Bioscience Ethics Irina Pollard,2009-05-28 Ethics      Reproductive Ecology and Human Evolution Peter T.

Ellison,2017-09-04 The study of human reproductive ecology represents an important new development in human evolutionary biology Its focus is on the physiology of human reproduction and evidence of adaptation and hence the action of natural selection in that domain But at the same time the study of human reproductive ecology provides an important perspective on the historical process of human evolution a lens through which we may view the forces that have shaped us as a species In the end all actions of natural selection can be reduced to variation in the reproductive success of individuals Peter Ellison is one of the pioneers in the fast growing area of reproductive ecology He has collected for this volume the research of thirty one of the most active and influential scientists in the field Thanks to recent noninvasive techniques these contributors can present direct empirical data on the effect of a broad array of ecological behavioral and constitutional variables on the reproductive processes of humans as well as wild primates Because biological evolution is cumulative however organisms in the present must be viewed as products of the selective forces of past environments The study of adaptation thus often involves inferences about formative ecological relationships that may no longer exist or not in the same form Making such inferences depends on carefully weighing a broad range of evidence drawn from studies of contemporary ecological variation comparative studies of related taxonomies and paleontological and genetic evidence of evolutionary history The result of this inquiry sheds light not only on the functional aspects of an organism s contemporary biology but also on its evolutionary history and the selective forces that have shaped it through time Encompassing a range of viewpoints controversy along with consensus this far ranging collection offers an indispensable guide for courses in biological anthropology human biology and primatology along with      **How We Do It** Robert Martin,2013-06-11 Despite the widespread belief that natural is better when it comes to sex pregnancy and parenting most of us have no idea what natural really means the origins of our reproductive lives remain a mystery Why are a quarter of a billion sperm cells needed to fertilize one egg Are women really fertile for only a few days each month How long should babies be breast fed In How We Do It primatologist Robert Martin draws on forty years of research to locate the roots of everything from our sex cells to the way we care for newborns He examines the procreative history of humans as well as that of our primate kin to reveal what s really natural when it comes to making and raising babies and distinguish which behaviors we ought to continue and which we should not Although it s not realistic to raise our children like our ancestors did Martin s investigation reveals surprising consequences of and suggests ways to improve upon the way we do things now For instance he explains why choosing a midwife rather than an obstetrician may have a greater impact than we think on our birthing experience examines the advantages of breast feeding for both mothers and babies and suggests why babies may be ready for toilet training far earlier than is commonly practiced How We Do It offers much needed context for our reproductive and child rearing practices and

shows that once we understand our evolutionary past we can consider what worked what didn't and what it all means for the future of our species

**Reconceiving the Second Sex** Marcia C. Inhorn, 2009 Extensive social science research particularly by anthropologists has explored women's reproductive lives their use of reproductive technologies and their experiences as mothers and nurturers of children Meanwhile few if any volumes have explored men's reproductive concerns or contributions to women's reproductive health Men are clearly viewed as the second sex in reproduction This volume argues that the marginalization of men is an oversight of considerable proportions and thereby seeks to break the silence surrounding men's thoughts experiences and feelings about their reproductive lives It sheds new light on male reproduction from a cross cultural global perspective focusing not only upon men in Europe and America but also those in the Middle East Asia and Latin America Both heterosexual and homosexual married and unmarried men are featured in this volume which assesses concerns ranging from masculinity and sexuality to childbirth and fatherhood Thus men are brought back into the equation as reproductive partners progenitors fathers nurturers and decision makers

**Ethics and Economics of Assisted Reproduction** Maura A. Ryan, 2003-06-11 For those who undergo it infertility treatment is costly time consuming invasive and emotionally and physically arduous yet technology remains the focus of most public discussion of the topic Drawing on concepts from medical ethics feminist theory and Roman Catholic social teaching Maura A Ryan analyzes the economic ethical theological and political dimensions of assisted reproduction Taking seriously the experience of infertility as a crisis of the self the spirit and the body Ryan argues for the place of reproductive technologies within a temperate affordable sustainable and just health care system She contends that only by ceasing to treat assisted reproduction as a consumer product can meaningful questions about medical appropriateness and social responsibility be raised She places infertility treatments within broader commitments to the common good thereby understanding reproductive rights as an inherently social rather than individual issue Arguing for some limits on access to reproductive technology Ryan considers ways to assess the importance of assisted reproduction against other social and medical prerogatives and where to draw the line in promoting fertility Finally Ryan articulates the need for a compassionate spirituality within faith communities that will nurture those who are infertile

