Gender and Agricultural Development Helen Kreider Henderson, 2022-03-29 Agricultural planning and development are crucial to human survival but they usually proceed without any consideration of the importance of gender issues at the production level Although women have long been prime movers in agriculture their contribution to the world s food supply has been largely ignored and consequently their stake in development has been undermined This book is both a resource guide and a review of major issues in gender and agriculture which demonstrates that recognizing the contribution of women to agricultural production is a necessary step in development planning It presents relevant information and research literature regarding women s roles in agriculture in a consolidated and accessible format offering insights into how the inclusion or exclusion of appropriate information at the planning stage can have an impact during implementation It also provides guidelines for locating information on gender related agricultural issues and incorporating it into development planning research and training The literature reviewed not only calls attention to the work women do in order to improve their access to technology and training but also challenges existing development paradigms The issues discussed present women s experiences and local knowledge and allude to gender and class inequities that farming women face Each chapter is intended to help the reader address major gender issues in a specific subject in order to access relevant information and thereby better design and implement appropriate agricultural planning and policies By synthesizing twenty years of international research Gender and Agricultural Development provides an effective tool for development practitioners to use in training programs or surveys in order to ensure the appropriate collection of gender disaggregated data and for educators to integrate gender issues into courses dealing with social aspects of agricultural systems Its findings are presented in such a way as to allow them to be easily incorporated into innovative planning for more sustainable and equitable agricultural policies Confronting Power, Theorizing Gender Eudine Barriteau, 2003 Extrait de la couverture This anthology of Caribbean feminist scholarship has several unique features It explodes gender relations as regimes of power and consolidates and advances indigenous feminist theorizing A particularly strong section of the collection deconstructs marginality and masculinity in the Caribbean and provides ground breaking research with policy implications The major breakthrough is the

recognition that this area of research includes both men and women as integral to a more adequate conceptualization of society polity and economy thereby enabling scholars to address more fully the realities of social life The temper of the times suggests that a significant watershed in gender studies has been reached
