Max Weber Alan Sica, The most profound and enduring social theorist of sociology's classical period Max Weber speaks as cogently to concerns of the new century as he did to those of the past In Max Weber and the New Century Alan Sica demonstrated Weber's preeminent position and lasting vitality within social theory by applying his ideas to a broad range of topics of contemporary concern Max Weber A Comprehensive Bibliography is a companion volume that offers some 4 600 bibliographic listings of work on Weber making it the most complete guide to the literature in English and a testament to the continued vitality of Weber's thought Sica's work supersedes all previous bibliographical efforts covering the Weber literature both in the quantity and accuracy of its references and the clarity and convenience of its format In order to demonstrate the enormous variety of Weberiana in English Sica has adopted a liberal criterion for inclusion rather than a critical one choosing to mix the best with what may be more routine work Following a preface in which previous bibliographies and bibliographic problems are discussed the volume opens with a series of five specialized bibliographies The first lists Weber's works in English translation The second lists reviews of Weber's major works including those translated into English while the third covers reviews of recent books and other work on Weber The fourth section contains a selection of dissertations and theses relating to Weber or his ideas The fifth includes primary and secondary sources treating Weber on rationality and rationalization processes The last and largest section offers a comprehensive Weber bibliography of works in English This large scale endeavor attempts to identify with accuracy and completeness the entire universe of Weber scholarship in English It will be an essential scholarly tool for sociologists historians economists and students of cultural and intellectual history Alan Sica is professor of sociology and director of the Social Thought Program at Pennsylvania State University

Volume 9: Kierkegaard and Existentialism Jon Stewart, 2016-12-05 There can be no doubt that most of the thinkers who are usually associated with the existentialist tradition whatever their actual doctrines were in one way or another influenced by the writings of Kierkegaard This influence is so great that it can be fairly stated that the existentialist movement was largely responsible for the major advance in Kierkegaard's international reception that took place in the twentieth century In Kierkegaard's writings one can find a rich array of concepts such as anxiety despair freedom sin the crowd and sickness that all came to be standard motifs in existentialist literature Sartre played an important role in canonizing Kierkegaard as one of the forerunners of existentialism However recent scholarship has been attentive to his ideological use of Kierkegaard Indeed Sartre seemed to be exploiting Kierkegaard for his own purposes and suspicions of misrepresentation and distortions have led recent commentators to go back and reexamine the complex relation between Kierkegaard and the existentialist thinkers The articles in the present volume feature figures from the French German Spanish and Russian traditions of existentialism They examine the rich and varied use of Kierkegaard by these later thinkers and most importantly they critically analyze his purported role in this famous intellectual movement

Karl Jaspers on Truth and Dialogue Anton Hügli, 2024-12-16 The German philosopher Karl Jaspers was moved by the possibilities of global understanding throughout his life and penetrated it more deeply than any other thinker before him Anton Hügli argues that Jaspers petition to not proclaim a new doctrine but to continue thinking along the path taken by the great philosophers of the past is itself an expression of his unconditional will to communicate The limits of communication that Jaspers shows us are not accidental psychological and sociological obstacles to understanding but limits that we humans encounter as humans we want to communicate what cannot be communicated Instead of an understanding based on a truth that can be understood by all there is a struggle between the powers of faith How we can communicate with one another and work for peace and unity in the world This ultimate question requires a twofold clarification on the one hand of the nature of the objects that have always been considered inexpressible the human s individual existence and God as the ultimate One and on the other hand of the faculty in us that allows us to think things that cannot be thought
