Duplass, 2017-09-22 Offering a fresh take on the purpose of social studies today James A Duplass positions philosophical counseling as a way for teachers to engage students in thinking deeply about what it means to be a citizen in a democratic society The Idea of a Social Studies Education takes a

uniquely humanistic approach to the idea of a social studies education to show how teachers can act as philosophical counselors in preparing students for active civic engagement Duplass reminds the reader of the needs of students in modern society who seek to develop an identity worth living and the role social studies can play in students achieving that process By focusing on the cultivation of students autonomy authenticity efficacy and agency Duplass approach avoids political biases and instead encourages critical thinking to decipher what a democratic ideology truly is Journal of Character Education Jacques S. Benninga, Marvin W Berkowitz, 2016-12-01 The Journal of Character Education is the only professional journal in education devoted to character education It is designed to cover the field from the latest research to applied best practices We include original research reports editorials and conceptual articles by the best minds in our field reviews of latest books and other relevant strategies and manuscripts by educators that describe best practices in teaching and learning related to character education The Journal of Character Education has for over a decade been the sole scholarly journal focused on research theory measurement and practice of character education This issue includes four empirical articles and a practitioner's voice section Topics covered in this issue include different approaches to character education in the classroom e.g after school reading strategies applications to cheating and teacher preparation Equity-Centered Trauma-Informed Education (Equity and Social Justice in Education) Alex Shevrin Venet, 2021-05-25 Educators must both respond to the impact of trauma and prevent trauma at school Trauma informed initiatives tend to focus on the challenging behaviors of students and ascribe them to circumstances that students are facing outside of school This approach ignores the reality that inequity itself causes trauma and that schools often heighten inequities when implementing trauma informed practices that are not based in educational equity In this fresh look at trauma informed practice Alex Shevrin Venet urges educators to shift equity to the center as they consider policies and professional development Using a framework of six principles for equity centered trauma informed education Venet offers practical action steps that teachers and school leaders can take from any starting point using the resources and influence at their disposal to make shifts in practice pedagogy and policy Overthrowing inequitable systems is a process not an overnight change But transformation is possible when educators work together and teachers can do more than they realize from within their own classrooms *Education and Humanism* Wiel Veugelers, 2011-11-16 Human beings have the possibility to give meaning to their lives and to create coherence in experiences Present day humanism strongly focuses on personal development in relation to others It is this tension between personal development and advancement of humanization that is creating the opportunities for the personal development of every world citizen Humanism is about personal autonomy moral responsibility and about solidarity with humanity The tension between autonomy and social involvement is the core of humanism Education can support persons in their moral and personal identity development The authors brought together in this book all address issues of developing autonomy and humanity in educational practices All the chapters try to link theory and practice They either make theoretical ideas more

practical or they use practical experiences and concerns to rethink theoretical notions Together the chapters in the book give a broad overview of theoretical foundations concrete research and practices in education The book shows a diversity that can inspire scholars and practitioners in further developing their perspectives Creating meaning is an essential part of all education Focusing on the linking of autonomy and humanity is the humanist perspective in it *Ethical Leadership and Decision Making in Education* Joan Poliner Shapiro, Jacqueline A. Stefkovich, 2010-07-02 The third edition of the best selling text *Ethical Leadership and Decision Making in Education* continues to address the increasing interest in ethics and assists educational leaders with the complex dilemmas in today's challenging and diverse society Through discussion and analysis of real life moral dilemmas that educational leaders face in their schools and communities authors Shapiro and Stefkovich demonstrate the application of their four ethical paradigms the ethics of justice care critique and profession After an illustration of how the Multiple Ethical Paradigm approach may be applied to real dilemmas the authors present a series of cases written by students and academics in the field representing the dilemmas faced by practicing educational leaders in urban suburban and rural settings in an era full of complexities and contradictions Following each case are questions that call for thoughtful complex thinking and help readers come to grips with their own ethical codes and apply them to practical situations New in the Third Edition An entire new chapter on privacy versus safety including ethical issues such as strip searches gang membership cyber bullying and sexting New cases infused into chapters on early childhood education diverse student populations and technology Updates throughout to reflect contemporary issues and recent scholarship in the field of ethical leadership Including teaching notes for the instructor stressing the importance of self reflection this text is easily adaptable for a variety of uses with a wide range of audiences *Ethical Leadership and Decision Making in Education* is a valuable book for both aspiring and practicing administrators teacher leaders and educational policy makers

