James and Walt Disney to fashion a model of creative aging

A Social History of Knowledge II Peter Burke, 2013-04-17 Peter Burke follows up his magisterial Social History of Knowledge picking up where the first volume left off around 1750 at the publication of the French Encyclopédie and following the story through to Wikipedia Like the previous volume it offers a social history or a retrospective sociology of knowledge in the sense that it focuses not on individuals but on groups institutions collective practices and general trends The book is divided into 3 parts The first argues that activities which appear to be timeless gathering knowledge analysing disseminating and employing it are in fact time bound and take different forms in different periods and places The second part tries to counter the tendency to write a triumphalist history of the growth of knowledge by discussing losses of knowledge and the price of specialization The third part offers geographical sociological and chronological overviews contrasting the experience of centres and

peripheries and arguing that each of the main trends of the period professionalization secularization nationalization democratization etc coexisted and interacted with its opposite As ever Peter Burke presents a breath taking range of scholarship in prose of exemplary clarity and accessibility This highly anticipated second volume will be essential reading across the humanities and social sciences **Catalog of Copyright Entries.
