This volume records the proceedings of the 5th European conference on Genetic Programming EuroGP 2002 which took place in Kinsale Ireland on April 3 5 2002 continuing an established tradition of yearly meetings among the most prominent researchers on Genetic Programming in Europe and beyond their proceedings have always been published in the LNCS series by Springer Verlag EuroGP began life in Paris in 1998 as an international workshop April 14 15 LNCS 1391 a second workshop took place in Göteborg in 1999 May 26 27 LNCS 1598 Its first appearance as a conference was in the year

2000 in Edinburgh April 15-16 LNCS 1802 followed by last year's conference held at Lake Como April 18-19 LNCS 2038. Since the beginning EuroGP has been co-located with a series of specialist workshops on applications of evolutionary algorithms LNCS 1468, 1596, 1803 and 2037. In keeping with that tradition the EvoWorkshops were also held in Kinsale this year at the same time LNCS 2279. Genetic Programming (GP) is a branch of Evolutionary Computation in which populations of computer programs are made to evolve and adapt to solving a particular problem or task by a process that draws its inspiration from Biology and Darwinian evolution. GP is a very versatile technique which has been applied to a wide range of tasks as a quick inspection of the 32 papers in these proceedings will easily reveal: economics, robotics, engineering, statistics, pharmacology, electronics and nanotechnology are but some of the domains in which they have been employed. Although the rate of application of GP to problems is steadily growing, this conference is characterized by its concern with the theoretical foundations of GP; investigation of these issues is attaining an ever increasing depth and maturity. Genetic Programming Wolfgang Banzhaf, 1998-03-25. This book presents the latest in mammary gland transgenesis: the exploitation of transgenic technology for the production of therapeutic proteins by routine or conventional methods. Following a section with an overview of all relevant methodologies, readers will find relevant information on the regulation of milk gene expression and bioreactor species such as cattle, rabbits and pigs.
