The Dog Bone Portfolio Margret Kopala, John Budden, 2015-06-01 Like so many of us Margret Kopala lost a significant portion of her life savings in the stock market crash of 2008 Unlike us however she went on a long and intense financial odyssey to find out what caused the losses and what she could do to protect herself in the future Armed with her skills as a journalist and public policy analyst fueled by equal measures of fear and determination and mentored by successful investment strategist and financial broadcaster John Budden

Kopala researched and wrote this magisterial analysis of how Russian economist Nikolai Kondratieff's long wave theory is playing out in what many today describe as a financial Winter. Along the way she is introduced to financial experts familiar with Kondratieff scholarship: John Budden's interviews in the book with Dean LeBaron, J. Anthony Boeckh, Ian Gordon, Larry Jeddeloh, Don Lindsey, the late Lord William Rees-Mogg, Jim Rogers, Eric Sprott, and Ronald Peter St. Ferle show how investors must put a new spin on asset allocation and security of their assets. Like a dog that buries bones in different places, we would be advised to allocate our assets to different parts of the world and to ensure that a good portion of those assets include gold, the only continuous basis of wealth across history and around the world. Kopala explores the global, national, and personal effects of overconsumption, underproduction, energy and innovation, the printing of money to save the economy, competitive devaluations, deflation, reflation, and inflation, and war, the ultimate economic crisis. She documents those technologies that seeded previous New Economy Spring seasons, from the era of canals to those of railroads, automobiles, and infotech, and probes today's innovations most likely to seed the Next New Economy that we desperately need if we are to escape the doldrums of the current financial Winter. With trenchant explanations of how individuals can achieve portfolio strength by first preserving capital, then being vigilant about the financial effects of politics, economic theory, culture, and our own choices, *The Dog Bone Portfolio* is a gift to investors, policy makers, and ultimately nations everywhere.

Brazil Is the New America James Dale Davidson, 2012-07-31. Look to Brazil for safe, stable investments. As the future of the American economy seems to get bleaker by the day, it is tempting to look abroad for business opportunities. Europe and Asia don't provide much hope, but what about somewhere that's both closer to home and sunny year-round? In *Brazil Is the New America: How Brazil Offers Upward Mobility in a Collapsing World*, James D. Davidson shows that the current financial situation in Brazil is a haven for those looking to make money in a world in turmoil. With a population just 62 percent the size of that of the US, Brazil has added 15,023,633 jobs over the past eight years, while the US has lost millions. In a world burdened by bankrupt governments and aging populations, Brazil is solvent, with two people of working age for every dependent. In a world of Peak Oil, Brazil is energy independent with 70 billion barrels of oil, 60% of the world's unused arable land, and 15% of its fresh water. Comparatively non-leveraged and with significant room for growth and expansion, as well as vast natural resources, Brazil is a haven of opportunity. Written by James D. Davidson, the editor/publisher of *Strategic Investment* and co-founder of *Agora* and the media outlet *Newsmax*, *Brazil Is the New America* details how the original America now embodies the brightest hope for realizing the American Dream, while the Old America is headed for a dramatic decline in the standard of living. Investment opportunities, not only for those willing to relocate but anyone who can consider investing there. The cost structure of employment in Brazil versus the United States. Brazil has already learned its lesson about the dangers of inflation. Cash has taken the place of credit, and high interest rate

returns are now the norm *Education for sustainable development in BRICS* Ewelina K. Niemczyk,2023-03-01 In the past ten years the concept of education for sustainable development has become one of UNESCO s key educational initiatives to address current global challenges However the attention was mainly devoted to primary and secondary education and higher education was somewhat neglected The primary focus on basic education has also diverted academic attention from the research exploring the relationship between higher education and sustainable development Only recently has the academic discourse on this topic begun to gain ground On that note this book is meant to place higher education at the core of the necessary transformations to create awareness of more sustainable practices and policies **Eric Voegelin and the Foundations of Modern Political Science** Barry Cooper,Eric Voegelin,1999 Annotation This important new work is a major analysis of the foundation of Eric Voegelin s political science Barry Cooper maintains that the writings Voegelin undertook in the 1940s provide the groundwork for the brilliant book that is one of his best known *The New Science of Politics* At the time of that book s publication however few were aware of the enormous knowledge and accomplished scholarship that lay behind its illuminating although sometimes baffling formulations By focusing on several of the key chapters in Voegelin s eight volume *History of Political Ideas* especially the studies of Bodin Vico and Schelling Cooper shows how those studies provide the basis for Voegelin s thought Investigating Voegelin s study of Oriental influences on Western political ideas especially Mongol constitutional law and his study of Toynbee Cooper seeks to demonstrate the vast range of materials Voegelin used Cooper contends that as with other great thinkers political crisis specifically the world war of 1939 1945 stimulated Voegelin s intellectual and spiritual achievement He provides an analysis of Voegelin s immediate concern with the course of World War II his ability to understand those dramatic events in a large context and his ability to provide an insightful account of the causes the significance and the consequences of the spiritual and political disorder that was evident all around him In *Eric Voegelin and the Foundations of Modern Political Science* Cooper makes the connection between Voegelin s political writings of the 1940s and the meditative interpretations that began to appear with the publication of *Anamnesis* and with the later volumes of *Order and History* much more intelligible than does any existing discussion of Voegelin Scholars in intellectual history and political science will benefit enormously from this valuable new addition to Voegelin studies *Catching Up* Vladislav L. Inozemtsev,2011-12-31 Disparities between the economic development of nations have widened throughout the twentieth century and they show no sign of closing In the nineteenth century the economic potential of developed countries was three times that of the rest of the world Today the gap is twenty times greater and the trend is increasing In this provocative reexamination of theories of accelerated development or catching up Vladislav L Inozemtsev traces the evolution of thinking about how countries lagging behind can most swiftly move forward and assesses their prospects for success in this effort Inozemtsev reviews the experience of the Soviet Union as well as the recent experience of Japan China and Southeast Asia He finds that those countries that have moved forward most rapidly have

successfully adapted new technology to old processes But even then they face daunting odds as they grapple with the need to change their population s ideas and behavior And in the 1990s their rates of development have noticeably declined Catching Up assesses prospects for successful application of theories of accelerated development in the global economy Inozemtsev s pessimistic conclusion is that rapid industrial progress is not achievable in the information society of the twenty first century Inozemtsev reaches this conclusion after reviewing theories of accelerated development thinking from the diverse viewpoints of the 1940s and 1950s to the more intensive ideological polarization of the 1960s Inozemtsev believes it will be impossible for non Western nations to catch up with the West because of their inability to generate or control information and knowledge *Bibliographie Mensuelle* United Nations Library (Geneva, Switzerland),1993 *Ethnic Religious Minorities in Iran* S.
