Subcommittee on Select Education, 1980 *Assessment of Young Developmentally Disabled Children* Theodore D. Wachs, Robert Sheehan, 1988-05-31 Our knowledge of the cognitive and social emotional functioning of developmentally disabled infants and preschoolers derives in large part from our assessment of such children This book has been developed to familiarize readers with the characteristics of developmentally disabled children and to introduce to readers aspects of measurement that are of relevance to the assessment of atypical infants and preschoolers The book has been developed with clinicians and prospective clinicians in mind These are individuals who are committed to the care and education of developmentally disabled infants and preschoolers and the families of those children The book has thus been written to provide support for the use of assessment data in planning early intervention programs Of special note in the development of this edited book is that it is divided into four major parts with interrelated chapters in each part The authors of chapters in Parts II and III had access to the chapters in Part I before writing their chapters The summary chapters found in Part IV were similarly written by authors having access to all chapters in Parts I III This approach to the development of an

edited book was chosen as a way of ensuring an integration of major concepts throughout the book This process is also a reflection of our belief that assessment is an interdisciplinary process involving the synthesis of a number of diverse interests **Encyclopedia of Special Education** Cecil R. Taylor, Les Sternberg, 2012-12-06 *Exceptional Children Integrating Research and Teaching* provides a comprehensive introduction to the constantly changing area of special education The book is research based and its title reflects our opinion regarding the important link between research and classroom practice There is one feature of *Exceptional Children Integrating Research and Teaching* that warrants attention and perhaps justification it was written specifically to address the graduate student or sophisticated undergraduate student market As such the book is written at a higher level and with a greater concept density than typical introductory special education texts We feel that this type of book is very much needed and will be received favorably by the special education community There are also several unique features of *Exceptional Children Integrating Research and Teaching* that we feel will be quite valuable First we have emphasized the area of teaching practices and not simply included basic facts about definitions characteristics and causes Although some introductory texts include information about teaching considerations that area is not discussed as in depth as it is in our text We feel that it is important that readers not only understand the educational needs of exceptional children but also can identify the best educational practices to meet those needs

Subcommittee on Elementary, Secondary, and Vocational Education, 1977 *Adapted Physical Activity* Gudrun Doll-Teppe, Christoph Dahms, Bernd Doll, Harald v. Selzam, 2012-12-06 From 21-24 June 1989 the International Federation of Adapted Physical Activity IFAPA held its 7th International Symposium Adapted Physical Activity An Interdisciplinary Approach in Berlin West This was the first time that this symposium has been held in a German speaking country and it presented unique challenges to the organizers For example neither the term nor the field of adapted physical activity was known in Germany before the symposium Thus at the outset the organizers task was to define the meaning of adapted physical activity as a concept and to identify areas and professionals associated with it After lengthy and intense discussions we agreed on the following definition Adapted physical activity refers to movement physical activity and sports in which special emphasis is placed on the interests and capabilities of individuals with limiting conditions such as the disabled health impaired or aged Despite the fact that the use of an English term for a symposium in Germany would not be accepted by all

German speaking professionals it was decided to use this term because no translation appeared to be fully adequate Sports for the Disabled Modified Movement Activities Sport Therapy or Psychomotor Exercises would have represented only single aspects of adapted physical activity and were thus incomplete Timms V.
