Horrors of War Cynthia J. Miller, A. Bowdoin Van Riper, 2015-05-14 Battlefields have traditionally been considered places where the spirits of the dead linger and popular culture brings those thoughts to life Supernatural tales of war told in print on screen and in other media depict angels demons and legions of the undead fighting against or alongside human soldiers Ghostly war ships and phantom aircraft carry on their never to be completed missions and the spirits sometimes corpses of dead soldiers return to confront the enemies who killed them comrades who betrayed them or leaders who sacrificed them In Horrors of War The Undead on the Battlefield Cynthia J Miller and A Bowdoin Van Riper have assembled essays that explore the meaning and significance of these tales Among the questions that the volume seeks to answer are How do supernatural stories engage with cultural attitudes toward war In what ways do these stories reflect or challenge the popular memories of particular wars How do they ask us to think again about battlefield heroism military ethics and the politics of sacrifice Divided into four sections chapters examine undead war stories in film *Carol for Another Christmas* *The Devil's Backbone* television *The Twilight Zone* literature *The Bloody Red Baron* *Devils of D Day* comics *Weird War Tales* *The Haunted Tank* graphic novels *The War of the Trenches* and gaming *Call of Duty World at War* Featuring contributions from a diverse group of international scholars these essays address such themes as monstrous enemies and enemies made monstrous legacies and memories of war and the war dead who refuse to rest Drawing together stories from across wars branches of service and generations of soldiers and featuring more than fifty illustrations Horrors of War will be of interest to scholars of film popular culture military history and cultural history The Ashgate Research Companion to Critical Geopolitics Merje Kuus, 2016-04-01 Since the late 1980s critical geopolitics has gone from being a radical critical perspective on the disciplines of political geography and international relations theory to becoming a recognised area of research in its own right Influenced by poststructuralist concerns with the politics of representation critical geopolitics considers the ways in which the use of particular discourses shape political practices Initially critical geopolitics analysed the practical geopolitical language of the elites and intellectuals of statecraft Subsequent iterations have considered the role that popular representations of the international political world play As critical geopolitics has become a more established part of political

geography it has attracted ever more critique from feminists for its apparent blindness to the embodied effects of geopolitical praxis and from those who have been uncomfortable about its textual focus while others have challenged critical geopolitics to address alternative resistant forms of geopolitical practice Again critical geopolitics has been reworked to incorporate these challenges and the latest iterations have encompassed normative agendas non representational theory emotional geographies and affect It is against the vibrant backdrop of this intellectual development of critical geopolitics as a subdiscipline that this Companion is set Bringing together leading researchers associated with the different forms of critical geopolitics this volume produces an overview of its achievements limitations and areas of new and potential future development The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics

War in International Thought Jens Bartelson, 2018 Describes how assumptions about the nature of war have shaped our understanding of the modern world and the role of war within it

War, Citizenship, Territory Deborah Cowen, Emily Gilbert, 2024-11-01 For all too obvious reasons war empire and military conflict have become extremely hot topics in the academy Given the changing nature of war one of the more promising areas of scholarly investigation has been the development of new theories of war and war's impact on society War Citizenship Territory features 19 chapters that look at the impact of war and militarism on citizenship whether traditional territorially bound national citizenship or transnational citizenship The editors argue that while there has been an explosion of work on citizenship and territory Western academia's avoidance of the immediate effects of war among other things has led them to ignore war which they contend is both pervasive and well nigh permanent This volume sets forth a new geopolitically based theory of war's transformative role on contemporary forms of citizenship and territoriality and includes empirical chapters that offer global coverage

A Research Agenda for Military Geographies Rachel Woodward, *A Research Agenda for Military Geographies* explores how military activities and phenomena are shaped by geography and how geographies are in turn shaped by military practices A variety of future research agendas are mapped out examining the questions faced by geographers when studying the military and its effects

Shifting Grounds Burak Kadercan,2023 In *Shifting Grounds* Burak Kadercan draws upon a wide variety of cases ranging from the Thirty Years War to ISIS to examine the relationship between territorial ideas and armed conflict He argues that states and societies have adhered to different forms of territoriality across time and space and territory as well as territorial control has meant different things in different time periods and regions Ranging broadly across different eras and world regions the book sheds light on the shifting nature of the relationship between territorial ideas and armed conflict not only in the context of the distant the past but also in present day global politics

