policymaker Meredith Edwards takes us inside the process to reveal how we get the policies that affect so much of our lives. Paul Kelly International Editor. This innovative and important volume, unique in the policy literature, provides ideas and case studies of interest to everyone who cares about the quality of Australian public policy. It will be an indispensable guide to past choices and its lessons should help shape future Australian social policy decisions. Dr Glyn Davis, co-author of *The Australian Policy Handbook*. How are social policies conceived, developed and put into practice? Based on four case studies of social policy reforms in which the author was a major player: the Child Support Scheme, AUSTUDY, the Higher Education Contribution scheme, HECS, and long-term employment policies presented as Working Nation Social Policy. Public Policy provides insights into what is often otherwise seen as a black box on how policy advice occurs. Meredith Edwards' personal experience, revealed in extracts from her journal, provides a picture of what social policy participants actually do, something on which too little has been written. Questions addressed in the book include: How was the policy problem identified and articulated and by whom? What were the key ingredients in policy analysis? When did consultation occur and in what form? How was the policy decision arrived at? What were the events between decision and implementation? And what evaluation processes occurred? Social Policy: Public Policy is essential reading for all students of public policy and policy advisers.

Teaching and Learning in Higher Education in India and Australia James Arvanitakis, Sudhanshu Bhushan, Nayantara Pothen, Aarti Srivastava, 2019-07-11. This book presents insights into the current state of higher education, emerging pedagogies and innovative technology-driven learning techniques in research and teaching. Focussing specifically on the higher education models in India and Australia, the volume explores concerns and policy interventions that will help promote research capability and culture. Globalisation, rise of information technology and the massification of education has shifted the foundations of higher education and universities in the world. This volume examines the best support structures that will allow educators to face the challenge of the increasingly diverse community of learners and teachers entering higher education, their varied levels of aspirations and expectations, the influence of technology in pedagogical practices and the shrinking funds for teaching and research. By using case studies from India and Australia, the book also looks at the benefits of cross-cultural collaborations in research and education. Comprehensive and resourceful, this volume will be useful for academics and scholars of education, higher education and research, sociology, public policy, development studies and for NGOs and think tanks working in these areas. *Resources in Education*, 2001-10.

Universities and Globalization Ravinder Kaur Sidhu, 2006-08-15. *Universities and Globalization: To Market To Market* examines the operations of power and knowledge in international education under conditions of globalization with a focus on the three biggest exporters of higher education: the United States, Australia, and the United Kingdom. An interdisciplinary approach based on the core social sciences is used to explore the power relations that shape global education networks. The role of nation states in creating the conditions for education markets and the desire for a Westernized template of international education in the postcolonial world is discussed. The volume offers a sophisticated attempt to recast international education as a series of geopolitical and geoeconomic engagements that transcend simple supply and demand dynamics. Engaging with the theoretical debates about education and globalization, this book examines global cultural flows and boundary crossings, the cultural economy of education networks, and the possibilities for supra-territorial subjectivities. International education markets are examined from the perspectives of both first world producers and postcolonial consumers. By investigating how first world universities imagine and enact the global in their marketing practices, the expressions of cultural diversity valued

by education markets and the types of individual and institutional subjectivities merging from markets Universities and Globalization To Market To Market offers students faculty administrators marketing consultants and others who work in the area a highly nuanced account of the global relations fostered by education markets This original critical examination of the forms and cultural politics of international education is a significant contribution to the field
