Transforming Health Care Through Information: Case Studies Laura Einbinder,Nancy M. Lorenzi,Joan Ash,Cynthia S. Gadd,Jonathan Einbinder,2010-03-14 By any measure our field of clinical informatics is poised for rapid growth and expansion A confluence of forces and trends including pressure to contain health care costs and simultaneously expand access and coverage a desire to reduce medical error and health care disparities the need to better understand and optimize our clinical interventions and delivery systems the need to translate new knowledge into practice quickly and effectively and the need to demonstrate the value of our services all call for the application of the methods and techniques of our field some of which are well honed with experience and some of which are still in the process of being discovered Clinical informatics is not the only solution to what ails health care but it is a critical component of the solution Our methods and techniques are similar in many ways to the knowledge base of any interdisciplinary field some are informed by experience the trials and tribulations of figuring out what works through real world implementation some are informed by controlled experimentation

in randomized controlled trials and related studies some are informed by critical observation and analysis and some are developed through laboratory evaluation rather than field trials As we develop both the basic science as well as the applied science of our field there is a critical role for learning from others by way of case reports and stories

Making Healthcare Care Hugo Letiche,2008-10-01 In this volume Hugo Letiche tackles the all important question is there care in healthcare If as Klaus Krippendorff 2006 argues meaning is a structured space a network of expected senses a set of possibilities that emerges in the use of language then within the healthcare systems of today the meaning of care has been defined to be the eradication of a problem We must recognize that patients do not wish to be regarded

merely as a problem requiring eradication Letiche is opposed to the very idea that complexity reduction can address the humanity of each individual healthcare situation He argues that through narratives and through complexity based social theory the complexity of each individual situation must be transcended through mindful listening and engaged dialogue Letiche suggests that in the absence of such mindfulness the lack of time for true listening and the inability of providers and systems to allow for patients and family to engage in dialogue lies both the roots of the problem and the potential for its solution If complexity theory has a role in the analysis understanding and betterment of social systems then approaches such as the one Letiche undertakes herein will become essential tools of the trade
