*Advancing Business Ethics Education* Diane L. Swanson, Dann G. Fisher, 2008-04-01 This book features sixteen chapters written by distinguished scholars who collectively point to a roadmap for advancing business ethics education at a critical juncture in the history of corporate America The editors frame the book with an introductory chapter that details a gold standard for delivering ethics in the business school curriculum that signals to students that ethics matters provides an adequate counterbalance to the amoral subtext that dominates much of business education remedies assessment problems associated with current accrediting standards and prepares students for newly minted and fast growing careers in ethics compliance risk management and corporate social responsibility The chapters that follow lay out some challenges and opportunities that administrators and educators need to address in order to improve business ethics education and business school reputations in a post Enron climate Both traditional and experimental perspectives on delivering ethics in the curriculum are covered in conjunction with research that substantiates the potential for improving student ethics competencies after exposure to ethics coursework Methods for incorporating ethics in various subjects including accounting corporate governance environmentalism global business managerial decision making and human resource management are

also given as part of the roadmap for advancing business ethics education      *The Coup at Catholic University* Peter M. Mitchell, 2015 1968 witnessed perhaps the greatest revolution in the history of the Catholic Church in the United States It was led by Fr Charles Curran professor of Theology at the Catholic University of America in Washington with more than 500 theologians who signed a Statement of Dissent that declared Catholics were not bound in conscience to follow the Church's teaching in the encyclical of Pope Paul VI *Humanae Vitae* that artificial contraception is morally wrong because it is destructive of the good of Christian marriage The battle at Catholic University centered on the major question in Catholic higher education during the turbulent years after the Second Vatican Council What is the meaning of academic freedom at a Catholic university Curran and the dissenting theologians maintained they needed to be free to teach without constraint by any outside authority including the bishops The bishops maintained that the American tradition of religious freedom guaranteed the right of religiously affiliated schools to require their professors to teach in accord with the authority of their church This clash over the authority of the Magisterium of the Church within its own academic institutions was at the heart of the dramatic clash which unfolded at CUA This book uses never before published material from the personal papers of the key players at CUA to tell the inside story of the dramatic events that unfolded there in the late 1960's Beginning with the 1967 faculty led strike in support of Curran this book reveals the content of the internal discussions between the key bishops on the CUA Board of Trustees Incorporating personal interviews with Curran the author presents a balanced account of the deep frustration and anger against the institutional authority of the Church which played into the hands of the dissenting theologians This work attempts to disprove both the standard liberal and conservative interpretation of the events of 1968 suggesting that the culture of dissent was a direct fruit of the excessive legalism and authoritarianism which marked the Church in the United States during the years preceding Vatican II Because the polarization in 1968 has continued to define the experience of many American Catholics and has had an ongoing effect on Catholic education this work should be extremely interesting to those who wish to understand the recent past so as to move forward into the 21st century with a greater awareness of the strengths and weaknesses of Catholic education in the United States      *Business Ethics* Paul E. Peterson, O.C. Ferrell, 2016-07-22 The many recent high profile corporate scandals highlight the need for companies to do a better job of integrating ethics and responsibility into business decisions and for business schools to integrate ethics awareness and training into their curricula This volume sets the agenda for business ethics and corporate responsibility in the future It brings together ideas challenges and proposed solutions for thinking about and implementing effective ethics programs in business schools and business organizations Edited by two highly regarded business educators and featuring contributions by leading scholars and administrators *Business Ethics New Challenges for Business Schools and Corporate Leaders* covers all dimensions of ethical decision making individual organizational and societal The thirteen original chapters offer new and emerging perspectives for creating ethical business leadership and developing organizational ethics initiatives

**Ethics at Work** Barbara Goodwin, 2001-11-30 What would tempt you to whistleblow Do Codes of Conduct make organisations ethical How do people react to taking the blame for others This book answers such questions drawing on the views of employees in eight large organisations One finding is the whitened sepulchre phenomenon an organisation which presents a squeaky clean image to the world but has intrinsic failings which cause moral dilemmas for staff While treatment of customers is regulated by Codes and Charters internal organisation is typically more anarchic The study also exposes the moral conflicts generated by party political machinations in organisations with democratic governance The book offers a unique perspective on ethical attitudes at work and reactions to responsibility and accountability It finds that although religious belief is declining strong moral beliefs still thrive and ethical employees abound It highlights the importance of empowerment procedures and professionalism in creating the moral organisation This original study will interest practitioners in business the public sector and NGOs especially human resources professionals as well as philosophers and business ethicists
