Geological Methods For Archaeology:

Geological Methods for Archaeology Norman Herz, Ervan G. Garrison, 1997-12-18 This book discusses the application of geological methods and theory to archaeology. Written as a survey text covering appropriate methods and techniques taken from geology, geophysics, geochemistry, and geochronology, it shows the student the practicality and importance of each technique's use in solving archaeological problems. Specific techniques are illustrated by practical results obtained from the authors' use on archaeological digs. With an international geographical scope, the book draws on sites from both hemispheres, including the Franchthi Cave in Greece, St. Catherine's Island in the U.S., the Roman site of Drand in France, and Monte Verde, Chile. The authors also address applications in less traditional areas such as underwater, historical, industrial, and conservation archaeology.

Techniques in Archaeological Geology Erv Garrison, 2013-03-09 The archaeological geology of the Quaternary or the geological epoch during which humankind evolved is a scientific endeavor with much to offer in the fields of archaeology and palaeoanthropology. Earth science techniques offer diverse ways of characterizing the elements of past landscapes and archaeological facies. This book is a survey of techniques used in archaeological geology for the study of soils, sediments, rocks, and minerals. The techniques presented represent those most commonly used today. They are discussed in detail, and examples are provided in many cases to demonstrate their usefulness to archaeologists.

Techniques in Archaeological Geology Ervan Garrison, 2016-05-18 This 2nd edition is a survey-level review of key areas of archaeological geology, geoarchaeology. Principal subject areas include historical principles, archaeological and geomorphic surfaces and landforms, types of sediments, and sedimentary analytic methods, archaeological stone materials, petrographic and mineralogical attributes, ceramic materials, mineralogical composition, and analytic methods, geochemical methods useful in archaeological geology, studies of materials, commonly used geochronological methods for archaeological geology, Contributions to paleoecology, paleoclimate, and ancient cultures, as well as multivariate ICP and EDX data, are now included.
