Global Urban Analysis provides a unique insight into the contemporary world economy through a focus on cities. It is based upon a large scale customised data collection on how leading businesses use cities across the world as headquarter locations for finance for professional and creative services for media. Thus can the likes of London New York and Hong Kong be tracked as well as Manchester Cleveland and Guangzhou and even Plymouth Chattanooga and Xi an. Cities are assessed and ranked in terms of their importance for various functions such as for financial services legal services and advertising plus novel findings are reported for the geographical orientations of their connections. This is truly a comprehensive survey of cities in globalization covering global world regional and national scales of analysis. 4 key chapters outline the global structure of the world economy featuring the leading cities. 9 regional chapters covering the whole world also feature the level of services provided by medium cities. 22 chapters on selected countries and sub regions indicate global ness and local ness and feature an even wider range of cities.
