The Core: Teaching Your Child the Foundations of Classical Education Leigh A. Bortins,2010-06-08 In the past correct spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She believes that there are core areas of knowledge that are essential to master Without knowing the multiplication tables children can t advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In The Core Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences *Striving for Excellence* ,2000 Each vol a compilation of ERIC digests

International Milk Dealer ,1927 **Who's Teaching Your Children?** Vivian Troen,Katherine C. Boles,2008-10-01 Many of the problems afflicting American education are the result of a critical shortage of qualified teachers in the classrooms The

teacher crisis is surprisingly resistant to current reforms and is getting worse This important book reveals the causes underlying the crisis and offers concrete affordable proposals for effective reform Vivian Troen and Katherine Boles two experienced classroom teachers and education consultants argue that because teachers are recruited from a pool of underqualified candidates given inadequate preparation and dropped into a culture of isolation without mentoring support or incentives for excellence they are programmed to fail Half quit within their first five years Troen and Boles offer an alternative a model of reform they call the Millennium School which changes the way teachers work and improves the quality of their teaching When teaching becomes a real profession they contend more academically able people will be drawn into it colleges will be forced to improve the quality of their education and better prepared teachers will enter the classroom and improve the profession
