**Power and Moral Education in China** Wangbei Ye,2014-04-15 Chinese moral education reform in the last three decades represents the most significant decentralization of decision making power since the foundation of People's Republic of China in 1949 On one hand it shows how de politicized China's moral education curriculum has become following the introduction of China's Open door policy and economic reforms and the resultant social transformations On the other hand it reveals persistent problems in moral education caused by political stresses and tight state control To explain these tensions Power and Moral Education in China analyzes the characteristics of power relationships in school moral education curriculum goal setting content and pedagogy selection and implementation The ultimate purpose is to identify not only what factors impact Chinese moral education curriculum decision making at the school level but also how and why Through a multiple case study conducted during 2008 in three schools in Shenzhen City and based on four major data collection instruments observation interview questionnaire and document review Wangbei Ye analyzes how power relationships have evolved in school moral education and how and why school power affects school moral education Contrary to the common belief that Chinese schools are passively impacted by external forces in moral education curriculum development this book suggests that school power is a semi emancipatory relationship that acts as a major force shaping moral education This means that although both the Chinese Communist Party and the state are positioned to control schools and moral education schools nonetheless have the power to either negotiate for more influence or partly emancipate themselves by collaborating with other external forces responding to grass root needs empowering school teachers and adjusting internal school management style This helps to explain the influence of Chinese schools in moral education and suggests a broader theory of power relationships in curriculum

**Seeking Integrity in Teacher Education** Ann Katherine Schulte,2008-11-01 In this book a teacher educator examines her practice as a way of learning about teaching as well as challenging teacher education

It is about how one teacher educator sought to transform the perspectives of her student teachers in order to better prepare them to teach diverse populations of students while challenging her own beliefs about how best to do that The author seeks integrity in her practice defined as her ability to enact what she teaches preservice teachers to do In particular this book is a self study that contributes to understanding the broader question How much can one affect and change the discourse within education when one also inhabits the characteristics that are privileged by the institution The teacher education literature supports the need to study this type of self reflection Other researchers have pointed out that the role of teacher educators cultural identities in reforming education has been largely ignored in the literature This book offers a unique perspective on the analogous relationship involved when a teacher educator teaches teachers how to examine the impact of their own identities on their teaching while examining that herself
