*Edge of a Continent* Donald Greame Kelley, 1971      *Edge of a Continent* Don G. Kelley, 1971-05      **Report to Congress, Coastal Barrier Resources System** Joel Walker Hedgpeth, 1988      **Dominion from Sea to Sea** Bruce Cumings, 2009-11-17 America is the first world power to inhabit an immense land mass open at both ends to the world's two largest oceans the Atlantic and the Pacific This gives America a great competitive advantage often overlooked by Atlanticists whose focus remains overwhelmingly fixed on America's relationship with Europe Bruce Cumings challenges the Atlanticist perspective in this innovative new history arguing that relations with Asia influenced our history greatly Cumings chronicles how the movement westward from the Middle West to the Pacific has shaped America's industrial technological military and global rise to power He unites domestic and international history international relations and political economy to demonstrate how technological change and sharp economic growth have created a truly bicoastal national economy that has led the world for more than a century Cumings emphasizes the importance of American encounters with Mexico the Philippines and the nations of East Asia The result is a wonderfully integrative history that advances a strong argument for a dual approach to American history incorporating both Atlanticist and Pacificist perspectives      **Northern California Proposed Oil and Gas Lease Sale No.91**, 1987      **Northern California Proposed Oil and Gas Lease Sale 91** United States. Minerals Management Service, 1987      *Wildlife and America*, 1978      *Deep California* Craig Chalquist, 2008-06 California has been invaded by three imperial powers Spain Mexico and the United States Deep California examines in depth the lingering psychological traumas and motifs emanating from that long history of conquest These unhealed events have not been left in the past they recur symbolically again and again growing in intensity as the overbuilt land and its distracted occupiers unconsciously but definitively demonstrate that environmental justice and social justice can no longer be thought of as separate Pacing crusaders and colonizers from county to county along El Camino Real Deep California studies the lingering impact of continuous oppression of people and places as images and themes of displacement and exile filter down into architecture agriculture politics art culture psychology and even folklore and dream Yet within the shadows cast over California also dwell resistance humor irony tragedy and hope for more heartfelt and soulful connections to this story rich land of the sundown sea History is an inadequate term for such a sweeping and deep discovery of how the past informs the present This work deserves to be read widely by all Californians and Americans and taken to heart and the hard lessons applied to all places we inhabit on this stolen land Lesley Thomas author of *Flight of the Goose* Far Eastern Press 2005 A monumental and much needed study in depth of the conquest occupation traumatization and animation of the mission cities and counties of coastal California places which have worked their way into our unsuspecting psyches Linda Buzzell MA MFT co editor of *Ecotherapy Healing with Nature in Mind* Sierra Club Books 2009      **The Human Shore** John R. Gillis, 2012-10-17 Since before recorded history people have congregated near water But as growing populations around the

globe continue to flow toward the coasts on an unprecedented scale and climate change raises water levels our relationship to the sea has begun to take on new and potentially catastrophic dimensions The latest generation of coastal dwellers lives largely in ignorance of the history of those who came before them the natural environment and the need to live sustainably on the world's shores Humanity has forgotten how to live with the oceans In *The Human Shore* a magisterial account of 100 000 years of seaside civilization John R Gillis recovers the coastal experience from its origins among the people who dwelled along the African shore to the bustle and glitz of today's megacities and beach resorts He takes readers from discussion of the possible coastal location of the Garden of Eden to the ancient communities that have existed along beaches bays and bayous since the beginning of human society to the crucial role played by coasts during the age of discovery and empire An account of the mass movement of whole populations to the coasts in the last half century brings the story of coastal life into the present Along the way Gillis addresses humankind's changing relationship to the sea from an environmental perspective laying out the history of the making and remaking of coastal landscapes the creation of ports the draining of wetlands the introduction and extinction of marine animals and the invention of the beach while giving us a global understanding of our relationship to the water Learned and deeply personal *The Human Shore* is more than a history it is the story of a space that has been central to the attitudes plans and existence of those who live and dream at land's end *The American West*, 1974
