Françoise Dastur is well respected in France and Europe for her mastery of phenomenology as a movement and her clear and cogent explications of phenomenology in movement. These qualities are on display in this remarkable volume. Dastur guides the reader through a series of phenomenological questions: language and logic, self and other, temporality and history, finitude and mortality, that also call phenomenology itself into question, testing its limits and pushing it in new directions. Like Merleau-Ponty, Dastur sees phenomenology not as a doctrine, a catalogue of concepts and catchphrases authored by a single thinker, but as a movement in which several thinkers participate, each inflecting the movement in unique ways. In this regard, Dastur is both one of the clearest guides to phenomenology and one of its ablest practitioners. *Historical Dictionary of Husserl's Philosophy* John J.

Rață,2014-09-18 This volume Applied Social Sciences Philosophy and Theology provides the reader with an important set of essays related to the two aforementioned fields of study Aesthetics plays a key role in contemporary philosophy and several authors examine its various aspects such as the question of identification of works of art the concept of social aesthetics the social therapeutic function that art can have and the relationships among hermeneutics aesthetics and communication sciences Other papers deal with ethical issues such as the role of human values in applied ethics and moral determinations in public life The meaning and role of postmodernism in philosophy and society is examined at length in various contributions to the volume and the same is true for phenomenology at large Even the theoretical seduction and practical failure of Marxism is addressed while anthropological issues are studied with reference to truth and other key philosophical concepts John Searle s theory of intentionality is seen as a factor for creating social institutions and the real meaning of globalization is investigated in another article Many essays deal directly with theological and religious topics For instance the alleged illusion of religion versus its persistency is analyzed along with the current relations between Church and civil government in Romania the presence of different forms of Christianity in the Romanian nation the dialogue between social theology and anthropological research and the antinomic nature of the Church All papers included in the volume are original and open new perspectives on the many issues addressed by the authors Even the philosophical styles are different hermeneutics analytic philosophy historical approach postmodernism communication theory and linguistic approach Some papers are theoretical and others have a more empirical or historical flavour There is however an underlying unity because they all purport to provide new ideas to professionals involved in the socio humanistic field The information is divided into chapters in order to help readers to form by themselves an image of the issues that are studied However the volume is not addressed only to specialists and is accessible to a wider public interested in an interdisciplinary approach Philosophy.

Phenomenology, Sciences Carlo Ierna,Hanne Jacobs,Filip Mattens,2011-02-01 The present volume contains many of the papers presented at a four day conference held by the Husserl Archives in Leuven in April 2009 to c memorate the one

hundred and fortieth anniversary of Edmund Husserl's birth The conference was organized to facilitate the critical evaluation of Husserl's philosophical project from various perspectives and in light of the current philosophical and scientific climate Still today the characteristic tension between Husserl's concrete and detailed descriptions of consciousness on the one hand and his radical philosophical claim to ultimate truth and certainty in thinking feeling and acting on the other calls for a sustained reflection on the relation between a Husserlian phenomenological philosophy and philosophy in general What can phenomenological reflection contribute to the ongoing discussion of certain perennial philosophical questions and which philosophical problems are raised by a phenomenological philosophy itself In addition to addressing the question of the relation between phenomenology and philosophy in general phenomenology today cannot avoid addressing the nature of its relation to the methods and results of the natural and human sciences In fact for Husserl phenomenology is not just one among many philosophical methods and entirely unrelated to the sciences Rather according to Husserl phenomenology should be a first philosophy and should aim to become the standard for all true science

Phenomenology/Ontopoiesis Retrieving Geo-cosmic Horizons of Antiquity Anna-Teresa Tymieniecka, 2011-08-10 The controversy of flux and stasis as the groundwork of reality of Greek ancient philosophy reached its crux in the all encompassing doctrine of the logos by Heraclitus of Ephesus It centers upon human soul in its role with the cosmos Philosophy of the Occident corroborating Greek insights with the progress of culture in numerous interpretations Kant Kierkegaard Husserl Merleau Ponty Ricoeur presented in this collection has neglected the cosmic sphere While contemporary development of science revealed its grounding principles papers by Grandpierre Kule and Trutty Coohill the ancient logos fully emerges Thus logos hitherto hidden in our commerce with earth is revealed in its intertwinings with the cosmos through the trajectories of the phenomenology onto poiesis of life Tymieniecka The crucial link between the soul and the cosmos in a new geo cosmic horizon is thus being retrieved

The Oxford Handbook of Levinas Michael L. Morgan, 2019-04-10 Emmanuel Levinas 1906 1995 emerged as an influential philosophical voice in the final decades of the twentieth century and his reputation has continued to flourish and increase in our own day His central themes the primacy of the ethical and the core of ethics as our responsibility to and for others speak to readers from a host of disciplines and perspectives However his writings and thought are challenging and difficult The Oxford Handbook of Levinas contains essays that aim to clarify and engage Levinas and his writings in a number of ways Some focus on central themes of his work others on the ways in which he read and was influenced by figures from Plato Hobbes Descartes and Kant to Blanchot Husserl Heidegger and Derrida And there are essays on how his thinking has been appropriated in moral and political thought psychology film criticism and more and on the relation between his thinking and religious themes and traditions Finally several essays deal primarily with how readers have criticized him and found him wanting The volume exposes and explores both the depth of Levinas's philosophical work and the range of applications to which it has been put with special attention to clarifying why his interests in the human condition the crisis of civilization the

centrality and character of ethics and morality and the very meaning of human experience should be of interest to the widest range of readers
