Educational Administration An Introduction 2nd Ed:

Introduction to Educational Administration Douglas J. Fiore, 2004 This comprehensive and practical text introduces your students to concepts and theories of educational administration. It is unlike other texts which are structured in isolated units. Instead, the topics in this book are connected and presented in the context of the ISLLC standards which reveal the real world of practicing school administrators. *Introduction to Educational Administration* Douglas J. Fiore, 2009 First Published in 2009 Routledge is an imprint of Taylor Francis, an information company. **Educational Administration** Ralph B. Kimbrough, Michael Y. Nunnery, 1983 *The School Superintendent* Theodore J. Kowalski, 2006 The School Superintendent: Theory, Practice and Cases is both a textbook and reference for practitioners. **Contemporary School Administration** Theodore J. Kowalski, Ulrich C. Reitzug, 1993 **The School Principal** Theodore J. Kowalski, 2010-08-14 Over the past two decades, efforts to improve schools have significantly modified role expectations for principals. Today, school level administrators are expected to be both visionary leaders and competent managers. Based on the conviction that administration is an amalgam of leadership and management, *The School Principal* emphasizes the need for practitioners to apply conceptual skills to make what to do decisions, to apply technical skills to make how to do decisions, and to apply relational skills to engage in democratic decision making. Kowalski frames the book with a discussion of the nature of schools, the roles of principals, and their need to improve schools. The book then provides a balanced treatment of leadership and management, covering issues of personal behavior, instructional leadership, relationship building, issues, finances, facilities, personnel management, pupil services, and maintaining safe schools. The text closes with a discussion of the vital aspects of practice for contemporary principals, addressing problem solving, collaborative change strategies, and personal commitment to being a principal. Special Features: Vignettes introduce the subject matter in the context of common challenges faced by practitioners; Knowledge Based Questions and Skill Based Activities prompt readers to engage with and reflect on the chapter content. *The School Principal* aligns with the Educational Leadership Consortium Council (ELCC) Standards, treating principals as concurrently visionary leaders and competent managers. This excellent text addresses the needs of aspiring and practicing principals, providing the tools to build effective and efficient schools. **School Leadership and Administration** Allan Walker, Clive Dimmock, 2012-11-12 This text calls for a broader approach to comparative educational administration, one which uses culture as the principle means of analysis. The articles collected by Allan Walker and Clive Dimmock detail the educational practices and outcomes of other systems while taking into account the mediating influence of culture. In this way, these essays stress the specific aspects of the cultures studied and map out common ground for the study of administrators' values, beliefs, and actions. **Handbook of Education Politics and Policy** Bruce S. Cooper, James G. Cibulka, Lance D. Fusarelli, 2008-06-30 Written by a mix of established and rising stars in school politics, policy, law, finance, and reform, this comprehensive Handbook provides a three-part framework that helps organize this relatively new and loosely organized field.

of study A central theme running through the book is how to harness politics to school equity and improvement Key features include Thematic Discussions detailed discussions of key topics in educational politics are organized by themes and competing perspectives The overarching themes are 1 the goals of the U S political system justice equity opportunity efficiency and choice 2 the means and resources for reaching these goals and 3 the political behaviors and compromises that seek to mitigate ideological differences and conflicts of interest Research Oriented in addition to summarizing the latest research connected to key topics each chapter exemplifies and reports on the methods and techniques for further exploration of these topics Reform Oriented throughout the book and especially in the summarizing chapter authors provide suggestions for improving the political behaviors of key educational groups and individuals unions superintendents politicians school boards teachers and parents

Political Philosophy, Educational Administration and Educative Leadership Reynold Macpherson, 2013-10-01 In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice research and theory of educational administration and educational leadership Divided into four parts the book introduces the sub discipline of political philosophy to the field of educational administration management and leadership It does this by clarifying the knowledge domain of each and identifying how four political ideologies specifically pragmatism communitarianism communicative rationalism and egalitarian liberalism have primarily informed and surreptitiously provided contestable justifications for power in the development of practice research and theory in the field of study The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy The final part uses the sub discipline to critique the author's decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology it favours neo pragmatism Political Philosophy Educational Administration and Educative Leadership will provide practitioners researchers and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions limits and tools of political philosophy
