Editing Michael Alley,2013-03-08 You are a hired gun of sorts a manager scientist or en gineer called upon to edit a document Perhaps you are overseeing a long report or thesis reviewing a journal article or providing comments on a proposal For the document before you what changes do you suggest How do you clearly and efficiently communicate those changes to the author How do you convince the author and the other editors that those changes are needed The answers to these questions define how you edit someone s writing In business engineering and science the process of editing causes much strife In fact my experience in teach ing professional writing over the past fifteen years has been that editing is the number one complaint that pro fessionals have about the process of documenting their work Many professionals complain that this editing seems to arise more from whim than from logic that what flies in one document is often shot down in another Others complain that editors change too much essentially inserting their own individual styles Still others complain that the sign off process is so inefficient and taxing that they sometimes do not document work they know should viii Preface be documented While in many cases these complaints are unfounded in many others they are legitimate This book addresses those complaints that are legitimate by showing managers scientists and engineers how to make their editing both more effective and more efficient

Office of Personnel Management,1994 Heart Rate Variability: Clinical Applications and Interaction between HRV and Heart Rate Karin Trimmel,Jerzy Sacha,Heikki Veli Huikuri,2015-10-07 Over the last decades assessment of heart rate variability HRV has increased in various fields of research HRV describes changes in heartbeat intervals which are caused by autonomic neural regulation i e by the interplay of the sympathetic and the parasympathetic nervous systems The most frequent application of HRV is connected to cardiological issues most importantly to the monitoring of post myocardial infarction patients and the prediction of sudden cardiac death Analysis of HRV is also frequently applied in relation to diabetes renal failure neurological and psychiatric conditions sleep disorders psychological

phenomena such as stress as well as drug and addiction research including alcohol and smoking The widespread application of HRV measurements is based on the fact that they are noninvasive easy to perform and in general reproducible if carried out under standardized conditions However the amount of parameters to be analysed is still rising Well established time domain and frequency domain parameters are discussed controversially when it comes to their physiological interpretation and their psychometric properties like reliability and validity and the sensitivity to cardiovascular properties of the variety of parameters seems to be a topic for further research Recently introduced parameters like pNNxx and new dynamic methods such as approximate entropy and detrended fluctuation analysis offer new potentials and warrant standardization However HRV is significantly associated with average heart rate HR and one can conclude that HRV actually provides information on two quantities i e on HR and its variability It is hard to determine which of these two plays a principal role in the clinical value of HRV The association between HRV and HR is not only a physiological phenomenon but also a mathematical one which is due to non linear mathematical relationship between RR interval and HR If one normalizes HRV to its average RR interval one may get pure variability free from the mathematical bias Recently a new modification method of the association between HRV and HR has been developed which enables us to completely remove the HRV dependence on HR even the physiological one or conversely enhance this dependence Such an approach allows us to explore the HR contribution to the clinical significance of HRV i e whether HR or its variability plays a main role in the HRV clinical value This Research Topic covers recent advances in the application of HRV methodological issues basic underlying mechanisms as well as all aspects of the interaction between HRV and HR
