Frank, René Dirven, Tom Ziemke, Enrique Bernárdez, 2008-08-27 The contributions contained in the second volume of the two volume set *Body Language and Mind* introduce and elaborate upon the concept of sociocultural situatedness understood broadly as the way in which minds and cognitive processes are shaped both individually and collectively by their interaction with socioculturally contextualized structures and practices and furthermore how these structures interact contextually with language and can become embodied in it Drawing on theoretical concepts and analytical tools within the purview of cognitive linguistics and related fields the volume explores the relationship between body language and mind focusing on the complex mutually reinforcing relationships holding between the sociocultural contextualisation of language and inversely the linguistic contextualisation of culture Stated differently the notion of sociocultural situatedness allows for language to be seen as a cultural activity and at the same time as a subtle mechanism for organizing culture and thought The volume offers a representative multi and interdisciplinary collection of new papers on sociocultural situatedness bringing together for the first time a wide variety of perspectives and case studies directed explicitly to elucidating the analytical potential of this concept for cognitive linguists and other researchers working in allied fields such as AI discourse studies and cognitive anthropology The book brings together several core issues related to the notion of sociocultural situatedness some of which have been addressed previously although to a large degree sporadically and from a variety of disciplinary perspectives without fully exploring the possible analytical advantages of this concept as a tool for investigating the role of culturally entrenched schemata in cognition and language In short this is the first comprehensive survey of sociocultural situatedness theory
