International Handbook of Educational Policy Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fifty chapters written by nearly ninety leading researchers from a number of countries It is organized into five broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contexts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary

Pedagogies and Curriculums to (Re)imagine Public Education Encarna Rodríguez, 2015-06-04 This book discusses current market based educational discourses and how they have undermined the notion of the public in public education by allowing private visions of education to define the public democratic imagination Against this discouraging background this text embraces Freire's understanding of hope as an ontological need and calls for finding new public grounds for our public imagination It further articulates Freire's mandate to unveil historically concrete practices to sustain democratic educational visions no matter how difficult this task may be by 1 presenting an in-depth description of the pedagogies and curriculums of eleven schools across historical and geographical locations that have worked or are still working with disenfranchised communities and that have publicly hoped for a better future for their students and by 2 reflecting on how the stories of these schools offer us new opportunities to rethink our own pedagogical commitment to public visions of education To promote this reflection this book offers the notion of publicly imagined public education as a conceptual tool to help understand the historical and discursive specificity of schools hopes and to re-claim public schools as legitimate sites of public imagination

Reframing Education as a Public and Common Good Rita Locatelli, 2019-08-19 This book examines the normative principles that guide the governance of education in particular the notion of education as a public good Determining whether this concept is still valid is a topic of growing importance especially considering the phenomena of increasing privatisation and marketisation in the sector The author posits that the prioritisation of economic aspects of education may lead to the weakening of the role of the State in ensuring equality of opportunity and social justice and thus to a significant risk of considering education as merely a private marketable good The volume argues that considering education as a common good can lead to the strengthening of democratic and participatory approaches to educational governance based on the recognition of education as a shared endeavour and responsibility It will be of interest and value to students and scholars of education as a public good social justice and the wider neoliberalisation of the education sector
