GLOBES, COORDINATES, AND MAPS

1. INTRODUCTION

1.1 Your Location in the World

You may wonder how you find a location on the Earth's surface, or how planes flying at night or ships crossing the oceans find their destinations. They use a system of coordinates that provides them with their specific location, their routes, and the location of their destinations. Each location can be found on a map or on the globe with two pieces of information: **latitude** and **longitude** (see example of three locations in the U.S. on Figure 2.1).
