History: fiction or science?. Chronology 1 A. T. Fomenko,2006 The author contends that all generally accepted historical chronology prior to the 16th century is inaccurate often off by many hundreds or even thousands of years Volume 1 of a proposed seven volumes

Nationalist Imaginings of the Russian Past Konstantin Sheiko,2012-05-25 Anatolii Fomenko is a distinguished Russian mathematician turned popular history writer founder of the so called New Chronology school and part of the explosion of alternative historical writing that has emerged in Russia since the collapse of the Soviet Union Among his more startling claims are that the Old Testament was written after the New Testament that Russia is older than Greece and Rome and that the medieval Mongol Empire was in fact a Slav Turk world empire a Russian Horde to which Western and Eastern powers paid tribute While academic historians dismiss Fomenko as a dangerous ethno nationalist or post modern clown Fomenko s publications invariably outsell his conventional rivals Just as Putin has restored

Russia's faith in its future Fomenko and an army of fellow alternative historians are determined to restore Russia's faith in its past For Fomenko the key to Russia's greatness in the future lies in ensuring that Russians understand the true greatness of their past Fomenko and other pseudo historians have built upon existing Russian notions of identity specifically the widespread belief in the positive qualities of empire and the special mission of Russia He has drawn upon previous attempts to establish a Russian identity ranging from Slavophilism through Stalinism to Eurasianism While fantastic Fomenko's pseudo history strikes many Russian readers as no less legitimate than the lies and distortions peddled by Communist propagandists Tsarist historians and church chroniclers **History, Fiction Or Science?** A. T. Fomenko, 2005 The author posits that all generally accepted chronology before the 16th century is in error by hundreds or thousands of years

Digital Satellite Navigation and Geophysics Ivan G. Petrovski, Toshiaki Tsujii, 2012-03-29 Bridge the gap between theoretical education and practical work experience with this hands on guide to GNSS which features A clear practical presentation of GNSS theory with emphasis on GPS and GLONASS All the essential theory behind software receivers and signal simulators Key applications in navigation and geophysics including INS aiding scintillation monitoring earthquake studies and more Physical explanations of various important phenomena including the similarity of code delay and phase advance of GNSS signals and negative cross correlation between scintillation intensity and phase variations Whether you are a practising engineer a researcher or a student you will gain a wealth of insights from the authors twenty five years of experience You can explore numerous practical examples and case studies and get hands on user experience with a bundled real time software receiver signal simulator and a set of signal data enabling you to create your own GNSS lab for research or study **Sirius Matters** Noah Brosch, 2008-05-24 Since very early times Sirius was a point of attraction in the night sky It served to synchronize calendars in antiquity and was the subject of many myths and legends including some modern ones It was perceived as a red star for more than 400 years but such reports were relegated to the Mediterranean region Astronomically Sirius is a very bright star This and its present close distance to us argues in favor of it being the target of detailed studies of stellar structure and evolution Its binary nature with a companion that is one of the more massive white dwarfs is an additional reason for such studies This book collects the published information on Sirius in an attempt to derive a coherent picture of how this system came to look as it does The Lost Millennium Florin Diacu, 2011-12 Join the author

as he pushes further and further in search of the truth **The Spirit of Socialism** Joseph Kellner, 2025-06-15 The Spirit of Socialism is a cultural history of the Soviet collapse It examines the millions of Soviet people who during the cascading crises of the collapse and the post Soviet transition embarked on a spirited and highly visible search for new meaning Amid profound disorientation these seekers found direction in their horoscopes or behind gurus in saffron robes or apocalyptic preachers or by turning from the most basic premises of official science and history to orient themselves anew The beliefs they seized on and even more the questions that guided their search reveal the essence of late Soviet culture and its legacy

in post Soviet Russia To skeptical outsiders the seekers appeared eccentric deviant and above all un Soviet Yet they came to their ideas by Soviet sources and Soviet premises As Joseph Kellner demonstrates their motley beliefs reflect modern values that formed the spiritual core of Soviet ideology among them a high regard for science an informed and generous internationalism and a confidence in humanity to chart its own course Soviet ideology failed however to unite these values in an overarching vision that could withstand historical change And so as The Spirit of Socialism shows the seekers asked questions raised but not resolved by the Russian Revolution and subsequent Soviet order questions of epistemic authority of cultural identity and of history's ultimate meaning Although the Soviet collapse was not the end of history it was a rupture of epochal significance whose fissures extend into our own uncertain era

Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating A.T. Fomenko, 2013-04-17 We present certain empirico statistical methods for the analysis of narrative and numerical data extracted from different texts of historical character such as chronicles or annals They are based on several statistical principles worked out by the author and originally reported at the Third International Vilnius Conference on Probability Theory and Mathematical Statistics in 1981 The principal results were published in the papers 15 32 293 299 304 319 and in the book A T Fomenko Methods for Statistical Analysis of Narrative Texts and Applications to Chronology Moscow Univ Press Moscow 1990 in Russian See also Part 1 The methods are applied to the problem of correct dating of the events in ancient and medieval history These results induce conjectures on the redating of some important ancient historical events Generally speaking we might say that the commonly accepted Modern Text book of ancient and medieval European Mediterranean Egyptian and Middle Eastern history is a fibered layered chronicle obtained by gluing together four nearly identical copies of a shorter original chronicle The other three chronicles are obtained from the original chronicle by redating and renaming the events described in them we rigidly move the original chronicle in its entirety backwards in time by approximately 333 1053 and 1778 years Thus the full Modern Textbook can be reconstructed from its smaller part namely from the original chronicle for the 9 17th cc A D See Appendix 1 Figs 101 104

Russia in Search of Itself James H. Billington, 2004-03-19 Billington describes the contentious discussion occurring all over Russia and across the political spectrum He finds conflicts raging among individuals as much as between organized groups and finds a deep underlying tension between the Russians attempts to legitimize their new nominally democratic identity and their efforts to craft a new version of their old authoritarian tradition After showing how the problem of Russian identity was framed in the past Billington asks whether Russians will now look more to the West for a place in the common European home or to the