**Infertility and the Novels of Sophie Cottin** Michael J. Call, 2002 Caught between the ideological positions she had embraced and the reality of her sterility she cast about for alternatives In the early years of her widowhood she took up writing in a serious way admitting that she found writing therapeutic Her story little known to modern readers on either side of the Atlantic may nevertheless be a perfect case study of a woman's coming to writing in post revolutionary France This book explores the crucial connections between her self perceived defectiveness and her literary production

**Fertility, Family Planning and Population Policy in China** Chiung-Fang Chang, Che-Fu Lee, Sherry L. McKibben, Dudley L. Poston, Carol S. Walther, 2005-12-16 China's one child population policy first initiated in 1979 has had an enormous effect on the country's development By reducing its fertility in the past two decades to less than

two children per woman and developing a family planning program focused heavily on sterilization and abortion China has undergone a significant transition in status to a demographically developed country Bringing together contributions from leading academics this book looks at the impact of the government's strict control over planning and population growth on the family the wider society and the country's demography The contributors examine developments such as family planning policy and contraceptive use biological and social determinants of fertility patterns of family and marriage and China's future population trends As such it will be essential reading for academics researchers policy makers and government officials with an interest in China's population policy

**Life, Love and Children** Irina Pollard, 2012-12-06 Discussion of bioscience ethics requires understanding of the science that underpins biological systems impinging on our lives Unencumbered by the formal structure of ethics bioethics presents a forum for discussion of practical matters of individual and collective concern This comprehensive text is a guide to the essentials of bioscience ethics and an interface between applied science and applied bioethics Early chapters embrace topics affecting human reproduction substance abuse and parenthood aging gametes and congenital malformations child abuse and its biological consequences Intermediate chapters deal with end of life care and euthanasia human fertility assisted reproductive technologies genetic engineering and cloning Remaining chapters challenge human dominated ecosystems Population growth economic activity and warfare with its environmental consequences are reviewed A background section describes the evolution of ethical consciousness explores the future and proposes that the reworking of ethical boundaries can enhance mature decision making in harmony with changing technology

The Endangered Species Act Brian Czech, Paul R Krausman, 2001-03-14 The new model of policy design theory frames the discussion regarding the frequently analyzed Endangered Species Act in this historical perspective Since the 1970s the Endangered Species Act ESA by virtue of its regulatory impact has been a frequent subject of policy analysis In this comprehensive history and critique of the ESA Brian Czech and Paul R Krausman incorporate the new model of policy design theory to frame a larger discussion about conservation biology and American democracy Czech and Krausman provide a historical background of endangered species policy that integrates natural history socioeconomic trends political movements and professional developments Outlining the controversies surrounding the ESA they find a connection between challenges to species conservation and challenges to democracy After an assessment of ESA analyses that have been performed from traditional perspectives they engage policy design theory to review the structural logic of the ESA analyzing each clause of the legislation for its application of the fundamental elements of democracy To address the technical legitimacy of ESA they propose two new genetic considerations functional genome size and molecular clock speed to supplement phylogenetic distinctiveness as criteria with which to prioritize species for conservation Next they systematically describe the socioeconomic context of ESA by assessing and classifying the causes of species endangerment A hybrid of policy analysis and ecological assessment The Endangered Species Act History Conservation Biology and Public Policy will

appeal to scholars and students in the fields of natural resource policy and law conservation biology political science wildlife ecology and environmental history and to professionals at agencies involved in wildlife conservation Interesting for anyone concerned about the preservation of species and more generally the global environment a good explanation of the statute a wonderful and often entertaining description of how we view and rank nonhuman species and a provocative critique of the very policy analytic framework the authors have employed Joseph F C DiMento Environment Czech and Krausman are effective and original scholars The Endangered Species Act History Conservation Biology and Public Policy is both a treatise on policy assessment and an excellent history assessment and discussion of the ESA itself Those interested in natural resources policy and those interested specifically in the ESA will want to read this book Jack Ward Thomas The University of Montana Chief Emeritus U S Forest Service

Evolution, Gender, and Rape Cheryl Brown Travis, 2003 Explains the flaws and limitations of a strictly biological model of rape and argues that traditionally stereotyped gender roles are grounded more in culture than in differing biological reproductive roles back cover

