Geometries Of Silence Three Approaches To Neoclassical Art:

Geometries of Silence Anna Ottani Cavina, 2004 Based on little known or hitherto unpublished material and enhanced by a wealth of rarely seen illustrations this book offers access to the aesthetics of neoclassical Europe from a new perspective landscape painting and interior decoration The source documents together with the nexus of relationships they helped to establish reveal a world shaken by a series of epochal changes This study of paintings drawings and documents touches on such themes as the rediscovery of the ancient world aristocratic homes in the neoclassical period and the birth of the rationalist landscape While the most important artists are French the chosen vantage point is Rome because of the impact of antiquity on aesthetic perceptions toward the end of the century The book insightfully analyzes the last years of the eighteenth century through the visual representation of that world a world that has been handed down to us through the response of contemporary artists to momentous changes This book portrays drawing as an instrument of knowledge an absolute experience not merely an intermediate phase in the production of a painting Anna Ottani Cavina leads us to modernity which through the rarefaction of the image silence and emptiness attained heights of emotional and intellectual intensity that drawing was able to capture with extraordinary immediacy

Historical Dictionary of Neoclassical Art and Architecture Allison Lee Palmer, 2020-05-15 Neoclassicism refers to the revival of classical art and architecture beginning in Europe in the 1750s until around 1830 with late neoclassicism lingering through the 1870s It is a highly complex movement that brought together seemingly disparate issues into a new and culturally rich era one that was unified under a broad interest in classical antiquity The movement was born in Italy and France and spread across Europe to Russia and the United States It was motivated by a desire to use ideas from antiquity to help address modern social economic and political issues in Europe and neoclassicism came to be viewed as a style and philosophy that offered a sense of purpose and dignity to art following the new enlightened thinking This second edition of Historical Dictionary of Neoclassical Art and Architecture contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries cover late Baroque and Rococo tendencies found in the early 18th century and span the century to include artists who moved from neoclassicism to early romanticism This book is an excellent resource for students researchers and anyone wanting to know more about neoclassical art and architecture

The Living Death of Antiquity William Fitzgerald, 2022 The Living Death of Antiquity examines the historical development of a neoclassical aesthetic in visual art and sculpture centred on simplicity and grandeur Fitzgerald describes its ideals and potential as well as its remaining significance in modern culture

Antiquity, Theatre, and the Painting of Henry Fuseli Andrei Pop, 2015 In this volume Pop examines how art of the mid 1700s and early 1800s inspired by translations of Greek tragedy reveals a view of modern Europe attempting to recognize its own historical status as one culture among many He analyses this broad view of culture through the lens of Anglo Swiss artist Henry Fuseli s life and work

Eternal Sovereigns Gloria Jane Bell, 2024-09-06 In

1925 Pius XI staged the Vatican Missionary Exposition in Rome's Vatican City Offering a narrative of the Catholic Church's beneficence to a global congregation the exposition displayed thousands of cultural belongings stolen from Indigenous communities across Turtle Island which were seen by one million pilgrims Gloria Bell's *Eternal Sovereigns* offers critical revision to that story Bell reveals the tenacity mobility and reception of Indigenous artists travelers and activists in 1920s Rome Animating these conjunctures the book foregrounds competing claims to sovereignty from Indigenous and papal perspectives Bell deftly juxtaposes the Indian Museum of nineteenth century sculptor Ferdinand Pettrich with the oeuvre of Indigenous artist Edmonia Lewis Bell analyzes Indigenous cultural belongings made by artists from diverse nations including Cree Lakota Anishinaabe Nipissing Kanien keh ka Wolastoqiyik and Kwakwaka wakw Drawing on years of archival research and field interviews Bell provides insight into the Catholic Church's colonial collecting and its ongoing ethnological display practices Written in a voice that questions the academy's staid conventions the book reclaims Indigenous belongings and other stolen treasures that remain imprisoned in the stronghold of the Vatican Museums *Antiquity in Print* Daniel Orrells, 2024-05-16 Daniel Orrells examines the ways in which the ancient world was visualized for Enlightenment readers and reveals how antiquarian scholarship emerged as the principal technology for envisioning ancient Greek culture at a time when very few people could travel to Greece which was still part of the Ottoman Empire Offering a fresh account of the rise of antiquarianism in the 18th century Orrells shows how this period of cultural progression was important for the invention of classical studies In particular the main focus of this book is on the visionary experimentalism of antiquarian book production especially in relation to the contentious nature of ancient texts With the explosion of the Quarrel between the Ancients and the Moderns eighteenth century intellectuals antiquarians and artists such as Giambattista Vico Johann Joachim Winckelmann the Comte de Caylus James Stuart Julien David Leroy Giovanni Battista Piranesi and Pierre Fran ois Hugues d Hancarville all became interested in how printed engravings of ancient art and archaeology could visualize a historical narrative These figures theorized the relationship between ancient text and ancient material and visual culture theorizations which would pave the way to foundational questions at the heart of the discipline of classical studies and neoclassical aesthetics **More-Than-Human Diasporas** Joseph Pugliese, 2024-10-28 Pugliese's *More Than Human Diasporas* breaks the confines of existing scholarship in its vision of the way that more than human diasporic entities such as water trees clay stone and architectural styles have functioned as agents within the context of empire settler colonialism and a largely effaced history of Mediterranean enslavement a history that pre existed and then coincided with the Atlantic slave trade This book traces for example the diasporic travels of the eucalyptus from Indigenous Country to Joseph Banks botanical collection in London and then onto a grand English style garden in Southern Italy which was built on the historically effaced labour of enslaved people By deploying techniques of historical recovery this book brings to light otherwise buried histories thereby demonstrating the pivotal role of Mediterranean enslavement in the shaping of Italian society and culture This book develops

a topological understanding of cultural history to account for the complex spatio temporal effects that connect seemingly disparate times spaces and more than human entities within networks of relationality In this innovative scholarly work more than human diasporic entities function as conceptual keys to histories which would otherwise remain hidden thereby revealing desubjugated knowledges which reconfigure anthropocentric histories and further the process of decolonisation This book will be of interest to readers interested in transnational and local histories of empire settler colonialism and slavery
