Teaching Fundamental Concepts of Informatics Juraj Hromkovič,Rastislav Královic,Jan Vahrenhold,2009-12-02 The International Conference on Informatics in Secondary Schools Evolution and Perspective ISSEP is an emerging forum for researchers and practitioners in the area of computer science education with a focus on secondary schools The ISSEP series started in 2005 in Klagenfurt and continued in 2006 in Vilnius and in 2008 in Torun The 4th ISSEP took part in Zurich This volume presents 4 of the 5 invited talks and 14 regular contributions chosen from 32 submissions to ISSEP 2010 The ISSEP conference series is devoted to all aspects of computer science teaching In the preface of the proceedings of ISSEP 2006 Roland Mittermeir wrote ISSEP aims at educating informatics proper by showing the beauty of the discipline hoping to

create interest in a later professional career in computing and it will give answers different from the opinion of those who used to familiarize pupils with the basics of ICT in order to achieve computer literacy for the young generation This is an important message at this time when several countries have reduced teaching informatics to educating about current software packages that change from year to year The goal of ISSEP is to support teaching of the basic concepts and methods of informatics thereby making it a subject in secondary schools that is comparable in depth and requirements with mathematics or natural sciences As we tried to present in our book *Algorithmic Adventures*
