study the transition from childhood into early and middle adolescence in order to investigate change along a wide variety of psychosocial dimensions with a particular focus on the self image The authors investigate the impact of timing of pubertal change and also the movement from an intimate elementary school context into a large scale secondary school environment The first major movement into a large scale organizational context may cause difficulty for the child as may the dramatic changes of puberty In addition gender differences and changes in gender differences are studied Both short and long term consequences of transition are examined focusing on is the role of pubertal change and school transition

*Student Attainment in Higher Education* Graham Steventon, Debra Cureton, Lynn Clouder, 2016-02-05 Student Attainment in Higher Education Issues controversies and debates is a timely exploration of student attainment in a rapidly changing higher education context and a rapidly changing world The effects of neoliberalism and the commercialization of everyday life on education have been well documented but with a focus on pedagogy whilst student success is measured through grades statistics and metrics By exploring attainment in a broader context this book provides a unique contribution to the critical literature on contemporary higher education Within the themes of understanding attainment and challenging practice the book sets out to explore student attainment as complex and multifaceted It achieves this by looking at different conceptualizations of what attainment means and to whom how attainment is shaped by different and often competing agendas and vested interests The book highlights these wider issues controversies and debates that underpin student attainment whilst at the same time engaging with strategic and local interventions which set out to improve aspects of the higher education system and increase individual and social agency within it Sharing a range of pedagogical approaches and

interventions some of the key topics include addressing attainment gaps engaging mature learners nurturing the intellectual identity the impact of activity choices Creating a dialogue amongst different audiences about national and international controversies and debates around the topic of student attainment this contribution will be beneficial to teaching professionals policymakers and strategists As an edited collection with contextualisation in the wider research arena the book has both national and international applicability and transferability

**Supporting Family Carers of Older People in Europe - The National Background Report for Malta** Joseph Troisi, Marvin Formosa, 2005 Malta has an extensive formal care provision In the field of ageing there is a wide range of services available for the elderly and for their carers aimed at improving the quality of life of the elderly while maintaining them in their own homes community and environment However the majority of care for the elderly is still provided by the family members This publication is the first nation wide report concerning the state of family members taking care of older relatives in the Maltese Islands It investigates the socio economic conditions of these carers while analysing their changing role and status their needs and problems resulting from the various changes which Maltese society and family are passing through

*It Takes a Candidate* Jennifer L. Lawless, Richard L. Fox, 2005-09-12 It Takes a Candidate serves as the first systematic nationwide empirical account of the manner in which gender affects political ambition Based on data from the Citizen Political Ambition Study a national survey conducted on almost 3 800 potential candidates we find that women even in the highest tiers of professional accomplishment are substantially less likely than men to demonstrate ambition to seek elected office Women are less likely than men to be recruited to run for office They are less likely than men to think they are qualified to run for office And they are less likely than men to express a willingness to run for office in the future This gender gap in political ambition persists across generations Despite cultural evolution and society's changing attitudes toward women in politics running for public office remains a much less attractive and feasible endeavor for women than men

*Textbook of Palliative Medicine* Eduardo Bruera, Irene Higginson, Charles F von Gunten, 2009-01-30 Textbook of Palliative Medicine provides an alternative truly international approach to this rapidly growing specialty This textbook fills a niche with its evidence based multi professional approach and global perspective ensured by the international team of editors and contributing authors In the absence of an international curriculum for the study of palliative medicine this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field and the structure and content have been constructed very much with this in mind With an emphasis on providing a service anywhere in the world including the important issue of palliative care in the developing nations Textbook of Palliative Medicine offers a genuine alternative to the narrative approach of its competitors and is an ideal complement to them It is essential reading for all palliative care physicians in training and in practice as well as palliative care nurses and other health professionals in the palliative care team
