Without Frontiers Mark Leonard, 1997 *Europe Without Borders* Isaac Stanley-Becker, 2025-01-14 The contested creation of free movement for people and goods in the Schengen area of Europe Europe is a place of free movement among nations or is it The Schengen area established in 1985 and today encompassing twenty nine European countries allows people goods and capital to cross borders without restraint Schengen transformed European life advancing both a democratic project of transnational citizenship and a neoliberal project of international free trade But the right of free movement always excluded non Europeans especially migrants of color from former colonies of the Schengen states In *Europe without Borders* Isaac Stanley Becker explores the contested creation of free movement in Schengen from treaty-making at European summits and disputes in international courts to the street protests of undocumented immigrants who claimed free movement as a human right Schengen laid the groundwork for the making of a single market and the founding of the European Union Yet its emergence is one of the great untold stories of modern European history one hidden in archives long embargoed Stanley Becker is among the first to have access to records of the treaty-making such as letters between France's François Mitterrand and West Germany's Helmut Kohl and *Europe without Borders* offers a pathbreaking account of Schengen's creation Stanley Becker argues that Schengen gave a humanist cast to a market paradigm but even in pairing the border crossing of human beings with the principles of free market exchange this vision of free movement was hedged by alarm about foreign migrants Meanwhile these migrants the sans papiers saw in the promise of a borderless Europe only a neocolonial enterprise *Global Classrooms: Learning Without Borders in the Digital Era* Ahmed Musa, 2025-01-13 *Global Classrooms* explores how the digital era has broken down geographical barriers in education creating opportunities for learning without borders This book examines how online platforms virtual exchanges and digital tools are transforming classrooms around the world enabling students from different cultures and backgrounds to connect collaborate and share knowledge With an emphasis on the benefits of global education and cultural exchange *Global Classrooms* discusses how technology can democratize learning making high quality education accessible to anyone anywhere It also addresses the challenges of online education such as digital literacy and access to technology while offering solutions for educators and students to maximize the potential of this new global learning landscape **Economics without Borders** Richard Blundell, Estelle Cantillon, Laszlo Matyas, Barbara Chizzolini, Marc Ivaldi, Wolfgang Leininger, Ramon Marimon, Frode Steen, 2017-04-27 This book uses surveys to bridge the gap between studies into European economics and policymaking in Europe It is also available as open access **Citizens Without Frontiers** Engin F. Isin, 2012-11-02 States define who their citizens are and exert control over their life and movements But how does such power persist in a global world where people ideas and products constantly cross the borders of what the states see as their sovereign territory This

groundbreaking work sets to examine and interprets such challenges to offer a new way of thinking about citizenship Abandoning the sovereignty principle it develops a new image of citizenship using the connectedness principle To do so it interprets acts of citizenship by following activist citizens across the world through case studies from Wikileaks and the Gaza flotilla to China's virtual world and Darfur Written by a leader in the field this accessible and original work imagines citizens without frontiers as a politics without community and belonging inclusion without exclusion where the frontier becomes a form of otherness that citizens erase or create This unique work brings forth a new and creative way to approach citizenship beyond boundaries that will appeal to anyone studying citizenship social movements and migration *European and International Perspectives on Telematics in Healthcare* Stephan H. Europe The book offers both a synthesis of current theoretical methodological approaches and an analysis of selected case studies provided by internationally acknowledged scholars It represents a valuable instrument for researchers and students of social and spatial integration human and political geographers social anthropologists and social and political scientists as well as language planners
