Green,2023-03-31 Sometimes reading the news it seems we are drowning in a sea of risks Every day dozens of news articles proclaim some activity some exposure some change in the environment exposes us to new and terrifying risks And every day governments in developed countries pop out regulations to ensure that we make those changes in behavior to address those supposed risks whether we want to or not You probably think such claims and regulation of risk are backed up by something resembling actual real world evidence of harm You probably assume that governments when regulating are relying on hard data physical observations of exposures to a potential harm physical measurements of harms that result from exposure and that sort of thing But if you assume that you are probably wrong Since the computer revolution of the 1970s actual hard evidence of risk have been replaced both in the estimation of risks and in the regulation of risks with computer models simulations of reality that may have little or no relation to the actual reality in which actual people live This book is about the influence of computer risk modeling on public policy specifically the giant gushing fountain of EHS regulations that have poured forth since the 1970s That shift to simulation of risk has led to a massive increase in regulation a Plague of Regulation that rests on the Plague of Models

Conspiracies and Conspiracy Theories in the Age of Trump Daniel C. Hellinger, 2023-11-25 *Conspiracies and Conspiracy Theory in the Age of Trump* stands out in the burgeoning literature on conspiracism with its call for political scientists to analyze not only conspiracy theory as political pathology but conspiracies themselves as political behavior symbiotically related to moral hazards and other forces unleashed by dark money disinformation changing technologies and globalization This new updated edition extends this analysis to the belief by many Americans that the 2020 election was stolen resistance to social measures to counter the Covid epidemic attempts by Trump and his allies to stop the steal and the resulting mob insurrection at the Capitol on January 6 We likely will see both conspiracism and actual conspiracies play a greater role due to institutional decay in American politics For this reason political scientists need to analyse and theorize the role of conspiracies in politics why they prosper and fail how conspiracies may deflect political outcomes what relationship they bear to social forces unleashed by great economic and social change
