Neuropsychotherapy and Community Integration Tedd Judd,2012-12-06 The first time I walked onto a neurology ward during my graduate training I was shocked much as family members of people with brain illnesses probably are I had learned a great deal in class about aphasia amnesia agnosia apraxia and other cognitive disorders but I had not been prepared for the behavioral disorders I was to encounter for the severe physical disabilities for the indignities of the patient role Bit by bit I overcame this shock I learned to look people in the eye who seemed to have more tubes than the New York subway system people whose faces had been scraped off the pavement and who were drooling incontinent and severely dysarthric I learned to see beyond what frightened and repulsed me to the human beings within I wish I could say that I saw in each person a deep human soul yearning to breathe free and to love an essence an intrinsic goodness a wholeness I did not Rather it seems like each and every unique element of human behavior one s abilities and one s desires can be destroyed by some brain lesion while leaving a uniquely human person behind Not only are there losses but behaviors emerge at times that are not seen in people with intact brains but which still reveal a human attempting to cope I do feel that I saw and still see in each such person something intrinsically human but not the same thing in each The Handbook of School Psychology Cecil R. Reynolds,Terry B. Gutkin,1999 As the standard reference in the field this edited handbook focuses on how a school psychologist can operate and create change within the educational system instead of focusing solely on the diagnosis and treatment of an individual Chapters have been updated and revised to provide a contemporary view of the field