**Menopause** Lynnette Leidy Sievert, 2006 Menopause is a biological reality for all women in their forties and fifties Yet the way we think about the cessation of menstruation is influenced by a variety of factors Cultural and technological influences combine with biology to transform this universal phenomenon into an experience that varies considerably between cultures and individuals In this concise book Lynnette Leidy Sievert draws on her own case studies from Puebla Mexico and western Massachusetts as well as on comparative data from other studies in places such as Slovenia Paraguay and Hawaii to explore the different ways that women experience menopause around the world Sievert suggests that attempts by medical professionals to define the normal occurrence of menopause including its typical onset and symptoms may not be realistic when considering how lifestyle nutrition and workload can contribute to diverging realities She explores how women feel about hysterectomies chemotherapy and other medical procedures and treatments that stop menstruation prematurely She also considers recent advances in technology including post menopausal birth which have turned what was previously an unavoidable end of fertility into something that can be postponed A unique comparative look at women s experiences this text brings new perspectives to the mainstream literature on the subject and invites readers to consider compelling questions about menopause its meanings and its future

A Guide to Reproduction Irina Pollard, 1994-06-23 The purpose of this comprehensive text is to increase awareness of human reproduction and its consequences The central theme links reproductive capacity the social consequences of the multiple stresses this places on the environment and the ways this relates back to the reproductive health of humans and other animals In the first section the biology of human reproduction is discussed including such topics as the treatment and causes of infertility growth and maturation parental behaviour and neonate biology The effects of procreational biology on the foundation of human social structure are also examined The second part deals with reproduction as it relates to health and social issues such as stress fertility control AIDS teratogens

and errors of sexual differentiation It is an invaluable resource for all those wishing to update their knowledge of human reproductive biology      **International Encyclopedia of Marriage and Family** James J. Ponzetti,2003 Online version of the 4 vol work published by Macmillan Reference USA      **Reproductive Technologies** Carol Wekesser,1996 Revised from the 1980 Industrial Organic Chemicals in Perspective to update the political and economic contexts in which organic chemists and chemical engineers work with industrial organic chemicals and polymers with particular emphasis on issues of waste reduction and pollution prevention Provides an overview of the raw materials intermediates and processes in manufacturing such chemicals details the seven major building blocks derived from petroleum and natural gas describes polymerization and catalysis including the new metallocene catalysis presents lesser volume chemicals in separate chapters that can be skipped and notes more profitable specialty chemicals from other sources such as coal fats and oils and carbohydrates Annotation copyright by Book News Inc Portland OR      Journal of Reproductive Medicine ,1994-07

**Fertility and Sterility** ,1994-04      **Bulletin of the Medical Library Association** Medical Library Association,1994

**Reproductive Rights as Human Rights** Zakiya Luna,2020-09-01 Reveals both the promise and the pitfalls associated with a human rights approach to the women of color focused reproductive rights activism of SisterSong How did reproductive justice defined as the right to have children to not have children and to parent become recognized as a human rights issue In Reproductive Rights as Human Rights Zakiya Luna highlights the often forgotten activism of women of color who are largely responsible for creating what we now know as the modern day reproductive justice movement Focusing on SisterSong an intersectional reproductive justice organization Luna shows how and why women of color mobilized around reproductive rights in the domestic arena She examines their key role in re framing reproductive rights as human rights raising this set of issues as a priority in the United States a country hostile to the concept of human rights at home An indispensable read Reproductive Rights as Human Rights provides a much needed intersectional perspective on the modern day reproductive justice movement      **"Love of Shopping" is Not a Gene** Anne Innis Dagg,2005 Based on Darwin s theory of evolution and natural selection Evolutionary Psychology claims that its all in our genes At the beginning of the 21st century genes are used to explain almost every aspect of human life from social inequalities to health sexuality and criminality This book is a critique of Darwinian psychology alias evolutionary psychology alias sociobiology the study of the social behavior of animals and people based on evolution In this provocative work Innis Dagg an eminent and outspoken critic of this ideology first presents an overview of the theory and its popularity both among professionals and lay people then she examines concepts of social behavior based on genes vs culture including aggression in the form of rape infanticide homicide gang violence and war and general criminality homosexuality in both the human and the animal world and race IQ and environment Focusing on the problems present in much Darwinian psychological research flawed data faulty analysis and political motives this controversial book offers the first comprehensible critique of the most popular scientific theory of

the late 20th century Evolutionary Psychology In the end Innis Dagg presents a new perspective which acknowledges the complexity of life by placing at its center the living organism in its environment rather than the gene *New Scientist* ,1994
