Whitaker's Cumulative Book List ,1984
International Handbook on Geographical Education Rod Gerber,2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical

education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

The Congregationalist and Christian World, 1902

The Oxford Handbook of Identities in Organizations Andrew D. Brown, 2020-01-16 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity

issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

The Pixelated Prisoner Carolyn McKay, 2018-06-13 Technological linkages between justice and law enforcement agencies are radically altering criminal process and access to justice for prisoners Video links integral to an increasingly networked justice matrix enable the custodial appearance of prisoners in remote courts and are becoming the dominant form of court appearance for incarcerated defendants This book argues that the incorporation of such technologies into prisons is not without consequence technologies make a critical difference to prisoners experiences of criminal justice By focusing on the prison endpoint and engaging with the population most affected by video links the prisoners themselves this book interrogates the legal and conceptual shifts brought about by the technology s displacement of physical court appearance The central argument is that custodial appearance has created a heightened zone of demarcation between prisoners and courtroom participants This demarcation is explored through the transformed spatial corporeal and visual relationships The cumulative demarcations challenge procedural justice and profoundly recompose prisoners legal experiences in ways not necessarily recognised by policy makers