International Research Handbook on Values Education and Student Wellbeing Terence Lovat, Ron Toomey, Neville Clement, 2010-08-05 Informed by the most up to date research from around the world as well as examples of good practice this handbook analyzes values education in the context of a range of school based measures associated with student wellbeing These include social emotional moral and spiritual growth elements that seem to be present where intellectual advancement and academic achievement are being maximized This text comes as values education widens in scope from being concerned with morality ethics civics and citizenship to a broader definition synonymous with a holistic approach to education in general This expanded purview is frequently described as pedagogy relating to values and wellbeing This contemporary understanding of values education or values and wellbeing pedagogy fits well with recent neuroscience research This has shown that notions of cognition or intellect are far more intertwined with social and emotional growth than earlier educational paradigms have allowed for In other words the best laid plans about the technical aspects of pedagogy are bound to fail unless the growth of the whole person social emotional moral spiritual and intellectual is the pedagogical

target Teachers and educationalists will find that this handbook provides evidence culled from both research and practice of the beneficial effects of such a values and wellbeing pedagogy *Ethics Across the Curriculum—Pedagogical Perspectives*
Elaine E. Englehardt, Michael S. Pritchard, 2018-05-08 This book features articles by more than twenty experienced teachers of ethics who are committed to the idea that ethics can and should be taught virtually anywhere in the education curriculum They explore a variety of ways in which this might best be done Traditionally confined largely to programs in philosophy and religion the teaching of ethics has in recent decades spread across the curriculum education The contributors to this book discuss the rationale for supporting such efforts the variety of challenges these efforts face and the sorts of benefits faculty and students who participate in ethics across the curriculum endeavors can expect An overriding theme of this book is that the teaching of ethics should not be restricted to one or two courses in philosophy or religion programs but rather be addressed wherever relevant anywhere in the curriculum For example accredited engineering programs are expected to ensure that their students are introduced to the ethical dimensions of engineering This can involve consideration of ethical issues within particular areas of engineering e g civil mechanical electrical chemical as distinctive segments of certain courses e g those that focus on design problems or as a full semester course in ethics in engineering Similar approaches can be taken in nursing medicine law social work psychology accountancy management and so on That is some emphasis on ethics can be expected to be found in broad range of academic disciplines However many ethical issues require careful attention from the perspectives of several disciplines at once and in ways that require their joining hands Recognizing that adequately addressing many ethical issues may require the inclusion of perspectives from a variety of disciplines makes apparent the need for effective communication and reflection across disciplines not simply within them This in turn suggests that faculty and their students can benefit from special programs that are designed to include participants from a variety of disciplines Such programs will be a central feature of this book Although some differences might arise in how such issues might best be discussed across different parts of the curriculum these discussions might be joined in ways that help students faculty administrators and the wider public better appreciate their shared ethical ground Education and Human Values
Michael Slote, 2013 Two of our greatest educational theorists John Dewey and Nel Noddings have been reluctant to admit that some students are simply more talented than others This was no doubt due to their feeling that such an admission was inconsistent with democratic concern for everyone But there really is such a thing as superior talent and the present book explains how that admission is compatible with our ideals of caring and democracy Traditionalists confident that some disciplines are more important than others haven't worried that that way of putting things threatens to make those who are excluded feel quite bad about themselves But an ethics of care can show us how to make these differences much less hurtful and more morally acceptable than anything that has been proposed by traditionalists So the present book offers a middle way between the denial of the reality of superior talents and an insensitive insistence on that reality It argues that care ethics

gives us a way to do this and it bases that claim largely on the promise of such an ethics for moral education in schools and in homes It is argued on psychological grounds that caring can only take place on the basis of empathy for others and the book shows in great detail how empathy can be encouraged or develop in school and home contexts Other approaches to moral education like Kantian cognitive developmentalism and Aristotelian character education can't account for increasing moral motivation in the way that an emphasis on the development of empathy allows And in the end it is only students educated via care ethics who will be sensitive to one another in a way that largely undercuts the negative psychological impact of educational institutions and practices that acknowledge the greater talents or creativity that some students have

Critical Voices in Science Education Research Jesse Bazzul, Christina Siry, 2019-01-23 This book is a collection of narratives from a diverse array of science education researchers that elucidate some of the difficulties of becoming a science education researcher and or science teacher educator with the hope that through solidarity commonality and telling the story justice oriented science education researchers will feel more supported in their own journeys Being a scholar and teacher that sees science education as a space for justice and thinking being different entry into this disciplinary field often comes with tense moments and personal difficulties The chapter authors of this book break into many painful awkward and seemingly nebulous topics including the intersectional nuances of what it means to be a researcher in the contexts of epistemic rigidity white supremacy and neoliberal restructuring Of course these contexts become different depending on how teachers students and researchers are constituted within them as racialized sexed gendered disposable valued subjects We hope that within these narratives readers will identify with similar struggles in terms of what it means to desire to do good in the world while facing subtle and not so subtle institutional personal cultural and political challenges
