Education And The Political System:

Education and the Political System Byron G. Massialas, 1969 *Education and the Political Order* Ted Tapper, Brian Salter, 1978-03-16 **The Political Dynamics of American Education** Frederick M. Wirt, Michael W. Kirst, 2001

Education and Political Development. (SPD-4), Volume 4 James Smoot Coleman, 2015-12-08 Volume 4 in the Studies in Political Development Series Originally published in 1965 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Education as a Political Tool in Asia* Marie Lall, Edward Vickers, 2010-06-30 This book offers a fresh and comparative approach in questioning what education is being used for and what the effects of the politicisation of education are on Asian societies in the era of globalisation Education has been used as a political tool throughout the ages and across the whole world to define national identity and underlie the political rationale of regimes In the contemporary globalising world there are particularly interesting examples of this throughout Asia ranging from the new definition of Indian national identity as a Hindu identity to contrast with Pakistan's Islamic identity to particular versions of nationalism in China Japan Singapore and Vietnam In Asia education systems have their origins in processes of state formation aimed either at bolstering self strengthening resistance to the encroachments of Western and or Asian imperialism or at furthering projects of post colonial nation building State elites have sought to popularise powerful visions of nationhood to equip these visions with a historical back story and to endow them with the maximum sentimental charge This book explores all of these developments emphasising that education is seen by nations across Asia as elsewhere as more than simply a tool for economic development and that issues of national identity and the tolerance or lack of it of ethnic cultural or religious diversity can be at least as important as issues of literacy and access Interdisciplinary and unique in its analysis this book will be of interest to scholars of political science research in education and Asian Studies **Politics and Education** R. Murray Thomas, 2016-01-22 Politics and Education Cases from eleven nations tackles the relationship between politics and education The book presents several dimensions of the politics education relationship such as the use of education in achieving political agendas and the effects of the interest of a political group on educational policy The book presents cases from 11 different countries that show the interaction between education and politics such as the use of educational policy as a compensatory legitimisation in West Germany the educational opportunity under pre and post revolutionary condition in Nicaragua and the education and the maintenance of the social class system in Jamaica The text will be of great interest to readers concerned with the implication of political agendas for the education system of a country **Education and National Development** Ingemar Fägerlind, Lawrence J.

Moe,Susanne Wiborg,2016-11-28 Public education is critically important to the human capital social well being and economic prosperity of nations It is also an intensely political realm of public policy that is heavily shaped by power and special interests Yet political scientists rarely study education and education researchers rarely study politics This volume attempts to change that by promoting the development of a coherent thriving field on the comparative politics of education As an opening wedge the authors carry out an 11 nation comparative study of the political role of teachers unions showing that as education systems everywhere became institutionalized teachers unions pursued their interests by becoming well organized politically active highly influential and during the modern era the main opponents of neoliberal reform Across diverse nations the commonalities are striking The challenge going forward is to expand on this study s scope theory and evidence to bring education into the heart of comparative politics **Teachers' Unions and the Politics of Education in Japan** Robert W. Factors Impacting American Political Systems: Emerging Research and Opportunities Hampton-Garland, Pamela, Sechrest-Ehrhardt, Lisa, Cooke, Benson George, 2017-11-03 America has the reputation of being one of the wealthiest and most powerful countries in the world yet within its borders social problems persist and negatively impact Americans Though profound changes are taking place in the social economic and cultural contexts of America they are precipitated by the urge for equal opportunity and social justice Socio Economic and Education Factors Impacting American Political Systems Emerging Research and Opportunities provides emerging research on the most current issues facing the American

public and political system While highlighting the changes America is making in the social economic and cultural regions of society readers will learn how these changes are coming to shape their lives in the country This book is an important resource for undergraduate and graduate students and professionals seeking current research on how social economic and educational issues impact the American political system and policies Political Education Robert Brownhill, Patricia Smart, 2025-06-02 A debate has been in existence as to whether political education or indeed political argument of any kind should be kept out of the classroom There are those who argue that political education is synonymous with indoctrination and others who suggest that education is by its nature political For those who agree that there should be a distinct political aspect of the curriculum which instils political knowledge and awareness there is of course the question of where the emphasis should be placed How is it possible to achieve any kind of balance First published in 1989 Political Education analyses the debate about the introduction of courses in political education to secondary tertiary and adult education as well as to youth work It also examines the introduction of an element of political education to specific subjects It puts forward an argument for political education and discusses what it should consist of and how it should be undertaken This book will be of interest to students and researchers of education *Civic and Citizenship Education in Volatile Times* Kerry J Kennedy, 2019-04-23 The book highlights current issues influencing civic and citizenship education and their theoretical underpinnings It provides an overview of the key features influencing democratic deconsolidation suggests ways in which civic and citizenship education needs to be reframed in order to fit this new political environment and demonstrates how social media will play a significant role in any future for civic and citizenship education Currently democratic institutions are under attack democratic values are threatened and there is a wide scale retreat from the liberal consensus that has underpinned liberal democracies internationally These trends can be seen in events like Brexit the election of a right wing populist President of the United States and anti democratic governments in parts of Europe It is this change in the direction of political ideology that is currently deconsolidating democracy and thus challenging traditional approaches to civic and citizenship education What is urgently needed is an understanding of these current trends and their implications for thinking in new ways about civic and citizenship education in the 21st century **Education Politics for the New Century** Douglas E. Mitchell, Margaret E. Goertz, 1990 The 1989 Yearbook commemorates the PEA s first twenty years by concentrating on the changing social economic technological and political forces that will shape education politics and policy into the twenty first century The Yearbook focuses on the roles to be played by education professionals local citizen groups government agencies and business leaders in shaping education policy responses to racial and ethnic segregation school restructuring technology utilisation and the development of education politics and policy *Education Policy and Power-Sharing in Post-Conflict Societies* Giuditta Fontana, 2016-08-24 This book explores the nexus between education and politics in Lebanon Northern Ireland and Macedonia drawing from an extensive body of original evidence and literature on power sharing and post conflict

education in these post conflict societies as well as the repercussions that emerged from the end of civil war This book demonstrates that education policy affects the resilience of political settlements by helping reproduce and reinforce the mutually exclusive religious ethnic and national communities that participated in conflict and now share political power Using curricula for subjects such as history citizenship education and languages and structures like the existence of state funded separate or common schools Fontana shows that power sharing constrains the scope for specific education reforms and offers some suggestions for effective ones to aid political stability and reconciliation after civil wars

International Handbook of Comparative Education Robert Cowen, Andreas M. Kazamias, 2009-08-22 A big project like this Handbook means that you incur debts and not only to your authors and your publisher As editors we along with our colleague Elaine Unterhalter who edited the section on postcolonialism would like to thank most warmly those authors who delivered on time and who did not fuss but just got on and did a r rate job We would also like to thank all authors who did deliver which was almost everyone we asked We know that some of our authors worked in very dif cult private circumstances as they were nishing their chapters and we hope the publication of the Volumes will later be for them a happy reminder of dif culties and disasters overcome The only sad theme is that some very close colleagues with whom we were wo ing and for whom we had the greatest respect and liking became very ill and died while the volumes were being prepared We decided to ask for copyright permissions to publish something of theirs These permissions were graciously given by two major journals and with the agreement also of our publishers Springer Rolland Paulston and Terry McLaughlin have examples of their writing in this Handbook