The Unintended Consequences of Peace Arie Marcelo Kacowicz,Exequiel Lacovsky,Keren Sasson,Daniel F. Wajner,2021-07-01 Scholars of international relations generally consider that under conditions of violent conflict and war smuggling and trans border crime are likely to thrive In contrast this book argues that in fact it is globalisation and peaceful borders that have enabled transnational illicit flows conducted by violent non state actors including transnational criminal organizations drug trafficking organizations and terrorist cells who exploit the looseness and demilitarization of borderlands Empirically the book draws on case studies from the Americas compared with other regions of the world experiencing similar phenomena including the European Union and Southeast Europe the Western Balkans Southern Africa and Southeast Asia To explain the phenomenon in itself the authors examine the type of peaceful borders and regimes involved in each case how strong each country is in the governance of their borderlands their political willingness to control their peaceful borders and the prevailing socio economic conditions across the borderlands

Peacebuilding and Spatial Transformation Annika Bjorkdahl,Stefanie Kappler,2017-05-18 This book investigates peacebuilding in post conflict scenarios by analysing the link between peace space and place By focusing on the case studies of Cyprus Kosovo Bosnia Herzegovina Northern Ireland and South Africa the book provides a spatial reading of agency in peacebuilding contexts It conceptualises peacebuilding agency in post conflict landscapes as situated between place material locality and space the imaginary counterpart of place analysing the ways in which peacebuilding agency can be read as a spatial practice Investigating a number of post conflict cases this book outlines infrastructures of power and agency as they are manifested in spatial practice It demonstrates how spatial agency can take the form of conflict and exclusion on the one hand but also of transformation towards peace over time on the other hand Against this background the book argues that agency drives place making and space making processes Therefore transformative processes in post conflict societies can be

understood as materialising through the active use and transformation of space and place This book will be of interest to students of peacebuilding peace and conflict studies human geography and IR in general *Reconstructing Conflict* Scott Kirsch, Colin Flint, 2016-04-08 Reconstruction the rebuilding of state economy culture and society in the wake of war is a powerful idea and a profoundly transformative one From the refashioning of new landscapes in bombed out cities and towns to the reframing of national identities to accommodate changed historical narratives the term has become synonymous with notions of post conflict society it draws much of its rhetorical power from the neat demarcation both spatially and temporally between war and peace The reality is far more complex In this volume reconstruction is identified as a process of conflict and of militarized power not something that clearly demarcates a post war period of peace Kirsch and Flint bring together an internationally diverse range of studies by leading scholars to examine how periods of war and other forms of political violence have been justified as processes of necessary and valid reconstruction as well as the role of war in catalyzing the construction of new political institutions and destroying old regimes Challenging the false dichotomy between war and peace this book explores instead the ways that war and peace are mutually constituted in the creation of historically specific geographies and geographical knowledges **The politics of identity** Christine Agius, Dean Keep, 2018-01-17 In what ways can we think through the complexities of identity Identity is a contested concept but it is more than a thing possessed by agents Identity is contingent and dynamic constituting and reconstituting subjects with political effects In this edited book identity is explored through a range of unique interdisciplinary case studies from around the world Questions of citizenship belonging migration conflict security peace and subjectivity are examined through social construction post colonialism and gendered lenses from an interdisciplinary perspective This combination showcases in particular the political implications of identity how it is constituted and the effects it produces This edited collection will be of particular interest to students of international relations theory migration studies gender and sexuality post colonialism and policy making at both undergraduate and postgraduate levels *Geopolitics* Bert Chapman, 2011-04-07 This concise introduction to the growth and evolution of geopolitics as a discipline includes biographical information on its leading historical and contemporary practitioners and detailed analysis of its literature An important book on a topic that has been neglected for too long *Geopolitics A Guide to the Issues* will provide readers with an enhanced understanding of how geography influences personal national and international economics politics and security The work begins with the history of geopolitics from the late 19th century to the present then discusses the intellectual renaissance the discipline is experiencing today due to the prevalence of international security threats involving territorial airborne space based and waterborne possession and acquisition The book emphasizes current and emerging international geopolitical trends examining how the U S and other countries including Australia Brazil China India and Russia are integrating geopolitics into national security planning It profiles international geopolitical scholars and their work and it analyzes emerging academic military and governmental literature
